

NOTICE OF SALE

Under and by virtue of the power of sale contained in a certain deed of trust executed to me the undersigned trustee by C. F. Page and C. H. Godwin dated the 30th day of October, 1919, said deed of trust being of record in public registry of Martin county, in book B-2 at page 347, and the stipulations therein contained not having been complied with and at the request of the owner of the note secured by said deed of trust, I will expose to public sale in front of the court house door in Williamston, N. C., on the 21st day of Nov., 1921, at 12 o'clock, M., for cash to the highest bidder the following described real estate:

All that certain tract of land lying and being in the county of Martin and State of North Carolina and being in the town of Williamston and being more or less 4 and 5 on plan of land owned by Paul Sampson, known as the Penny Peet farm, a survey and platted by A. Grey, Engineer. Plat which is of record in Martin County public registry in book 498 to which said plat reference is hereby made for a more perfect description. Tract No. 4 contains 2.3 acres and tract No. 5 contains 2.3 acres.

This the 20th day of October, 1921. GILBERT PELL, Trustee

Under and by virtue of the power of sale contained in that certain deed of trust executed to me, the undersigned trustee, on the 4th day of December, 1919, by C. H. Godwin of record in Martin county public registry in book A-2 at page 332, said deed of trust having been given to secure certain bonds of even date and tenor therewith, and the stipulations therein contained not having been complied with and at the request of the owner of said bonds, I will expose to public auction in front of the court house door in Williamston, N. C., at 12 o'clock, M., on the 6th day of November, 1921, to the highest bidder for cash the following described land:

It being a piece of the lot of W. H. Wilson bought of J. R. Moore beginning at a stake in the right of way of the Atlantic Coast Line railroad on Pearl Street, thence along Pearl Street towards Main Street, to a stake, thence a line parallel with Main Street to the line of B. F. Godwin, thence along B. F. Godwin's line and parallel to Pearl Street, to the line of the Atlantic Coast Line railroad right of way, thence along and railroad right of way to the beginning and being the same property conveyed to Margie Wilson by deed from Sarah A. Wilson, dated the 15th of Oct., 1906 and of record in the public registry of Martin county in book 338 at page 102.

This the 26th day of Oct., 1921. WHEELER MAUTH, Trustee

NOTICE OF SALE

Under and by virtue of the power of sale contained in that certain deed of trust executed to the undersigned trustee by Charlie James, and bearing date of October 26th, 1917, and of record in book M-1, at page 183 of the Martin county public registry, said deed of trust having been given to secure the payment of certain note of even date therewith, and the terms and conditions therein contained not having been complied with, and at the request of the holder of said notes, I will expose to public sale in front of the court house door in Williamston, N. C., on the 14th day of November, 1921, at 12 o'clock, M., at the Court House door in Williamston, N. C., to the highest bidder for cash the following described property, to wit:

That certain tract of land lying and being in Martin county aforesaid, and being particularly described as follows, beginning at the C. P. Pine and running thence N. 80° E. 1/2 mile to an oak, thence S. 80° E. 1/2 mile to an oak, thence S. 80° E. 1/2 mile to a black oak, thence N. 21° E. 1/2 mile to the beginning, containing twenty-seven (27) acres, more or less, the tract of land being situated on the north side of the C. P. Pine, and being the same land mentioned in a deed from the State of North Carolina to M. W. King, and recorded in book 344 at page 341, Martin County public registry, and being the same land mentioned in the deed of J. H. Aylin, et al vs. Denair Lumber Co., et al, and recorded in minute book No. 1, a page 341 and 318 in the office of the clerk of the Superior Court of Martin County.

This the 20th day of October, 1921. A. J. DENNING, Trustee

Under and by virtue of the power of sale contained in that certain deed of trust executed to me, the undersigned trustee, on the 31st day of Feb., 1919, by A. J. Dent, of record in Martin County public registry in book C-1 at page 250, said deed of trust having been given to secure certain bonds of even date and tenor therewith, and the stipulations therein not having been complied with and at the request of the owner of said bonds, I will expose to public auction in front of the court house door in Williamston, N. C., on the 14th day of November, 1921, to the highest bidder for cash the following described lots of land:

Lot No. 8, eight and nine in Section No. 10, and being the same land conveyed to A. J. Dent, of P. K. Hooper and wife.

This the 11th day of October, 1921. W. J. HODGES, Trustee

PURE BRED POLAND CHINA PIGS for sale. They are nice pups, and in good condition. Heavily offered. Call on me.

DAY OF SAILS MAY RETURN

Many Causes Operating to Decrease the Present Supremacy of the Steam-Driven Vessel.

A great deal of the beauty and romance of the sea passed with the decline of the sailing ship. The sailing ship gave way to the steamer because the latter was more reliable as to runs and was not hampered by calms or slowed down so much by head winds and gales, and finally could be operated in larger units. So it has been assumed that the sailing ship has been displaced forever. It survives, though chiefly under fore-and-aft rig, but most ocean freight is carried by the steam-driven vessel.

