

## MEMORY BAD MIND GOING

But Mrs. Perry of Rolla, Built Up Her Shattered Nervous System By Taking Cardui.

Rolla, Tenn.—"I suffered with sick headache for three years," says Mrs. Lizzie Perry, in a letter from this place. "I was so nervous at times, I could hardly bear it.

I had the blues, and everybody thought I was losing my mind. My memory was bad. I had pains in my side, and I was hardly able to go.

I would have been in my grave if I had not taken Cardui. Now I am stronger than I ever was before, and I feel like a new person.

I am thankful for what Cardui has done for me. I wish all women who suffer would take Cardui, and be happy and healthy."

Cardui's success in benefiting and curing sick and ailing women, is due to the fact that it is a building tonic for the nerves, as well as for the physical system.

Being composed exclusively of vegetable ingredients, which act gently and sympathetically in a natural way, it does its work safely, reliably, and without bad after effects.

Fifty years of success prove these facts.

Isn't it reasonable to believe that Cardui will help you? Ask your druggist.

It is certainly worth trying.

N. B.—Write to Ladies' Advisory Dept., Chattanooga Medicine Co., Chattanooga, Tenn., for Special Instructions, and 64 page book, "Home Treatment for Women," sent in plain wrapper, on request.

Rotten Cigarette Paper.

Much cigarette paper is made from waste untanned hemp rope.

For HEADACHE—Micks' CAPUDINE Whether from Grief, Heat, Stomach or Nervous Troubles, Capudine will relieve you. It's liquid—pleasant to take—acts immediately. Try it. 10c, 25c, and 50 cents at drug stores.

Nothing under the sun has done more to help the fool killer earn his salary than inordinate self-concern.

Dr. Pierce's Pleasant Pellets first put up 40 years ago. They regulate and invigorate, stomach, liver and bowels. Sugar-coated tiny granules.

Life is a stage play; it matters not how long we act, so long as we act well.—Bacon.

PILES CURED IN 4 TO 14 DAYS Your druggist will refund money if PAIN OINTMENT fails to cure any case of Itching, Bleeding or Protruding Piles in 6 to 14 days. 50c.

There never was a good war or a bad peace.—Franklin.

Taking Garfield Tea keeps the system clean, the blood pure and the general health good. Buy from your druggist.

Even a little trial is a big one if you have no others.

## WOMAN ESCAPES OPERATION

Was Cured by Lydia E. Pinkham's Vegetable Compound

Elwood, Ind.—"Your remedies have cured me and I have only taken six bottles of Lydia E. Pinkham's Vegetable Compound."

I was sick three months and could not walk. I suffered all the time. The doctors said I could not get well without an operation, for I could hardly stand the pains in my sides, especially my right one, and down my right leg. I began to feel better when I had taken only one bottle of Compound, but kept on as I was afraid to stop too soon."—Mrs. SADIE MULLEN, 2728 N. B. St., Elwood, Ind.

Why will women take chances with an operation or drag out a sickly, half-hearted existence, missing three-fourths of the joy of living, when they can find health in Lydia E. Pinkham's Vegetable Compound?

For thirty years it has been the standard remedy for female ills, and has cured thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, indigestion, and nervous prostration.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Mrs. Pinkham at Lynn, Mass., for advice. Your letter will be absolutely confidential, and the advice free.

KIDNEY TROUBLE Is a deceptive disease—thousands have it and don't know it. If you want good results you can make no mistake by using Dr. Kilmor's Swamp-Root, the great kidney remedy. At druggists in fifty-cent and dollar sizes. Sample bottle by mail free, also pamphlet telling you how to find out if you have kidney trouble.

Address, Dr. Kilmor & Co., Birmingham, N. Y.

TAKE A DOSE OF PISO'S THE BEST MEDICINE FOR COUGHS & COLDS

## Is Your DOG GOING MAD?

BY ARNO DOSCH

COPYRIGHT BY PEARSON PUB. CO.

NO ONE can tell when a dog is going mad and prevent him from doing harm. The symptoms develop over a period of from three to eight days before the biting mania seizes him. Meanwhile he gives a hundred warnings. All that is necessary is to chain him.

