The Real Problem.
"Well, dear," said the young husband to his bride, "I'll make out the deposit slip in your name and all you have to do is to take it to the bank."
"Yes," she responded, "but suppose I want to draw out some money some day, how will they know which is my money?"—Harper's Bazar.

They Presented Arms.
Two very charming young ladies were chatting in a tramcar the other evening.
"So you've been down to the camp?" said one.
"Yes; and it's splendid down there."
"Did the soldiers have their arms with them?"
"Of course they did! You don't suppose they would leave them at home, do you?"
"I shouldn't like to be there when they were firing. I hate firing."
"Why, silly, they don't fire."
"Don't they? What do they do with their arms, then?"
"Why, they put them round you, of course, and it's ever so nice."

A DOCTOR'S SLEEP
Found He Had to Leave Off Coffee.
Many persons do not realize that a bad stomach will cause insomnia. Coffee and tea drinking being such an ancient and respectable form of habit, few realize that the drug—caffeine—contained in coffee and tea, is one of the principal causes of dyspepsia and nervous troubles.
Without their usual portion of coffee or tea, the caffeine toppers are nervous, irritable and fretful. That's the way with a whisky drinker. He has got to have his dram "to settle his nerves"—habit.
To leave off coffee or tea is an easy matter if you want to try it, because Postum gives a gentle but natural support to the nerves and does not contain any drug—nothing but food.
Physicians know this to be true, as one from Ga. writes:
"I have cured myself of a long-standing case of Nervous Dyspepsia by leaving off coffee and using Postum," says the doctor.
"I also enjoy refreshing sleep, to which I've been an utter stranger for 30 years."
"In treating dyspepsia in its various types, I find little trouble when I can induce patients to quit coffee and adopt Postum."
The Dr. is right and "there's a reason." Read the little book, "The Road to Wellville," in pkgs.

Postum now comes in concentrated, powder form called Instant Postum. It is prepared by stirring a level teaspoonful in a cup of hot water, adding sugar to taste, and enough cream to bring the color to golden brown.
Instant Postum is convenient; there's no waste; and the flavor is always uniform. Sold by grocers—50-cup tin 30 cts., 100-cup tin 50 cts.
A 5-cup trial tin mailed for grocer's name and 2-cent stamp for postage. Postum Cereal Co., Ltd., Battle Creek, Mich.—Adv.

TURKEYS NEED RANGE

Mistake to Confine Fowls in Small Enclosures.

If Young Birds Can Be Induced to Roost in Large Trees Near Poultry House They Will Do Well—Avoid Damp Quarters.

(By R. G. WEATHERSTONE.)

It is a mistake to confine turkeys in small enclosures. By nature they are roving birds and get their feed over a wide range.

Turkeys should be raised with turkey hens because the young poults with chicken mothers will not range as widely as they should.

The young turkeys should be turned out in the fields just as soon as the dew is off the grass and should be allowed to remain out until dark.

If they are driven into the poultry house about dark and given a feed of grain or dry corn meal, wet and squeezed dry, they will, in a few days, return of their own accord.

Of course they must be brought in every night because if they are al-

Excellent Type of Turkey.

lowed to roost away from the poultry house they are likely to be destroyed by animals.

If the young turkeys can be induced to roost in a large tree near the poultry house they will do very well there, because the tree is the natural roosting place for turkeys. We know a woman in Virginia who raised about 200 turkeys every year and they all roosted in two large trees in the yard at the rear of the house. An inclined board is placed against the tree so that the poults can get into it when they are quite young. Many of them continue to walk up the plank to the first branches even after they are fully grown while the others use their wings to reach the branches.

Young turkeys cannot thrive in damp quarters. They should be well ventilated and placed where they will get plenty of sunshine.

Young turkeys should never be hurried or driven home or quickly forced into the poultry house. They are deliberate in their movements and should take half an hour or more to find their roosting places and settle down for the night.

PEANUT BUTTER IS POPULAR

Bureau of Plant Industry Issues Circular Dealing With Its Use and How Manufactured.

Circular 98 of the Bureau of Plant Industry, Department of Agriculture, says:

"The growing popularity of peanut butter as a food has led to many inquiries regarding the methods employed in its manufacture. Peanut butter is in reality a very simple preparation, consisting merely of fresh-roasted peanuts ground fine and salted to suit the taste. Several large factories and a large number of smaller ones are now devoted to the manufacture of this product with which to supply the rapidly increasing demand. Some of the larger factories are almost models in their construction, equipment and management, while many of the smaller establishments, which have no elaborate equipment, are turning out an excellent product.