Now there is talk of the revival of the sailing ship as a carrier. The Suez and the Panama canals have shortened the world routes materially, coal is becoming a more expensive fuel and oil is not so cheap. So there are interesting proposals for a return to sails. The rig would be fore-and-aft instead of the old square sails, and there would be machinery for handling and m-an-auxiliary in case of calm.

A naval architect of standing has come forward with a design of this kind, making use of the Diesel engine for running gear and electricity for lighting and heating. American ships have been operating with as many as seven masts, and the use of power would permit the operation of larger units with a comparatively small cost.

HARD TASK FOR TEACHERS

Cincinnati School Authorities Want Them to Get Mothers to Cease Using "Baby Talk."

An appeal has been made by the school authorities of Cincinnati to the mothers of that city to enlist in a war against "baby talk" and its effects on their children, and a special speaker has been appointed to carry this message to the mothers' clubs.

While much of the talk with which fond mothers beguile their babies may seem very foolish to others, it seems to sound good to the baby, and while the claim that it makes stutters and causes other defects in speech may be some truth in it, the "baby talk" will bear comparison with much other talk heard by children.

While good speech is important, the matter is of more importance than the mothers in fact good mother naturally talks to her child in a way that is at least quite as important that parents, fathers as well as mothers, are careful to select the right subject matter for talk before and to their children as that talk which is eliminated.

Try as they may, the teachers are likely to have a hard time anyway to convince many mothers that baby talk is not the proper language in which to address the baby, both as to subject matter and method of speech.

This the 11th day of October, 1921. W. J. HODGES, Trustee

periments which have been in progress privately for some time past point to wonderful possibilities in the near future when every great factory and foundry will have its own radiographing and laboratory. There is no reason why the X-rays, hitherto only used for medical and surgical work, should not be utilized in detecting flaws in, say, an ingot of metal or block of concrete. Progress in this direction only awaits the perfecting of sufficiently powerful apparatus. The importance of this to the metallurgist and manufacturer must be obvious, and research work is only hindered by the absence of the necessary funds to prosecute what are necessarily very costly experiments.

What the Japanese Read.

So far as popular interests of the Japanese are indicated by the books they read, it would appear that their attention is given largely to social questions. According to a recent classification of the books and magazines published in the empire, those upon this subject, including labor conditions, economics, political science, sociology, history and law, are a close second to works of fiction, general literature and art. From the Living Age.

Aviator Makes Record.

The summit of Mont Blanc, 15,872 feet high, was the scene recently of a remarkable feat in aviation. A French aviator landed there with his plane, got out of the machine, walked around for about ten minutes, and then flew away and 20 minutes later landed safely at Chamouilly, the well-known Alpine resort, at the base of the mountain. Popular Mechanics Magazine.

PROPER CARE OF THE DOG

Household Pet, Particularly If It Is Kept Indoors, Must Be Given Regular Attention.

To keep a dog healthy be sure to attend regularly to his toilet.

Many owners wash their dogs in the summer, but neglect to do so in the winter. This is a mistake. While in the summer months the dog will appreciate a wash once a week during the winter once a month should be the order, says an exchange.

The length of time between washings will depend upon the life the dog leads and the amount of grooming it receives. All animals should be regularly brushed down. Indoor dogs only for a more frequent toilet than outdoor ones; the former may be washed once a month and the latter every five or six weeks. The indoor dog, too, should be groomed more frequently than the outdoor one. Washing tends to soften the hairs, so that wire-haired dogs intended for exhibition are constantly groomed rather than frequently washed.

The wash, a dog successfully first see that the soap is rubbed well in and then that it is properly rinsed out. Guard against chills after the bath and never let the dog retire to its kennel until the coat is thoroughly dry. If the weather is inclement wash and dry the dog in front of the fire, but not too near. In drying use several towels and finish with a good brush-down. If the coat dries slowly wrap the dog in a thick blanket and leave the animal near the fire.

OWNS AND RUNS COAL MINE

Girl Has Been Successful in Business in Which Few of Her Sex Have Been Engaged.

"I wonder when will ever get our coal," the complaint of many housewives for a few seasons past, will not be voiced by Miss Ricka Ott, twenty-one years old, who industriously mines coal daily in a little "wagon mine" on her father's farm in the hills of Mount Oliver, Pa., near Pittsburgh.

Ricka is her own boss, miner, operator, manager, distributor. Day after day she cheerfully sings as she wheels her "black diamonds" from the mine. Along about three years ago when all the mines of western Pennsylvania were working to their fullest capacity,

to keep an unending stream of coal flowing to the mills where weapons and munitions were being turned out. Ricka was imbued with the desire to do her share toward the winning of the great conflict. She suggested of her father, Gregor Ott, a steel worker, that they open a mine of giving up a perfectly good job in the steel mills for the uncertainty of a small coal mine. "I will mine the coal and sell it," said Ricka. He laughed at the idea of a girl mining coal and driving a truck. She gave her father no rest until he agreed to start a mine for her, and she has since proved more than a match for the other miners of the country.

Last year Miss Ott mined 9,000 bushels of coal, and distributed it to her customers.—Dearborn Independent.

Promotion of "Pure English."

