Apparently Secretary Taft regards that 25,000 mile run as just a warming up heart.

According to the News & Observer of the 26 it looks like Drewry and Crater are both in a hole.

The News & Observer is red in the face and the Raleigh Times is black, over the railway rate case. Wonder how it will end?

We beg to acknowledge receipt of and invitation to attend the Central Carolina Fair Association Greensboro, North Carolina, October 15-18, 1907.

The language used by one of the papers at the capital would, ordinarily speaking, in some towns that can be mentioned, be the announcement of a funeral.

Congratulation

EDITOR ENTERPRISE,
WILLIAMSTON, N. C.Dear Sir:
I wish to congratulate The Enterprise upon its eight years career which closed with the last issue.

I now have the first copy that ever went through the press, when it was started by Mr. Dail, and have watched its career with much interest. Tho it has had some ups and downs, yet it is and has been a great factor for good in the community. It has always stood for and boldly advocated the things that were best for the community and has served as a great educator for our people.

The county news paper generally does not receive the proper support from the people that it deserves. Its worth is unestimated and the public expect the benefit of its good influence without lending either their moral or financial support.

Your success has been such, however, that I would infer that you have strong backing from your countymen, you should have, out of the four thousand families in the county, not less than 2000, paid up subscribers; to say nothing about the complimentary.

I confidently believe that with the steady growth of the paper that you will ere long have to increase its size to an eight page paper.

I hope that the paper will long continue its good work for the moral and material good of our people.

Respectfully,
A SUBSCRIBER.

There are a great many people who have slight attacks of indigestion and dyspepsia nearly all the time. Their food may satisfy the appetite but it fails to nourish the body simply because the stomach is not fit condition to do the work it is supposed to do. It can't digest the food you eat. The stomach should be given help. You ought take something that will do the work your stomach can't do. Kodol For Indigestion and Dyspepsia, a combination of natural digestants and vegetable acids, digests the food itself and gives strength and health to the stomach. Pleasant to take. Sold by S. R. Biggs.

MR. EDITOR:

In my travels over the State, I always find great pleasure in visiting shops and factories. There is ever a fascination in taking mental notes of the industrial progress in the places visited. Coming into your town after an absence of five years, I found much to interest me. Being especially fond of the products of mechanical labor. I spent a part of one day in the factory of the Martin County Buggy Company. I found as complete a shop as is generally seen in the large manufacturing towns. Skilled workmen were in charge of every department, and the manager, Mr. J. Z. Gardner, is well known as a man of wide experience in the building of high grade vehicles. I learned the names of the stockholders, and they are among the soundest business men of the town, they have confidence and money in the enterprise, and will push it to success. The display of vehicles is an attractive one, and the out-

put is large, considering the fact that the factory has existed only a few months. They combine durability with beauty of finish and design. Each job turned out is guaranteed to be of the best material and workmanship. The factory is a valuable addition to the industrial progress of the County, and there should be no need for foreign vehicles. I found that purchases could be made on easy terms, and that prices were low considering the quality. It is with pleasure and satisfaction that I commend the work to lovers of an attractive and up-to-date vehicle.

Great Crowd Coming

That the attendance to the fair will eclipse all such previous occasions there is every reason to believe. Many people have planned to make one trip answer for both the State Fair and the Jamestown Exposition, stopping off at Richmond either going to or coming from the exposition. The double attraction of such a trip is evident, and will appeal to many who otherwise would possibly not make the trip specially to attend the fair.

A Humane Appeal

A humane citizen of Richmond, Ind., Mr. U. D. Williams, 107 West Main St., says: "I appeal to all persons with weak lungs to take Dr. King's New Discovery, the only remedy that has helped me and fully comes up to the proprietor's recommendation." It saves more lives than all other throat and lung remedies put together. Used as a cough and cold cure the world over. Cures asthma, bronchitis, croup, whooping cough, quinsy, hoarseness, and phthisis, stops hemorrhages of the lungs and builds them up. Guaranteed at S. R. Biggs drug store, 50c and \$1.00. Trial bottle free.

Wigs and Thin Skulls.

The curious thinness of some skulls of Egyptian mummies of the fourth to the nineteenth dynasty has been studied by Dr. G. Elliot Smith, professor of anatomy at Cairo, and he suggests that the cause may have been the wearing of heavy wigs. It occurs in both male and female skulls. It is found only in mummies of wealthy people, and the upper classes of the period to which the phenomenon belongs are known to have followed the fashion of wearing enormous wigs. Intermittent pressure, such as that of the water jars carried by modern fashionable women, does not seem to affect the blood supply sufficiently to cause the bone atrophy. St. Louis Post-Dispatch.

Latitude and Longitude.

The lines seen on maps and globes called degrees of latitude and meridian of longitude serve the very important purpose of fixing the position of places and things and the reckoning of distances north, south, east or west from a given point. Latitude measures distance north or south; longitude measures distance east or west, and between the two the exact position of a country, city or ship can be definitely determined. The base of calculation, north or south, is the equator; that of the distance east or west is Greenwich, England. A line joining the poles and passing through Greenwich is called the prime meridian, from which distance east or west is calculated.

The Bishop Cornered. The quick witted son of a farmer was in the habit of delivering butter and eggs regularly every morning at the summer residence of a prominent bishop. The latter, who delighted in an early morning walk in his garden, became interested in the boy and enjoyed quizzing him.

"Good morning, my lad," said he, "I will give you an orange if you will tell me where God is."

"Thank you, sir," replied the boy; "I'll give you two oranges if you'll tell me where he is not."—Exchange.

Not a drop of Alcohol

Doctors prescribe very little, if any, alcohol these days. They prefer strong tonics and alteratives. This is all in keeping with modern medical science. It explains why Ayer's Sarsaparilla is now made entirely free from alcohol. Ask your doctor. Follow his advice.

We publish our formulae. We buy alcohol from our medicines. We urge you to consult your doctor.

Unless there is daily action of the bowels, poisonous products are absorbed, causing headache, biliousness, nausea, dyspepsia. We wish you would ask your doctor about correcting your constipation by taking laxative doses of Ayer's Pills. Made by the J. C. Ayer Co., Lowell, Mass.
