

TO FARMERS:

The farmers methods have changed much of recent years. These days the progressive farmer realizes that he is a business man, and keeps an accurate of his transactions.

Such farmers take advantage of the facilities offered by a modern bank like ours. We make a specialty of farmers' accounts, something they all seem to appreciate. An account at our bank saves the farmer a lot of book-keeping, insures the safety of his funds and places him alongside other progressive business men where he belongs. If not already a patron of this bank, come in any time. We want you with us.

FOR THOSE WHO WANT THE BEST

At the recent conference of the British Royal Sanitary Institute Dr. S. Owens, in an analysis of a London fog said that to reproduce a dense smoke fog about four milligrams of soot to the cubic meter of air was all that was required. One milligram produced the ordinary winter haze. If a dense smoke extended over the whole of London and up to a height of 400 feet a traffic under 200 tons of soot would be present. The domestic fires of London from six in the morning till nine at night produced over 200 tons of soot, sufficient to produce one of the densest fogs.

Trees Know Winter.
The great buds of the horse-chestnut have a most elaborate arrangement for the winter protection of the delicate parts within, says the American Forestry Magazine. The baby flower cluster is covered by the downy growth of the undeveloped leaves. The latter are surrounded by the tough hard scales and these are varnished over to keep out the water.

One Drawback.
"There are all kinds of ways to make a living," said the elderly capitalist. "That's quite true," replied the club loafer, "but the trouble is that nearly all of them require some effort that is incompatible with sitting in an easy chair and watching the procession go by." Birmingham Age-Herald.

Experienced.
Ryder: "One never knows what will please a woman."
Thomas: "Oh, I wouldn't say that. In the eyes of her wife, anything beyond our means is sure to London Answer."
