**BETTER OR WORSE?**

It the world growing worse or better is one of the questions of every day discussion.

Close observation in most neighborhoods will convince us that there has been much improvement. This is especially true in those sections where most illiteracy prevailed. Much of the drunkenness, roughness and in fact practically all those things contrary to the moral and civil laws have largely disappeared. Public gatherings present a far higher type of culture than was seen 20 years ago. Less cursing, drunkenness and swearing prevails. This condition is cause for hearty approval.

The one danger point in the social life today is perhaps the liberality given boys and girls in their association with each other. The idea of the gradual and nobleness of womanhood is too often forgotten by the men of our country. And women too tend to become forgetful of their high estate when they become too loose in their relation with men.

It may become necessary to increase and develop true manhood and womanhood too stop the unrestricted association of boys and girls from morning to night and sometimes late in the night. It is sometimes strange to see how a woman will become infatuated with a lounge lizard and permit his constant company.

A holding up of this habit will go a long way toward the saving of a multitude of troubles.
