

**DO YOU GET UP WITH A LAME BACK?**

**Kidney Trouble Makes You Miserable.**

Almost everybody who reads the newspapers is sure to know of the wonderful cures made by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder remedy.

It is the great medical triumph of the nineteenth century, discovered after years of scientific research by Dr. Kilmer, the eminent kidney and bladder specialist, and is wonderfully successful in promptly curing lame back, kidney, bladder, uric acid troubles and Bright's Disease, which is the worst form of kidney trouble.

Dr. Kilmer's Swamp-Root is not recommended for anything but if you have kidney, liver or bladder trouble it will be found just the remedy you need. It has been tested in so many ways, in hospital work, in private practice, among the helpless poor to purchase relief and has proved so successful in every case that a special arrangement has been made by which all readers of this paper who have not already tried it, may have a sample bottle sent free by mail, also a booklet telling more about Swamp-Root and how to find out if you have kidney or bladder trouble. When writing mention reading this generous offer in this paper and send your address to Dr. Kilmer & Co., Binghamton, N. Y. The regular fifty cent and Home of Swamp-Root dollar sizes are sold by all good druggists.

Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

**WHISKY STORED IN GERMANY.**

**Distillers Find It Cheaper Than Paying Taxes in This Country.**

It is not generally known that Louisville distillers and warehouse men own warehouses in Germany in which considerably more than a million gallons of Kentucky whisky is stored and will some time be returned to this state, says the Louisville Herald.

The reason for storing whisky in Germany is to save money, although there may be the contributing reason of securing a sea flavor. The national law formerly provided that whisky must be taken out of bond inside of three years, and the tax of \$1.10 a gallon must be paid on it when taken out. It also provided that if whisky is exported such tax would not have to be paid on it at the time of the taking it out, and, further, that it might be re-imported upon payment of \$1.10 a gallon. The duty on imported whisky which is not made in America is \$2.25.

Many distillers and warehousemen found it cheaper to export the whisky and import it later than to borrow the money for internal revenue taxes. An enormous quantity of whisky was then sent abroad, and, as Germany is the only country which will admit it without payment of a duty it was sent there. Both Mexico and Canada impose a heavy duty. The distillers figured that the cost of transportation both ways was cheaper than the interest on the money with which they would have to pay taxes at the time. They could keep the whisky stored in Germany many years, or as long as they wanted to, and bring it back in small quantities, so they were not put to the embarrassment of borrowing very large amounts of money for taxes. Congress has since passed a law allowing whisky to remain in government warehouses eight years before the internal revenue taxes are paid.

**Educating Children's Memory.**

As children, part of the Jay's education is learning to notice. A tray with a dozen things on it is given to the child for a few minutes, when it is taken away from him and he is required to repeat from memory the name of everything that was on the tray. Gradually the numbers of things are increased, and the time he is allowed to look at them decreased, until noticing becomes a habit, and in a single, cursory glance catches up the main idea and details in an almost magical way. One mother, who heard of the method, was so struck by its simplicity and by the value of quick observing that she tried the experiments with her own children—not with trays and objects, but in their walks. She found that the children develop splendid memories as well.

**Odd Form of Coal.**

One of Colorado's greatest discoveries in the form of innovation in coal is interesting experts and scientists in that state, where a deposit four and a half feet in thickness has been prospected for two miles in extent and has yielded coal in the strikingly peculiar form of little cubes and hexagon-shaped columns. It separates easily, the seams give off little dirt or dust, it burns with a blue flame, retains heat a long time and makes little ash.

It breaks to a small nut size and is considered suitable for hard coal burners and grates. Many regard the new coal as one of the most valuable finds in this almost unknown empire of riches.

**The Oath in Siam.**

The formula of the oath of office in Siam is long and complicated. It is also very violent. For example, here is such a form of it as high functionaries go through in swearing solemn fealty to their sovereign:

"May the blood drop from my body; may my head break in two; may the crocodiles devour me; may I be compelled to carry water in wicker baskets to quench the flames of hell; may I suffer the most horrible tortures until my years are as many as the grains of sand by the sea if I violate this, my solemn oath."

**King Christian's Palace.**

Fredensborg, where year by year King Christian's descendants gather in patriarchal fashion, is about two hours' distance by rail from the capital. The palace contains about 400 apartments, including a vast-domed hall where dinner is served every evening, and the various suites of rooms devoted to the use of King Christian's sons and daughters when returning for a space to Fredensborg, says Woman's Life.

