POULTRY

SOME POINTS ON INCUBATOR

Beginner Will Be Greatly Aided in Management of Machine by Observing Rules Given Herewith.

The following points in the management of an incubator may be helpful to the beginner:

Set the machine perfectly level to insure perfect ventilation and efficient working of all the heating apparatus. Do not place the working machine in a north or west room, if possible. A south or east room is preferred.

The incubator should be in a room where there is fire at no time or fire at all times.

In a cold room the eggs must be aired when the temperature is above 60 degrees or chilling will result.

Fresh air and some moisture are necessary for successful incubation, and these are supplied by the ventilated device of every incubator.

Incubator doors should be made of double glass and fit neatly to avoid loss of heat.

A machine of from 50 to 120 egg capacity is about right for the beginner. It is large enough for practical purposes and not so large as to cause confusion.

Avoid excess of temperature and absence of moisture in the room in which the incubator is located.

Fill and trim the lamp daily and use a wick of sufficient width so that a low blaze will produce the necessary heat.

Let one person only attend to the incubator and give it attention at least twice each day.

Keep the lamp burner and bowl free from oil and other foreign matter.

Eggs are overheated at 110 degrees, but it will take ten to twenty-four hours to kill them, according to how near the hatching point they are.

Eggs can be considered chilled when the heat falls to 50 degrees or below. They will still hatch, however, if not kept cold too long—but it always hurts them more or less, and it is best never to let them cool below 70 degrees under any circumstances.

Investigation shows that the sitting hen imparts a temperature to the eggs varying from 110 degrees at the outside of the nest to 105 degrees in the center, the average temperature being 103 degrees, hence 103 degrees is the temperature at which an incubator should be run.

Many of our choicest market fowls, as well as show prize winners, were incubated hatched, which disproves the notion that artificial incubation produces weak chicks.

Turn the eggs daily, yet it is not absolutely necessary to turn them all exactly alike.

The attachment which gives a warning signal when the temperature runs beyond the danger limit is a good device and relieves one of much care.

When the chicks are nearly ready to hatch the inside temperature of the machine will rise and the heating apparatus must be regulated, as less heat is needed than at the beginning of incubation.

Give attention to details, learn the workings of your machine, and don't worry. Let the machine do the work. Let the chicks stay in the incubator without food from twenty-four to forty-eight hours after they are hatched.

PEDESTAL FOR A POLICEMAN

Biggest Baltimore Traffic Officer Says It Keeps His Feet Warm and Dry.

Baltimore, Md.—Anthony J. Timmerman is a 12-year copper and biggest of all the traffic squad, and he doesn't propose to take a chance with grip or pneumonia and deprive Sun Square of the pleasure of seeing him on duty every day, keeping the cars and wagons running straight and clearing the way for timid pedestrians.

And that's why he is the only cop in town who stands on a pedestal. When the bad weather hit Baltimore recently a gang of Italians happened to be working on the pipes at Baltimore and Charles streets, and one of them, noticing Traffic Officer Timmerman standing flat on the cold ground that oozed slush and sleet and

Baltimore Policeman on Pedestal.

snaw, scratched his head in meditation. Then with a hammer and nails and a few boards he knocked together a little platform about two feet square and raised two inches from the ground and handed it over.

"Great!" said Timmerman as he stepped aboard, and ever since, every day, you can see Timmerman standing on his little platform at the corner, secure from dangers that threaten under foot and keeping others from dangers that threaten in traffic.

"It's a fine idea. It keeps the cold out of my feet, and if you'll take a look at my feet you'll see I've got plenty of room to catch any cold that's coming my way."

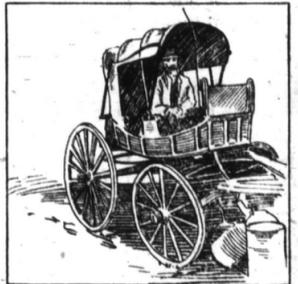

Not a few who have seen Timmerman on his stand have remarked that it wouldn't be a bad idea for the police board to provide stands for all traffic men in bad weather or during the chilly season as a precautionary measure and to keep down drafts on the pension fund.