That this piece of information has not been given publicity before, except in the case of a few New England towns, is due to the general lack of caution, but, with the alarming increase of rabies both in animals and men, it has become essential. Too many dogs are going mad every day. Something will have to be done about it. The disease is now so prevalent that it is pertinent to ask:

Is your dog going mad too? This question may strike you as unnecessarily alarming, especially if you happen to live where there have never been any mad dogs. In that case you are to be congratulated. Places with such a record are becoming rare. Your turn may be next.

Left to spread as far as it might, with practically no attempt to stop it, rabies during the past few years has become thickly disseminated over the whole of the United States, except the far West. Along the Atlantic coast and in the middle West, both North and South, there is hardly a district unaffected by it, and each additional dog that goes mad is carrying it as far as he can travel in two or three days' time. It has arrived at the point where it threatens everyone, and, if it were not for the twenty-five or more institutions which are now giving the Pasteur treatment in the affected districts, the number of human deaths would be startling.

Three years ago rabies began to press itself upon public attention. Up to that time it had never appeared as much of a danger in America, although mad dogs had shown themselves at intervals for more than a century. Each in itself had always been a terrifying object, but the numbers were comparatively scarce.

Conservative estimates of the medical men and boards of health place the number of deaths annually from this dread disease at 20,000. The question of what to do is also before this country. Two courses are open: policing and a study of the disease which may lead to its prevention.

Effective policing has always meant a rigid muzzle and leash law and the chloroforming of all stray dogs. But it has been proved to be successful. After centuries of terror over rabid animals, England, since 1897, has succeeded by this means in remaining rid of them entirely, and only a few months ago when some of the virus was needed in a research laboratory in Liverpool it had to be obtained outside the country. Berlin has practically eradicated the disease within the city following an epidemic during which a dog went mad on the streets every day. Paris, overcoming a sentimental opposition, reduced the mad dogs from 560 during the year 1901 to 10 in 1907, simply by compelling owners to look after their pets.

Attempts to stop the disease in this country have been spasmodic and hysterical. It has required the death of some well-known person or some unusual circumstance to awaken the police.

There are three types of rabies: furious, which we recognize; dumb, which we do not; and a mixture of the two. The furious is the most important.

The first action on the part of a dog which points to furious rabies is a marked and unusual restlessness. He jumps up constantly without cause and is hypersensitive to light and sound. He snoops in dark corners and licks everything nervously. He becomes offensive in his affection, and his master, wondering, feels that there is trouble, and asks the poor dumb brute what ails him.

Then, all at once, his disposition changes. He snaps suddenly, and the next instant wags his tail in apology for his action. In a moment he snaps again. Meanwhile he eats and drinks normally and shows no sign of paralysis, which we have been taught to look for when rabies is suspected.

The restlessness increases in a way that can hardly fall of notice, and then a night comes when he gives little gasping howls, which sound as if they had been choked off in the middle. Anyone who has ever heard this howl knows instinctively that there is something wrong. There is no confusing it with the ordinary barking at passing or imaginary objects, and it sounds nothing at all like baying at the moon. The howls are senseless and the hearer realizes it.

At first the dog remains near the house, giving his master ample time to take action. In fact he forces the attention of everyone within hearing and spreads a vague uneasiness. His howls get on the nerves of those within doors and they are rather apt to call out to him to be still. Some comment is probably made on the peculiar effect his howling has. A timid member of the household suggests that the dog is going mad, but the idea is scouted.

When this has gone on half the night, and the family is distraught for lack of sleep, the howls begin to grow fainter and the family falls into a peaceful sleep. But the dog has gone away to menace the surrounding country for fifty or a hundred miles. He wanders aimlessly, the disease gripping him tighter hour by hour, and

when the morning comes, he is foaming at the mouth—a mad dog. The biting mania is on him, and he attacks everything, cattle, horses, dogs, cats, children. Fortunately the only other animal which gets the biting mania is the horse. The disease is spread in almost every case by dogs.

After two or three days, if he has not meanwhile been shot, he comes back, but, by this time, he has done his damage. He is weak in the hind legs, then in the fore legs. His eyes become covered with a film and his under jaw hangs down. Before long general paralysis sets in and he dies.