It is said that one of the simplest is that occupied by Queen Alexandra, whose little possessions are treasured most carefully. Fredensborg has many memories of the late Queen Louise.

**Buccaneer's Fish.**

The blue buccaneers are among the most voracious of all fish. Swift, strong, armed with efficient teeth, they possess unlimited appetites and they know not the meaning of mercy or fear. Most destructive of all our sea fish, they rival the worst of the carnivorous species of South American waters. They are the wolves of the sea, and very frequently they destroy for what appears to be a mere love of butchery. They move in large schools and they never hesitate to attack fish of almost twice their own size.

**Observing Yukon Day.**

What St. George's Day is to Britain, what Dominion Day is to Canada and what Independence Day is to the American republic, is August 16 to the Yukon. It was on that day nine years ago that Skookum Jim washed out his famous pan on Rabbit Creek, whose result was the bringing of thousands of people to the country and enriching the world by \$120,000,000 in gold.—Yukon World.

Now is the time to guard the health and strength of lungs. The best remedy to use for coughs and colds is Bee's Laxative Honey and Tar. The only cough syrup that does not constipate the bowels, but which on the other hand, expels all cold from the system by acting as a pleasant laxative. Best for coughs, colds, croup, whooping cough, etc. Sold by S. R. Biggs.

**FOOD VALUE OF BANANAS.**

**Dietitians Find It Cheaper Than Paying Taxes in This Country.**

Professors of dietetics tell us that the banana is not, as many fruits are, a flavor and nothing more, but a food and a source of real nutrition. It is at once useful and delicious. It not only gratifies the palate, but supplies material for combustion and the maintenance of animal heat, while it also builds up the muscles and repairs the worn and threadbare nerves.

The flour made from it in its dried state is equal in nutritive value to rice, and how invigorating and sustaining rice is has been demonstrated in the recent achievements of the Japanese. Dried and sprinkled with sugar, a form in which it has been recently introduced in this country, the upstart banana is, weight for weight, as nutritious as the venerable fig.

It is in the fresh state that the banana chiefly appeals to us. Its creamy succulence and delicate odor are inviting, and its pleasant savor is a prelude to good digestion. Dependent as that savor is in ethereal body, which the coal tar investigators have not yet been able to imitate by chemical essence, it is a subtle stimulus to all subsequent elementary processes. And thus it is that the banana is an eminently digestible food. No sense of oppression or drowsiness follows a meal of it, and a meal of it may be bulky enough.—Fall Mail Gazette.

**Queer Case of Graft.**

The Russian press has been full of accounts of a mysterious discovery of gold on one of the trains arriving at Samara. Three large cases, supposed to contain Red Cross medical supplies, were found to be stuffed with gold and paper money to the amount of 1,500,000 roubles, which had apparently been shipped from the front. The gendarmier took the matter in hand. An investigation was ordered promptly and was promptly suppressed, apparently by high authority.

The Nowost, commenting on the incident, remarks: "That robbery of state property goes on in the far east we knew long ago. That it also exists in the west, south and north as well as in the center, we also had reason to believe; but the case under notice is interesting, because upon the first count the money amounted to a million roubles, but upon being counted by the police it amounted to about 900,000.

"Being then placed under 'control,' it had, of course, to be counted again, when it was found to be about 640,000 roubles. The arithmetic of the various departments the money passed through varied so considerably that the sum presently dwindled to 600,000 roubles. The higher authorities, having now stepped in, it is to be presumed that further countings will take place, and by the time the wealth reaches the consignee it is hardly likely to amount to double figures." Such is graft in the czar's dominions.

**Mushrooms in Bricks.**

The work of the plant bureau is in character almost infinitely varied. Take for example the successful experiments recently made in the growing of improved varieties of mushrooms. If you will visit the town of Columbia, Mo., you will find there a great establishment with surroundings which suggest a brickyard in full operation. It is, in fact, a brick factory, but the bricks which are stacked in huge piles out of doors, are not of clay, but of mushroom spawn—spawn, that is to say, of a superior quality, guaranteed to produce much finer mushrooms than those hitherto purchasable in the market.

The industry is the outcome of a discovery, made by one of the plant bureau's experts, that it was practicable to introduce small bits of mushrooms into bottles of sterilized manure, and, when the thread-like vegetation of the fungus had run all through the manure, to use the latter for the seeding of mushroom beds. Inasmuch as only the largest and finest mushrooms are chosen for the purpose, the spawn obtained is of a superior variety and yields mushrooms of corresponding quality. By mixing it with heaps of compost the latter is soon converted into spawn of like high grade, which, made into bricks, finds a ready market at a very remunerative price.—Outing Magazine.