CARRIAGE IS 150 YEARS OLD

Ohio Farmer Owns Vehicle Which Was Once Considered Finest in the West.

Columbus, O.—Here is a picture of one of the first carriages manufactured in the United States. It is nearly 150 years old and now belongs to a farmer living near Mt. Healthy, in this state. The vehicle was considered the finest rig in the west and the original owner paid \$275 for it. The workmanship is guaranteed strictly hand made and the wood entirely of hickory.

There were only a few pleasure vehicles during the days of the carriage and they were mostly in the form of heavy wagons. Everybody for miles

150-Year-Old-Carriage.

around came to see John Spriggs' fine rig and everybody west of the Allegheny mountains knew John Spriggs was the owner of the finest rig in the country.

One of the famous trips made by the carriage was when the Spriggs family, consisting of John, his wife and two children, started out from Cincinnati for a long trip to Philadelphia in this new carriage. Two horses were hitched to the combination shaft and enough provisions for a month were packed in the little bear-skin covered trunk fastened to the back of the carriage. It took all of two weeks to go from Cincinnati to Philadelphia and ten days to come back. The carriage stood the trip well. It made other trips just as well and is yet a good rig though somewhat out of date. The present owner, pictured seated in it, came into its possession by inheritance, and occasionally takes it out for a run but it is valued mostly now as an heirloom.

SENSATIONAL NEWS

BRYAN AND OGDEN DISCUSS AT PHILADELPHIA THE MODERN NEWSPAPER'S STYLE.

PAPERS HAVE LOST PRESTIGE

The Nebraska Commoner Says Sensational Methods Do Harm—Cites the News Stories of the Movement of Troops to Mexico.

Philadelphia. — William Jennings Bryan and Rollo Ogden, editor of the New York Evening Post, discussed the "influence of the modern newspapers" here at the meeting of the Contemporary club.

Mr. Bryan declared that the modern newspaper has lost much prestige and influence. Among the causes for this loss of influence, he said, was the devotion of too much space to crime and domestic infelicity. Because the public seemed to demand news of this description, he said was no reason that it should be used. A journalist should not sell things that are not good for the public to read.

Another evil, Mr. Bryan declared, is the discussion of public questions from a sensational standpoint. For example he declared the manner in which the present movement of troops is being described in some newspapers. Such discussions is apt to engender a situation which might easily cause an international controversy, he said.

Editorials which do not express the opinion of the writers, but are ordered by the business offices of the papers, are another great evil, declared Mr. Bryan, who said:

"The greatest menace to our country today is the pollution of the editorial and news columns by interests that are practicing grand larceny on the people. Many of our great newspapers are owned by interests which have their hands in the pockets of the people and use the papers to chloroform the readers."

Mr. Bryan advocated the passage of a law which would compel newspapers to publish not only the names of their nominal owners but also the holders of mortgages upon the properties.

Mr. Ogden, who had opened the discussion, said when Mr. Bryan had concluded, "Mr. Bryan has spoken some great truths, but if it can be said that the people have the priests and politicians that they deserve they also have the newspapers they deserve."

COCA COLA CASE IN THE COURT.

Inspector Lynch Found Plant Unsatisfactory to Pure Food and Drug Act. Chattanooga, Tenn.—Coca cola has been undergoing a technical attack at the hands of the Federal department of agriculture, the action being in the Federal court, of which a special session was held by Judge Sanford to try the case.

The case is styled "the United States versus forty barrels and twenty kegs of coca cola." Beyond this, the action against nobody in particular, although the barrels and kegs are being aided and abetted in their defense by the Coca Cola company of Atlanta.

Several witnesses were examined, Inspector Lynch, Dr. Fuller and W. J. Dobbs. The latter testified to having purchased the forty barrels and twenty kegs, from the Coca Cola company of Atlanta, and retailing it in unbroken packages to merchants in Chattanooga. The other testimony was largely technical, with the exception of Inspector Lynch, who told of seizing the goods October 21, 1909, his inspection of the main factory at Atlanta and succeeding developments.

