

Tarborough,

FRIDAY, SEPTEMBER 26, 1828.

Presidential.—We have received a pamphlet copy of the "Address of the Central Jackson Committee to the Freemen of North-Carolina." We regret that our limits will not permit the insertion entire of this interesting publication, in which the Central Committee have addressed the people "with that plainness of speech in which facts and arguments are more easily apprehended by those plain men who constitute the large majority of our fellow-citizens." We will endeavor soon to give some extracts from this pamphlet—in the meantime those who feel a desire to peruse it, can do so by applying at this office.

Newbern, Sept. 20.

Cotton—new crop.—On Tuesday last, ten bales of Cotton of the new crop, were brought to this market from the plantation of Gen. Durant Hatch of this county, which were sold at 9½ cents. Since that time, several small parcels have been brought in and sold at the above price. Judging from what we have seen of the article, it appears to be of superior quality; and should the season prove favorable, we have the prospect of an abundant product.—*Spectator.*

Fayetteville, Sept. 18.

New Cotton.—We learn that 12 bales of new Cotton have been brought to this market within a few days past, and sold readily at 9¼ to 10 cents. The quality is very good.—*Observer.*

Cotton.—The new crop of Cotton is arriving in greater quantity than it ever did, as early in the season. As many as five loads were taken in one day this week at one warehouse. It readily commands 10 cents. We believe it is a common opinion among our merchants, that, owing to the deficiency of last year's crop, and the improbability of an exuberant one this year, that the planter will receive a better price for his Cotton than he has done for one or two years past.—*Augusta Geo. Co.*

English Markets.—A letter dated Liverpool, Aug. 1, 1828, says: "Our Cotton market remains in the same inanimate state, and a decline of 1-3d per lb. has taken place, which can only be accounted for by the eagerness on the part of the holders to effect sales."

The New-York Journal of Commerce says, "The funds are high and lands are low, (in England;) the latter it is thought too much so in proportion. The French funds are not so high as the British by 15 per cent. and yet the debt of the latter nation is as a river to a rivulet compared with the French national debt. Money can be borrowed in London, on first-rate security, at two per cent. and land pays three and a half per cent."

Suicide.—Samuel H. Pullen, Cashier of the Edenton Branch

of the State Bank, and the widowed father of two helpless children, committed an act of suicide, on Monday 15th inst. by shooting himself through the head, just above the ear, with a loaded pistol, and expired between two and three in the afternoon. We learn that for several days previous to the shocking act committed, he had given strong evidence of mental aberration. He left a letter in which he stated that all his affairs with the Bank were perfectly straight—and from our knowledge of the man, says the Edenton Gazette, we have no doubt of its being the fact.—*Freeman's Echo.*

Wine and Silk.—There is perhaps no country in the world where the Vine grows more luxuriantly and abundantly than in N. Carolina—and mulberry trees of the largest and finest growth are to be found every where in our State. It is a matter of astonishment that all our farmers do not make wine, at least, if not silk. A farmer in South-Carolina last year, from four acres of land sold wine to the amount of \$2,400. A few of our farmers have small vineyards, but we would like to see it become general—for if cheap wine could be substituted for the miserable whiskey that is now doing so much injury in our country, it would have a most happy effect. Not only would its extensive culture give a greater scope to agricultural industry, but it would a greater revenue to planters by far than our present crops. One of our most respectable farmers in the vicinity of Newbern last year, succeeded perfectly well in raising silk worms, and has on his estate a grove of 300 mulberry trees.—*Newbern Sent.*

The Banks.—The excitement about the Banks, which was first raised by Robert Potter in Granville, has not spread so far and fiercely as he doubtless contemplated. In comparatively but few counties has the excitement been made a handle of, for electioneering purposes, &c.

Of all that has been said and done about the mismanagement of the Banks, we have hitherto seen no specific plan proposed for remedying what is confessed on all hands to be a vexatious evil in the land. In politics as in medicine, every despicable empiric can tell when the body is ailing, and they are never backward in recommending this, that, and the other thing as infallible specifics; but the great object is to cure the disease, which none of them can do. Now in regard to the "Bank fever," with which it is said our body-politic is afflicted, we fear those who are most officious in prescribing remedies, are not the most likely to cure the complaint. They discourse flippantly, and, as many of our honest but deceived citizens believe, learnedly about the cause and nature of the evils under which the community are suffering from the bad conduct of the Bank managers; and thus hoodwink the unsuspecting people into an employment of them, (as members of the Legislature,) under an erroneous opinion that they can and will set every thing

right, and bring about better times! The plain truth is, that the people of North-Carolina have suffered most grievously from quackery: they have been doctored to death, by hundreds, by villanous empirics in medicine; and political degradation and bankruptcy have been brought upon them, by no less villanous pretenders in politics.