**Blasting with Acetylene.**

A new process for using calcium carbide in blasting is described by Guedras in the Comptes Rendus. A sheet iron cylinder is used as a cartridge. It has three separate compartments—one containing calcium carbide, another water, and the third only air and an electric fuse. The cartridge is placed in the drill hole, the latter closed by a wooden plug, and the water in the cartridge then allowed, by a special device, to flow into the carbide compartment. After about five minutes, during which time the cartridge has become filled with a mixture of acetylene and air under high pressure, the electric fuse is ignited by a current, and a violent explosion results.

**A Japanese Lighting Plant.**

The Osaka Electric Light Co. of Osaka, Japan, a city of 800,000 people, is equipped entirely with American electrical apparatus, including six turbines, also made in Schenectady, N. Y. This company has paid up capital of \$1,200,000 and is so progressive that it is on a par with some of the best American electric lighting companies.

**Wood for Pencils.**

The amount of wood which is used every year for the manufacture of pencils is almost incredible. Nearly 4,000 acres of cedar trees are cut down annually for this purpose alone, and of 2,000 acres are in Florida. In Bavaria alone there are some forty pencil mills.

It is a sin to suffer with backache and pains over the kidneys, when a single dose of Pine-ules will give relief in one night. Suffering women should heed these warnings ere it is too late. Female troubles may result. Pine-ules will strengthen the kidneys and bladder, cleanse the blood and relieve the aches and pains of Neuralgia and Rheumatism. Sold by S. R. Biggs.

**"THERE'S A CURE FOR RHEUMATISM!"**

Not the mere temporary relief that the old "remedies" gave, not the little help that the doctor's prescriptions give; but **ABSOLUTE AND COMPLETE CURE.** That is what Rheumacide does. Rheumatism is caused by an excess of uric acid in the blood. It is an internal disease and requires a strong and vigorous internal remedy that will cleanse the blood of all its germs and yet act through such natural methods that it builds up the entire system.

**SWEEPS ALL POISONS OUT OF THE BLOOD.**

*Rheumacide*  
GETS AT THE JOINTS FROM THE INSIDE

**CURES TO STAY CURED.**

Different from any other remedy. The result of the latest scientific discoveries. At the same time it cures Rheumatism it sweeps out of the blood the germs of all other blood diseases, and cures Indigestion, Constipation, Catarrh, Kidney and Liver Troubles, La Grippe and Contagious Blood Poisons.

CURED AFTER 16 YEARS.

Baltimore, Dec. 10th.  
For 16 years I have suffered terribly with Rheumatism. I was treated by leading physicians but got no relief. Long since I despaired of ever being well again. But hearing of RHEUMACIDE, I decided to give it a trial. I have taken two bottles, and, thanks to this wonderful medicine, I now feel that I have gotten a "new lease on life." Every vestige of the disease has been driven from my system.  
MRS. LAURA D. GARDNER,  
1301 James St., Baltimore.

**LA GRIPPE—PNEUMONIA**

So many people who have apparently recovered from an attack of La Grippe are stricken with Pneumonia. This is due to the fact that the Bronchial Tubes and Lungs are left weakened and unable to resist disease.

**FOLEY'S HONEY AND TAR**

not only cures La Grippe Coughs, and prevents Pneumonia, but strengthens the Lungs so they will not be susceptible to the development of serious lung troubles. Do not take chances with some unknown preparation that may contain some harmful drug when FOLEY'S HONEY AND TAR costs you no more and is safe and sure. Contains no opiates.

I had a bad case of La Grippe about ten years ago which left my Lungs so weak that I have been troubled more or less every winter since until I used FOLEY'S HONEY AND TAR, which cured me completely and my Lungs no longer trouble me.—J. H. BROWNING, D.D.S., Orrick, Mo.

G. VACHER, 157 Osgood St., Chicago, says: "My wife had a very severe case of La Grippe, and it left her with a very bad cough. She tried a bottle of FOLEY'S HONEY AND TAR and it gave immediate relief."

Three sizes—25c, 50c, \$1.00. The 50-cent size contains two and one half times as much as the small size and the \$1.00 bottle almost six times as much. Refuse Substitutes.

**SOLD AND RECOMMENDED BY S. R. Biggs, Williamston, N. C.**
