.If you want to hinder the progress of your town here is a good rule to go by: Refuse to take your town paper. Never send it an item of news, never speak a good word for the paper, but predict its failure and say all you can against ita Be very sure you do not advertise in its columns. Urge your friends to subscribe for other papers, but never ask them to take your town paper. Have all your printing done in some other town, Get mad with the editor every time he fails to put your name in the paper when you leave town. Give the editor a "cussin" every time he prints an article that does not harmonize with being at the head of this moveyour views. Follow these instructions faithfully, and you will be sure to make your town move backward,-Exchange.

The school question is now an all important one, and we urge every citizen of our town to consider carefully its future prospects.

The article in the issue, written by Mr. Geo. W. Newell, gives the facts in the case as they are. Section 1

After reading the article, and carefully considering every point in connection with it, ask yourself this question: Can I as a citizen of Williamston, when its educational advantages are about to be destroyed, there is no ground for comparison, afford to stand idle by and not who was ten miles away from the use my influence, and money battle of Santiago, when it begun, if need be, to save it? What is a town, or any community without a school? We leave these questions for you to answer.

WASHINGTON LETTER.

(From our regular Correspondent.)

May 27, 1901. Does the President wish Congress to declare the Clayton-Bulwer treaty abrogated? A decidedly interesting story that is being told in political circles, says be does but that he does not care to c penly support a movement in that direction. It had been generally understood that the President and Sec. retary Hay wished Congress to let the Clayton-Bulwer treaty alone, believing it more desirable to ne gotiate a new treaty with Great Britain that would supplant it. That was certainly their attitude when Congress was in session, and when it was proposed to push a resolution declaring the Clayton-Bulwer treaty abrogated, and it was administration influence that prevented the matter being scriously taken up in the Senate. The story referred to above says that a number of prominent republican Senators have arrived at the conclusion that the best way and the quickest way to let the world know that we intend to make that Isthmian Canul American all the way through, is to obrogate the Clayton-Bulwer treety, and that a resolution so declaring, will be offered in the Senate as soon as Congress assembles, and that its adoption is

practically assured, as it will not

be opposed by the administration.

The anti-Sampsonites do not admit the justice of the precedent. They say of Manila Bay.