The warning which can hardly fail to be noticed is the howl, and, when his owner hears this, it is high time to act. He can be caught without much danger of biting, as a mad dog only attacks his master when the disease has completely captured his mind. But the saliva is already virulent, and gloves should be worn. Otherwise a little of it penetrating the skin or rubbed from the hand to a freshly shaved chin is enough to communicate the disease.

In dumb rabies the first sign is the drooping of the jaw. When this happens to a dog, it is only necessary to place a dish of water before him to discover whether he has rabies. He will lick at it, if rabid, but he will not be able to swallow, and the amount in the dish will remain the same.

As he cannot bite he is not very dangerous, but his saliva is as virulent as if he had furious rabies, and he should be kept apart. Usually a dog with dumb rabies is believed to have a bone in his throat, and some kindly person puts a hand in his mouth—literally into the jaws of death.

In mixed rabies the dog is more or less furious. He shows some of the symptoms of both the other forms.

About the only other diseases to which dogs are prone show themselves in a way not to be confused with rabies. Gastric trouble and rheumatism appear much as in human beings, and distemper is accompanied by coughing and sneezing, a high fever and running at the eyes.

The cardinal rule is never to kill a biting dog if possible to avoid it. Catch and chain him, and wait to see if the symptoms of rabies develop. If he is all right at the end of a week those he lick may breathe more freely, but, if he becomes rabid, they have no time to lose.

With the increase in rabies some knowledge of what to do for a dog's victims is as essential as a pocket supply of potassium permanganate in the rattlesnake country. Dr. George G. Rambood, of the Pasteur Institute of New York, gives the following directions as first aid to the injured:

"The wounds should be treated like any other infected wounds. Bleeding should be encouraged, as a free flow of blood may carry off with it a great part of the virus. Then the wound should be thoroughly washed with a good antiseptic solution. The newer colloidal silver or silver-salt preparations are to be preferred, but, in their absence, iodine, a four per cent solution of carbolic acid, or even lemon juice, are useful."

Cauterization, the oldest treatment,

Dr. Rambood decries because, he says, it gives a false sense of security. But Dr. Anna Williams, who is devoting her life to the study of rabies in the research laboratory of the New York Board of Health, says she is willing to take her chances on cauterization, if the wound is not too deep. The average person, however, will prefer to take the Pasteur treatment. Since its discovery in 1884 it has been tried on more than 250,000 people, and of those who took it only one-half of one per cent have died.

On the subject of the disease itself there is not much room for question. The existence of the virus has been proved beyond all reasonable doubt by inoculating a whole series of dogs, one from another, and having each one develop the same symptoms and die in the same way. But, what has stood in the way of a greater knowledge, aside from the treatment, has been the doubt as to the nature of the virus. Some hold it is a bacterium, the lowest form of plant life, and others that it is a protozoon, the lowest form of animal life. Bacteria are subject to epidemics; the known protozoons are not. The layman can only hope for the protozoon conclusion.

The Pasteur treatment normally consists of injections into the flank of an emulsion of small portions of the spinal cord of inoculated rabbits dissolved in a salt solution. For bites on the hand or body, if the patient begins the treatment within a week, it is continued for eighteen days. If the delay is greater, it is continued for several days longer. Pasteur himself laid down the rules which have been followed more or less closely ever since. But experience has shown that this treatment is much less successful for bites on the face, where the reach to the nerve center is shorter. To meet the emergency face bites have given rise to, within the past two years a new treatment has been developed which immunizes the patient in twelve days. It is rather heroic, but it has been used a great many times without bad results, saving the lives of many who had no time to spare. Instead of using virus the virulence of which has been allowed to die out, as in the old method, the emulsion consists of a serum obtained from sheep strongly immunized against rabies mixed with fresh virulent virus.

The Pasteur treatment is only preventive. The serum meets and grapples with the virus on its way up the nerve to the brain. Once it has reached the nerve center, it defies treatment. But, if you do not know you have been exposed, your first intimation is after the virus is in the brain engaged in its fateful work.