"Peanut butter was first manufactured and offered for sale as a food for invalids, but the article was soon adopted by many persons who for one reason or another, such as preference for vegetable foods only, objected to the use of ordinary dairy butter. It soon outgrew this condition of limited use, and its development on a commercial scale has been a general product. It was never intended that this product should be used as a substitute for or a competitor of butter, but as a luncheon delicacy and to add variety to the diet. Peanut butter is a wholesome and nutritious food product and has become a popular article upon our markets. Last year one manufacturer used over 130 cars of shelled peanuts in the production of 6,000,000 small jars of this food. Other manufacturers used large quantities, the total consumption of peanuts for the manufacture of peanut butter alone amounting during the year of 1911 to approximately 1,000 cars of shelled goods, or 1,000,000 bushels.

"In order to produce high-class peanut butter the manufacturer must employ the best materials. On the other hand, the use of the best stock obtainable will be of little avail unless the work of converting into a salable product is conducted in a sanitary manner."

Health and Strength of Wool.

If the animal is in poor health the effect on the growth of the wool is similar to insufficient feed. Sheep often shed or slip their wool as a result of a feverish condition. Any severe illness extending over sufficient time to reduce the animal in flesh will almost invariably cause a weak place in the wool. In the production of good, strong wool the health of the animal is just as essential as proper feeding.

Permanent Pasture for Hogs.

It will pay you to go to some trouble to get an acre lot well set with permanent grass for the boar to run in. Having running water in the lot if possible, build him a shed, tight on three sides and open on the south, and with plenty of grass he will cost you very little feed.

YOUNG ANIMALS ARE MOST PROFITABLE

An Ideal Farm Yard.

In figuring on the relative value of young and old cows there are a great many things to be taken into account, says a writer in the Farm Progress. The general impression is that a young cow of the same grade is more desirable than an old one, and with the most breeds this is generally the case. But it is better to purchase an old cow of good grade when a moderate amount of money is to be invested than to purchase a young cow that never would be profitable.
The young cow of poor breed would yield very little profit for many years, during which time she must be fed, while the older cow which is purchased for the same consideration will yield a good profit during the few remaining years.

It stands nowadays that a pure-bred milk cow six years old might be worth \$60 in the market, whereas a cow of her same grade nine years old will bring only \$40. If a buyer makes a purchase of a milk cow for \$60 the interest at six per cent. for three years would be \$10.80. If he buys an old cow the interest for three years at six per cent. would be \$6.20.

It can be readily seen that at the end of that time this young cow would be an old one. While his old cow

would have to be sold for, say, \$20 and he must buy a new one to replace her. At the end of the second three years the young cow would be twelve years old, and would have to be sold for about \$20, while the second old cow would bring about the same price.

Reckoning the interest on the money invested, the amount would be \$21.60 for the purchase of the young cow, and \$17 for the interest on the cost of the two old cows, a difference of \$4.60 in favor of the two old cows. But the large average product of the young cow during the first three years would no doubt in most cases more than overbalance the difference.

Some buyers prefer to get old cows because the animals, then being fully developed, they are able to readily judge of their milk-producing qualities. They argue that the old cows will stand heavy grazing, and sometimes such cows are milked only one season, their owners preferring to change often and submit to a loss each time for the sake of keeping up a large milk supply.

On the other hand, the buyer who intends to keep his purchase all through her period of usefulness prefers to get a cow which is still in pass through her best years.

TO TUNNEL UNDER CHANNEL

Long-Delayed Franco-English Project Is Once More Being Put Forward.

A tunnel between England and France beneath the English channel was first proposed at the beginning of the nineteenth century by Mathieu, a French mining engineer, says the Argonaut. Fifty years later the scheme was financed, but it was not until 1867 that it seemed that the project would be actually attempted. At that time there were a dozen or more plans for rail communication between the two countries. The accepted scheme was that of a tunnel bored beneath the bed of the channel. The estimated cost of the undertaking was about \$50,000,000. Preliminary boring had been made, when the work was interrupted by the Franco-Prussian war. In 1874 the French and English governments resumed negotiations concerning the tunnel, leaving the matter in the hands of a joint commission. Failure on the part of the English company holding the contract for the work to receive sufficient funds resulted in the failure of the enterprise in 1880. Now the project is receiving some attention, a better feeling having been established between the people of the two countries.

THE BEST TREATMENT FOR ITCHING SCALPS, DANDRUFF AND FALLING HAIR

To allay itching and irritation of the scalp, prevent dry, thin and falling hair, remove crusts, scales and dandruff, and promote the growth and beauty of the hair, the following special treatment is most effective, agreeable and economical. On retiring, comb the hair out straight all around, then begin at the side and make a parting, gently rubbing Cuticura ointment into the parting with a bit of soft flannel held over the end of the finger. Anoint additional partings about half an inch apart until the whole scalp has been treated, the purpose being to get the Cuticura Ointment on the scalp skin rather than on the hair. It is well to place a light covering over the hair to protect the pillow from possible stain. The next morning, shampoo with Cuticura Soap and hot water. Shampoos alone may be used as often as agreeable, but once or twice a month is generally sufficient for this special treatment for women's hair.

