They further state that the cotton manufacture is increasing in Prussia, the Rhenish provinces, Lombardy, Austria, and Saxony; that in all these countries the wages of labour are decidedly lower than in England; and that the repeal of 100 our import duty is absolutely necsssary to check their growing competition, and diminish the temptation to invest capital in the erection of factories on the continent; which capital if the present system be continued, may it is much feared, be supplied in part at least by Englishmen:-As to the impolicy of subjecting to a heavy tax the raw material of by far the most important of our manufactures, the memorialists observe that they consider it needless to say much, that impolicy having at the time of the recent augmentation of the tax, been frankly and fully admitted, both by the noble Chan-