The inspector said he took samples from the seized goods and later inspected the plant. This he found in a condition which, he said, was not satisfactory and in accordance with the pure food and drug act.

Dr. Fuller's testimony was to some extent a corroboration of that of the inspector, as to the chemical analysis of the samples sent to the department of chemistry.

Opposition to "Chief's" Pardon. Atlanta, Ga.—Edgar Stripling, who while serving as chief of police at Danville, Va., under the name of Morris, was rearrested after fourteen years' freedom, on the charge of murder, will not get a pardon from the Georgia pardon board if the widow and relatives of the man he killed can bring sufficient influence to bear. This statement was made by Mrs. G. M. Nelson of Harris county, formerly Mrs. William J. Cornett, widow of Stripling's victim. Hundreds of letters are urging the pardon.

Militia Officers Enthusiastic. Washington.—The enthusiasm of the officers of the militia of the various states and territories over the opportunity offered them by the War department for field experience in the present military operations in the southern border states continues unabated. Gen. Leonard Wood, chief of staff of the army, has received a total of 1,556 acceptances.

According to the present plan, about 200 militia officers will be sent southward at one time. The instruction will last two weeks.

MILD, GENTLE LAXATIVE

FOR WOMEN GIVEN FREE

So many of the ills of women are due to habitual constipation, probably because of their false modesty on the subject, that their attention cannot be too strongly called to the importance of keeping the bowels open. It is always important to do that, regardless of the sex, but it is especially important in women.

From the time the girl begins to menstruate until menstruation ceases she has always vastly better prospects of coming through healthy if she watches her bowel movements. If you find yourself constipated, with bad breath, pimply complexion, headaches, belching gas and other symptoms of indigestion and constipation, take a small dose of Dr. Caldwell's Syrup

Pepsin. It is a woman's favorite laxative. You will find that you can do away with salts, strong cathartics, etc., which are entirely unsuited to woman's requirements.

Mrs. Katherine Haberstroh of McKees Rocks, Pa., and Mrs. A. E. Herrick of Wheeler, Mich., who was almost paralyzed in her stomach and bowels, are now cured by the use of this remedy. A free sample bottle can be obtained by addressing Dr. Caldwell, and after you are convinced of its merits buy it of your druggist at fifty cents and one dollar a bottle. For the free sample address Dr. W. E. Caldwell, 301 Caldwell building, Monticello, Ill.

STONE MOVED BY THE SUN

Immense Mass of Granite in Ohio Cemetery Undergoes Curious Revolutions.

An interesting object is to be seen in a cemetery of Ohio—a large granite stone weighing two tons, in the shape of a ball, which is gradually turning on its axis. During the last five years, so it is said, this ball has turned a fraction over 13 inches.

When the ball was placed in position an unpolished spot six inches in diameter was purposely left in the socket of the pedestal whereon it rested. A little later it was noted with astonishment that this spot was turning upward on the south side of the monument. This curious revolution of the polished ball, to lift which would require a large derrick, is supposed to be due to the sun's action, in the following manner: The solar rays heating one side cause the ball to expand to a certain degree whereas the north side, which rests mostly in the shade, does not expand to the same extent, thus causing the ball gradually to shift its position by turning.

Garfield Tea is Nature's laxative and blood purifier; it overcomes constipation and its many attendant ailments.

It's easy for a pretty young widow to make a man think he wants to marry her.

WOULD LIE AWAKE ALL NIGHT WITH ITCHING ECZEMA

"Ever since I can remember I was a terrible sufferer of eczema and other irritating skin diseases. I would lie awake all night, and my suffering was intolerable. A scaly humor settled on my back, and being but a child, I naturally scratched it. It was a burning, itching sensation, and utterly intolerable, in fact, it was so that I could not possibly forget about it. It did not take long before it spread to my shoulders and arms, and I was almost covered with a mass of raw flesh on account of my scratching it. I was in such a condition that my hands were tied.