Cuticura Soap and Ointment sold throughout the world. Sample of each free with 32-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston." Adv.

Old Landmark Gone.
The Blaine schoolhouse in Mars Hill up on the hill, the one James G. Blaine honored years ago by giving a bell, which still hangs in the heltry, is no more. It has been converted into a storeroom and moved to another site. A good many bright boys and girls, now old men and women, graduated from this historical building, and no doubt there is a feeling of sorrow as the old schoolhouse leaves the foundation it was builded upon years and years ago.—Kennebec (Me.) Journal.

As a summer tonic there is no medicine that quite compares with OXIDINE. It not only builds up the system, but taken regularly, prevents Malaria. Regular or Tasteless formula at Druggists. Adv.

Some people fail to win because others do not lose.

WOMEN SHOULD NEVER USE HARSH PHYSICS

Women are especially susceptible to constipation and their more delicate organisms rebel at the violence of cathartics and purgatives. Drastic medicines like salts, mineral waters, pills and powders may afford temporary relief, but their violent action on the stomach and bowels tends to upset the entire system.

A mild laxative is far preferable and more effective. The combination of simple laxative herbs with pepsin prescribed by Dr. W. B. Caldwell, and sold in drug stores under the name of Dr. Caldwell's Syrup Pepsin, is ideal for women, being gentle in action, positive in effect and pleasant to the taste. A spoonful of Syrup Pepsin at night will bring natural relief next morning and, used regularly for a brief period, will so strengthen and tone the muscles of the stomach and bowels that there will be little, if any, further need for medicine.

Dr. Caldwell's Syrup Pepsin can be procured in any drug store. Your name and address on a postal to Dr. W. B. Caldwell, 203 West St., Monticello, Ill., will bring a free trial bottle by return mail. Adv.

King George Superstitious.

An incident which occurred while the king was out shooting recently over the Hon. John Ward's preserves at Woolley shows that the monarch shares with many other persons the superstition about the number thirteen. The eight guns were joined at luncheon by five women of the party staying at Chilton, and the king noting the unlucky number would not sit down until Donald Harding, the acting agent upon the estate, was called in to make the number up to fourteen.—New York Herald.

To prevent Malaria is far better than to cure it. In malarial countries take a dose of OXIDINE regularly one each week and save yourself from Chills and Fever and other malarial troubles. Adv.

Every invalid woman is invited to consult our Staff of Physicians, Surgeons and Specialists, at the Invalid's Hotel and Surgical Institute, Buffalo, N. Y., by letter or personally at my expense.—R. V. PIERCE, M. D.

I Invite Suffering Women

There is every reason why women should not trust their delicate constitutions in the hands of unskilled persons. It requires a thorough medical education to appreciate and understand the delicate female organism. There is every reason why she should write or personally consult an experienced specialist.

As a powerful, invigorating tonic, "Favorite Prescription" imparts strength to the whole system and to the organs distinctly feminine in particular. For "run-down," debilitated women of all occupations

DR. PIERCE'S Favorite Prescription

is unequalled as a restorative tonic. As a soothing and strengthening nerve tonic, "Favorite Prescription" allays and subdues nervous excitability, irritability, nervous exhaustion, and other distressing symptoms commonly attendant upon functional and organic diseases of the feminine organs. It induces refreshing sleep and relieves mental anxiety and despondency.

Dr. Pierce's Favorite Prescription is devised and put up by a physician of vast experience in the treatment of women's maladies. Its ingredients have the indorsement of leading physicians in all schools of practice.

The "Favorite Prescription" has been sold by dealers in medicine in its liquid form for over 40 years. Now it can also be obtained of them in tablet form—or send 50 one-cent stamps to Dr. Pierce for trial box.

Dr. Pierce's Pleasant Pellets invigorates the stomach, liver and bowels. One to three a dose. Easy to take as candy.

Send 31 one-cent stamps to pay cost of wrapping and mailing only on a free copy of Dr. Pierce's Common Sense Medical Adviser, 1008 pages, cloth-bound, Invalid's Hotel and Surgical Institute, R. V. Pierce, M. D., President, Buffalo, N. Y.

"It Helped Me So Much."

Mrs. F. W. MYERS, of Bodines, Pa., says: "Your 'Favorite Prescription' has done me a wonderful lot of good. Several years ago when our first child was born I was in a miserable state of health. I consulted with two physicians without any relief. I then went to see one of the best doctors in Williamsport; he said I must have an operation at once and that I should quit work, but that was something I could not do. I then began taking your 'Favorite Prescription' and it helped me so much. I always suffered so until our first child when I got along nicely. I shall never go through it again without your medicine. I will close by wishing you much success in future."

PUTNAM FADELESS DYES