Death from rabies has become too common to occupy a front-page position in the newspapers. That alone shows the prevalence of the disease. Tomorrow or next week, when you read of little children being bitten on the street, remember that one of those children might have been yours. Imagine, then, the furious animal rushing at your child, tearing at his face and body!—Is the picture too horrible?

It is happening every day. Your child may be next.

### Now Joe is "It"

Joe Laver involuntarily discovered the best place to hide that he ever came across while playing hide-and-seek with a number of playmates at Third avenue and One Hundredth street, near an excavation for pneumatic tubes for the post office. Joe, who is four years old, disappeared from the ken of Isadore Ross, who was "it," as completely as though he had been drawn into the tubes. But it was not the tubes that got him.

"Issy" had just finished counting when he caught sight of Joe ducking behind a Third Avenue car. He was not sure, and ran around to the other side of the car to look, but there was no Joe there. "Issy" went and told Joe's mother he was lost. Twelve blocks away a number of boys ran out and pointed at the front of the car and

shouted to the motorman. He brought his car to a stop. When he got out he found a small boy whimpering on the fender. That was Joe.—New York Tribune.

Not the Means, But End. "Senator," the beautiful girl inquired, "are you in favor of being elected by the direct votes of the people."

"My dear young lady," the statesman replied, "I am enthusiastically in favor of being elected thus or in any other way that can be arranged."

The world is divided into two classes—those who go ahead and do something, and those who sit still and inquire. "Why wasn't it done the other way?"—O. W. Holmes.

## Hood's Sarsaparilla

For

All Spring Blood Diseases and Ailments

Possesses medicinal merit Peculiar to Itself and has an unequalled record of cures. Take it this spring, in usual liquid form or tablets known as Sarsatabs.

Spring Humors are due to the impure, impoverished, devitalized condition of the blood brought about by the unhealthful modes of living during the winter, too close confinement, too little outdoor air and exercise, too heavy diet. Hood's Sarsaparilla cures them and builds up the whole system.

Hood's Sarsaparilla has no equal for cleansing the blood and expelling the humors that accumulate during the winter. It effects its wonderful cures because it combines the utmost remedial values of more than twenty different ingredients. Insist on having Hood's. It has no substitute.

### SUNSHINE AND GOOD HEALTH

Wherever Sun's Rays Penetrate Human Life is Quickened and Health and Happiness Promoted.

The sunlight, with its mellowing warmth and radiance, is one of the great essentials to good health. Wherever it penetrates, in prudently regulated moderation, it quickens human life, promotes health and happiness, and may be truly regarded as one of the best friends of man and beast. The common practice of providing blinds, shutters, curtains and other means for shrouding the windows and shutting out the sunshine, is undoubtedly a great mistake, and makes for physical weakness and ill health. More window light, more sunshine, and not less, is what we require. Let all your apartments, kitchen, sitting rooms, parlors and bedrooms, too, be flooded with sunlight as much as possible.

### CURE THAT SORE THROAT

Sore throat is inflammation of the mucous membrane of the throat, and if this membrane happens to be at all sensitive a predisposition to sore throat will exist.

Paxtine Toilet Antiseptic is both a preventative and a cure for sore throat because it possesses extraordinary cleansing, healing and germicidal qualities. Just a little in a glass of water, used as a gargle, will quickly relieve all soreness and strengthen the mucous membrane of the throat, and thus overcome all tendency to sore throat.

Paxtine is far superior to liquid antiseptics or Peroxide for all toilet and hygienic uses.

Paxtine may be obtained at any drug store, 25 and 50c a box, or sent postpaid upon receipt of price by The Paxton Toilet Co., Boston, Mass. Send for a free sample.

### Barnalds in South Australia.

South Australia is suffering from a barnald famine. Two years ago barnalds were abolished in that state by act of parliament. No more could be legally engaged, but those already employed could remain on condition that they register themselves.

There are now only 400 of them left, and the competition for their services is such that their wages have jumped from 25 shillings to £3 a week. The hotels that have had to employ barnalds report a considerable change for the worse in their receipts.