In England, as in the United States, the subject of preserving the purity of the English language from the effects of slang, loss of grammatical distinctions, etc., has recently attracted much attention. One of the results of the movement in England is the formation of the Society for Pure English. The society was founded in 1918, but was compelled by the war to postpone its activities. The reason for its existence is the "duty of English-speaking peoples" to make their language "strong and efficient and worthy of its increasing and world-wide use. Its purpose is to further the best interest of the language by the promulgation of sound knowledge." It is asserted that the Society for Pure English does not intend to denigrate but to open an informal democratic court in which all questions may be argued on full information.—Columbus Dispatch.

Prima Donna's Home.

There are few more romantic homes than the Chateau de Colibrier, where Madame Calve, the famous operatic singer, spends the summer months. It is an old castle standing high among the mountains in the south of France. It has become part of the rock upon which it is built, rising in stupendous strength and commanding aboriginal views across the valleys. It had all ways been Madame Calve's ambition to own the chateau, which she had known from earliest childhood. When she bought it she invited her father and mother to a grand dinner without divulging the secret. A large covered dish stood before her father's plate. When he lifted the cover a huge key rested on the dish. It unlocked the main door, and told her father that Madame Calve owned the old place.

Remarkable Cacti.

The newest achievement of Burbank, the plant wizard, is the production of cacti that bear fruits beautiful to the eye and with flavors resembling those of peaches, strawberries, pineapples, etc., yet containing no acids to render them unpalatable, unwholesome. They are very sweet, containing from 12 to 14 per cent of sugar. These fruits may be eaten fresh or put up as sweet meats. They are in various colors and their juices, particularly of the red ones (which are of brilliant hues) are utilized for coloring confections and candies.—The Independent Ledger.

May Get Treasures From Ocean.

A ship's treasure buried for 120 years has now, it is thought, been located. Anyway, the East India company's ship Grosvenor, which foundered off the coast of Pondoland, South Africa, in 1782, with \$8,573,650 in specie, numerous gold and silver ingots, and precious stones, including an almost priceless parcel of emeralds on board, has now been located. The Grosvenor Bullion syndicate has been organized and survey work is already proceeding. The consulting engineer in the operation confirms the report that the ship, which is said to lie in from 15 to 25 feet of water only, is intact from keel to deck. A 90-foot tunnel from shore to ship is proposed. A large silver Spanish coin bearing a worn date that appears to be 1722, a lighter silver coin which appears to be Indian and a small gold piece on which an image may be fairly discerned have been obtained from persons lying on the Pondoland coast, and are believed to have come from the sunken Grosvenor.

Improvements in Palestine.

Assistant Trade Commissioner Julian E. Gillespie, who has just completed a visit to Egypt, Syria, Palestine and Smyrna, states that the government of Palestine has projected an enlargement of the ports of Jaffa and Haifa, the erection of a large water-power plant sufficient to meet the needs of all Palestine, the irrigation of the Jordan valley, and the construction of a railroad from the Sea of Galilee directly east to connect with the Bagdad railway. However, it is probable that only the port improvements at Jaffa will see accomplishment in the near future. This project is being urged by the orange growers and shippers of Jaffa.—Scientific American.

Use for Surplus Water Supply.

Having a water supply far exceeding the requirement of its present population, the authorities of the small town of Port Alberni, B. C., decided to utilize this surplus for generating electricity for lighting purposes. The source of the water supply is a creek seven miles distant with a head of 60 feet, and allowing for friction and all losses in transmission, there was an effective head at the power house of 353 feet, which at ordinary rates of efficiency would available a force of 120 horse power, being all that was required to generate enough current for lighting the town for some time to come.—Popular Mechanics Magazine.

NOTICE

North Carolina, County of Martin: C. V. Carson, Nicholas Roberson and all other stockholders and creditors of the defendant Company who may see fit to come in and make themselves parties plaintiffs hereto, vs. Parmele Manufacturing & Motor Co.

All stock holders and creditors of the defendant corporation, Parmele Manufacturing and Motor Company, are hereby notified that an action entitled as above has been instituted in the Superior court of Martin county, and by order of Hon. C. C. Lyon the undersigned has been appointed temporary receiver of said co., that hearing to make said receiver permanent will be had before Hon. George W. Connor, in Wilson, N. C., on November 12th, 1921.

All persons having claims against said defendant company are notified to file same with the undersigned on or before the 15th day of November, 1921.

This 27th day of October, 1921. W. A. Darden, Temporary Receiver.

NOTICE

North Carolina, Martin County, In the Superior Court.

Ollie M. Henson vs. W. A. Henson. The defendant above named will take notice that an action as above entitled has been commenced in the Superior Court of Martin county for the purpose of securing an absolute divorce; and the said defendant will further take notice that he is required to appear before the Clerk of the Superior court for Martin County at his office in Williamston, N. C., on the 24th day of November, 1921, and answer or demur to the complaint of the plaintiff or the plaintiff will file the court for the relief demanded in said complaint.

This the 23rd day of October, 1921. R. J. PEEL, Clerk of the Superior Court.
