

As it was understood to be the wish of the President to be retired, but few persons visited him, during Saturday, from the Point. In the afternoon, however, when the Steam Boat Hampton left for Norfolk, at the request of many of his passengers, Capt. Selden, whose obliging disposition on all occasions, is so well known, ran over to the Rip Raps, and gave them an opportunity of paying their respects to our venerable Chief Magistrate, by whom they were received, at the landing place, in the most graceful and courteous manner. After a few minutes conversation, the party took leave of the President highly gratified with their short but interesting visit.

The General, though much changed since his visit to Norfolk some years since, we are happy to say looked well, and seemed to be in excellent spirits. We sincerely hope that he may derive much benefit from the pure sea air and bathing, and from the repose which he so much needs and cannot fail to find in his present place of retirement."

**FOREIGN.**

**Latest from England.**—The ship Roscoe, arrived at New York, from Liverpool, brings intelligence down to the 25th of June.

**ENGLAND.**

The bill in relation to the emancipation of the Slaves in the British Colonies, has passed the House of Commons, and been carried up to the House of Lords. Though its fate is not finally settled, the monied interests are already full of speculations as to the means by which the twenty millions are to be raised, that is to be given to the planters as an indemnity. No settled plan seems however as yet formed on this point. The mortgagees of West India estates and the absentee planters residing in England, seem satisfied with the bill as it has passed the House of Commons. It is very doubtful, however, whether it will be received with the same cordiality in the West Indies, for the resident planters do not simply complain of losing the value of their slaves, but allege that by emancipation they will lose the working power. Free labor they look upon as a dream.

**Liverpool, June 25.**—The Cotton market has been very brisk throughout the last ten days and the sales on an extensive scale, being about 45,000 bags, of which 12,000 bags have been taken by speculators. Prices of Sea Island are 1-4 to 1-2d advance, and other sorts of American are about 1-3d higher. The confidence of holders appears to be quite sustained, and we should not be surprised to see some further partial advances before long.

**FRANCE.**

The French Chamber of Deputies has postponed the consideration of the treaty with the United States until another session. The Ministers seem never to have presented the subject to the Chambers until now.

The subject of negro slavery has also been partially discussed in the Chamber of Deputies; it arose incidentally on asking the appropriation for the service of the colonies. From what passed, it appears that the Committee of the Chamber had recommended the abolition of slavery as the only means of meliorating the condition of the colonies. On this recommendation, however, the Chamber did not act.

**TURKEY.**

In a speech from the throne, the Sultan acknowledged the services of the editor of the Smyrna newspaper, and permitted that functionary to address him *à voce*, and after the manner of a royal representative, in a set speech. The Pacha of Egypt has sent over to Europe for the editor of a newspaper, as he used to do for steam engines and spinning jennies, and has assigned him a salary equal, probably, to that of one of his generals.

The Rev. J. GORTON is expected to preach in the Old Church at Tarborough, on Thursday after the fourth Lord's day in August.—*Com.*

**Family Steamer.**

THE Subscriber has obtained the patent right of this useful invention for Edgecombe county and now offers them for sale. It is admirably adapted, from its simplicity, its easy application, and its various and important uses, to the convenience and comfort of the neat and industrious housewife. It is a portable steam generator, whose principal object is to assist in creating and preserving cleanliness, to destroy obnoxious insects and vermin, and to prevent their increase. It is used without trouble or inconvenience, and supersedes the annoying application of water in many cases. That vexatious and indispensable ceremony, which is after all too often ineffectual, the cleaning of bedsteads, may be performed most thoroughly by the aid of this apparatus, without taking them apart or removing them, and without the slightest injury to the floor or carpet upon which they stand. Not a bug or other insect can possibly escape the searching and destructive power of this instrument. For cleansing furniture, removing spots from paint, purifying varnish, cleansing windows and looking glasses, picture frames, maps, &c. it is most completely adapted. Its penetrating power is truly wonderful. The smallest crack or fissure may be thoroughly searched and every thing harbored there effectually removed. It may be useful too to destroy worms, which so often infest fruit trees, without injuring the trees themselves; and to remove skippers from bacon without affecting the meat. In fine, in those numerous essential family operations, which, while they contribute to neatness, health and comfort, are so often full of trouble and vexation to the matron and to all about her, it is almost an invaluable auxiliary, and when it shall be introduced into general use I have no doubt it will rank among the most valuable and indispensable articles of housewifery. It is capable likewise of being employed in many cooking operations to great advantage. It will, for example, boil eggs or potatoes with great ease and in a most excellent manner.

**Building a Court House,**

IN THE TOWN OF GREENVILLE,

The plan of which to be as follows:  
The Building to be of brick, 52 feet long by 40 wide, two stories high, fire-proof. The foundation of the walls to be based on clay, and the walls as thick as usual for buildings of similar size and description, and to be anchored.  
The first story to be 10, and the second story 13 feet pitch, and the first floor 2 1/2 feet above the surface.

The roof to be quadragon and covered either with zinc, tin, or slate. Applicant's to state the terms for each.

The lower story to contain in the sides and ends 16 windows, and the upper story 18 windows; each to contain 18 panes glass 10 by 12.

Two doors in the lower story with a passage to run across the width, embracing one-third the length of the building; with two rooms on one side, and two rooms and a stair case on the other. The upper story to contain the Court room and in one end two Jury rooms.

All the partitions to be of brick and to be based like the exterior walls. Four chimneys to be attached at proper places with four fire places below. The sills and caps of doors and windows to be of stone. The windows to have ketches and bolts, with shutters closing on the out side. The style and finish of the Court room is reserved for future and special contract.

The foregoing is a general plan of the building which will be adhered to, but the Commissioners may see cause to alter or modify it in some of the particulars before closing the contract. If desired by the Contractor, half the amount of the contract price and perhaps more, will be paid in advance, and the balance in one year.
