SOME ENTERTAINING SOAP-BUBBLE TRICKS

'Any one can perform these soap-bubble tricks' by the exercise of a little care," writes Meredith Nugent, in The Ladies' Home Journal for July. To make a bubble rest upon a flower dip a dahlia or other stiff petaled flower into the solution and then with a pipe or funnel blow a bubble upon the top of it.

To make bubbles and noise, dip the end of an ordinary tin fish horn well into the solution and blow gently until quite a large bubble has been formed. Then four or five loud blasts may be sounded on the horn without injuring the bubble in the least.

To make six bubbles inside of one another, dip the end of a straw in the soapy water and after resting the wet end upon an inverted plate or sheet of glass, which should have been previously wet with the solution, blow a bubble about six inches in diameter. Then dip the straw well into the solution again thrust it through the centre of this first bubble and blow another. Continue in this manner until the bubbles have all been placed.

JAMESVILLE.

P. H. Brown left for Norfolk Monday.

The people of Jamesville wish the Enterprise much success.

The weather is quite warm and dry. The crops are needing rain very badly.

J. F. Hardison is one of Jamesville's most noted sports when he doesn't forget to tie his shoes.

She—Those two people in the far corner appear to be happy, are they married?

He—yes,—but not to each other.

It is said that the white and colored base ball teams of Plymouth N. C., have been playing together. One of the colored players had on red pants; I suppose that is why it was so hot.

The Disciples of Christ met at Poplar Chapel Saturday and Sunday to have a union. Not long after the Sun had risen above the horizon the people began coming from every direction, until the crowd was more than 1800 people on Sunday. Although the weather was very warm. Every one seemed to enjoy themselves well.

A. CHANCE FOR A FACTORY.

Chicago, June 15th, 1901.

Williamston Enterprise, Williamston, N. C.

Gentlemen: I would establish a factory in or near your city for the purpose of using such raw material as is found in sufficient quantities, and provided the product of the factory can find a sure and profitable market.

I prefer a veneer factory for the manufacturer of fruit and vegetable boxes, but would not let this preference stand in the way of a better inducement if local conditions demand another enterprise.

If the raw material and market is satisfactory to me and I agree to employ a given number of hands what will your city do toward taking stock or giving financial aid in such an enterprise?

I will prove to your entire satisfaction my ability to carry along the enterprise upon condition that your proposition to me is equally satisfactory.

I would like that you bring this matter before your mayor and such of your citizens who are most interested in the growth and progress of your city and neighborhood. The aim of said enterprise is to be for the benefit of city as well as the individuals directly interested.

I am willing to come to your city for a committee conference when something definite can be assured me as I am deeply in earnest in this matter.

Am considering some good offers now but prefer to look over all the field before deciding.

Thanking you in advance for such action as you will take and awaiting an early reply, I remain, Yours very truly,

What shall we do with this opportunity?

Can't the business men of Williamston get together and secure some such enterprise?

We would like to hear from every business man in town on this subject. Editor.