### Bold Scribe.

"Ho, hum!" ejaculated honest Farmer Hornbeak, who had encountered in the village newspaper an example of the perversity which the linotype sometimes displays. The editor of the Plaindealer ain't afraid to speak his mind. He comes right out and says: "In our opinion the Hon. Thomas Rott has lydaonkzounsotttptp n-mnwv trahahaha hawzw zensikibby." And, by jolly! he says it as if he meant it, too!"—Puck.

### Where Surgery Falls Short.

"Surgery," said Simeon Ford at a dinner in New York, "accomplishes wonders nowadays. Hearts are sewed up; the appendix removed; the large intestine is done away with. But—"

The noted humorist smiled. "But will the time ever come when surgery will be able to remove the cheek of a young man or the jaw of an old woman?"—New York Sun.

### A FOOD STORY

Makes a Woman of 70 "One in 10,000."

The widow of one of Ohio's most distinguished newspaper editors and a famous leader in politics in his day, says she is 70 years old and a "stronger woman than you will find in ten thousand," and she credits her fine physical condition to the use of Grape-Nuts:

"Many years ago I had a terrible fall which permanently injured my stomach. For years I lived on a preparation of corn starch and milk, but it grew so repugnant to me that I had to give it up. Then I tried, one after another, a dozen different kinds of cereals, but the process of digestion gave me great pain.

"It was not until I began to use Grape-Nuts food three years ago that I found relief. It has proved, with the dear Lord's blessing, a great boon to me. It brought me health and vigor such as I never expected to again enjoy, and in gratitude I never fail to sound its praises." Name given by Postum Co., Battle Creek, Mich.

"There's a Reason." Look for it in the little book, "The Road to Wellville," to be found in pkgs. Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

## "Cured Neuralgia Pain"

"I take pleasure in writing to you that I had a neuralgia pain in my arm for five years, and I used your Liniment for one week and was completely cured. I recommend your Liniment very highly."—Mrs. J. McGRAW, 1216 Mandeville St., New Orleans, La.

### Cured Quinsy Sore Throat

MR. HENRY L. CAULK, of 1242 Wilson St., Wilmington, Del., writes:—"I bought a bottle of Sloan's Liniment for the quinsy sore throat and it cured me. I shall always keep a bottle in the house."

## SLOAN'S LINIMENT

gives instant relief from rheumatism, lumbago, sciatica, neuralgia, croup, sore throat, tonsillitis, hoarseness and chest pains.

Prices, 25c., 50c. & \$1.00

Sloan's book on horses, cattle, sheep and poultry sent free. Address Dr. Earl S. Sloan, Boston, Mass., U. S. A.

## Hunt's Cure

Is GUARANTEED to stop and permanently cure that terrible itching. It is compounded for that purpose and your money will be promptly refunded WITHOUT QUESTION if Hunt's Cure fails to cure Itch, Eczema, Tetter, Ring Worm or any other Skin Disease. 50c at your druggist's, or by mail direct if he hasn't it. Manufactured only by A. B. RICHARDS MEDICINE CO., Sherman, Texas

## Tutt's Pills

stimulate the torpid liver, strengthen the digestive organs, regulate the bowels, cure sick headache. Unequaled as an ANTI-BILIOUS MEDICINE. Elegantly sugar coated. Small dose. Price, 25c.

## XANTHINE FOR THE HAIR

Restores Gray Hair to Natural Color. REMOVES DANDRUFF AND SCURF. Enriches and prevents the hair from falling off. For Sale by Druggists, or Sent Direct by XANTHINE CO., Richmond, Virginia. Price 50c per Bottle. Sample Bottle 25c. Send for Circular.

## DEFIANCE STARCH

never sticks to the iron.

## WOOD'S HIGH-GRADE Farm Seeds.

We are headquarters for the best in all farm seeds. Grass and Clover Seeds, Seed Corn, Cotton Seed, Cow Peas, Soja Beans, Sorghums, Kaffir Corn, Millet Seed, Peanuts, etc.

"Wood's Crop issued Special" monthly gives timely information as to seeds to plant each month in the year, also prices of Seasonable Seeds. Write for copy, mailed free on request.

T. W. WOOD & SONS, Seedsmen, - Richmond, Va.