"A number of physicians were called, but it seemed beyond their medical power and knowledge to cure me. Having tried numerous treatments without deriving any benefit from them, I had given myself up to the mercy of my dreadful malady, but I thought I would take the Cuticura treatment as a last resort. Words cannot express my gratitude to the one who created 'The Cuticura Miracles,' as I have named them, for now I feel as if I never suffered from even a pimple. My disease was routed by Cuticura Soap and Ointment, and I shall never cease praising the wonderful merits they contain. I will never be without them, in fact, I can almost dare any skin diseases to attack me so long as I have Cuticura Remedies in the house. I hope that this letter will give other sufferers an idea of how I suffered, and also hope that they will not pass the 'Cuticura Life Saving Station.'" (Signed) C. Louis Green, 929 Chestnut St., Philadelphia, Pa., Aug. 29, 1910.

And the man who is driven to drink by adversity probably would have it brought to him by prosperity.

Constipation causes and aggravates many serious diseases. It is thoroughly cured by Dr. Pierce's Pleasant Pellets. The favorite family laxative.

A woman's club sometimes reminds a man of a hammer.

A Ruling Passion. "Uncle Pinchpenny spent a great deal of time at the home of George Washington."

"Yes. He couldn't be persuaded to stop looking for that dollar George is said to have thrown across the Potomac."

Important to Mothers. Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of *Wm. D. Druggist*.

In Use For Over 30 Years. The Kind You Have Always Bought.

It's an easy matter for a married man to keep posted on what's going on in his home neighborhood.

Garfield Tea is Nature's laxative and blood purifier; it overcomes constipation and its many attendant ailments.

It's easy for a pretty young widow to make a man think he wants to marry her.

PIMPLES

"I tried all kinds of blood remedies which failed to do me any good, but I have found the right thing at last. My face was full of pimples and black-heads. After taking Cascarets they all left. I am continuing the use of them and recommending them to my friends. I feel fine when I rise in the morning. Hope to have a chance to recommend Cascarets." Fred C. Witten, 76 Elm St., Newark, N. J.

Pleasant, Palatable, Potent, Taste Good. Do Good. Never Sickens, Weakens or Grips. 10c, 25c. Never sold in bulk. The genuine tablet stamped C. C. Guaranteed cure or your money back.

CURED A BAD SPAVIN.

Mr. D. H. Ivey, Marion, N. C., writes: "My horse had a very bad case of spavin and nothing did any good until I tried your Mexican Mustang Liniment. I rubbed the spavin frequently and plentifully with the liniment and soon saw an improvement. In this treatment I poured my pain full of liniment and then rubbed it on the spavin until nearly dry. I did this three or four times a day and my horse was completely cured. It is sure to cure if properly used."

A spavin is a serious ailment and needs a powerful remedy. The above letter proves Mexican Mustang Liniment cures even bad cases and does it thoroughly, too.

Cardui Worked Wonders

"I had sick headache," writes Mrs. Margaret L. Pheral, of Newburg, Ind., "continuous hurting in my side; was always tired, and, every month, had such pains I could hardly stand. I was treated by the best doctors in our town, for more than a year, without any help.

At last, I took Cardui, and it worked wonders. Before I had taken one bottle, I felt better. Now, I feel better than in two years, and owe it all to Cardui."

When a woman's nervous and physical systems are tired out—worn out—they need something more than food to refresh them.

TAKE CARDUI

The Woman's Tonic

It acts as Nature planned that a tonic should act, in helping along the functions of life, when ordinary methods fail. Cardui is a natural remedy, and one that you can feel confidence in. Its ingredients are mild, medicinal herbs, which act specifically on the womanly constitution.

Besides, Cardui has a record of more than fifty years' success, in the treatment of womanly ailments and weaknesses. During this time, more than a million women have been benefited. Try what it will do for you!
