dosing upsets children's delicate stomachs Vicks is applied externally and

tion. It acts in two ways:
(1) The body heat releases the ingredients in the form of vapors which are inhaled.

(2) At the same time Vicks "draws out" the soreness like a

MAGNESIA LIME-STONE IS BEST FOR ALL CROPS

Impression That It Is Good Only for Tobacco Is Mistake

Due to the fact that magnesia limetone has been so much talked of for tobacco, as it is the only kind of lime recommended for tobacco, an impression has prevailed in some sections that such a lime is not best for other crops tone contains both calcium and magmagnesium carbonate has the same maintaining this condition. sweetening power as 100 pounds of Manures and fertilizers are also

to the effect that magnesia limestones Magnesium, as well as calcium, is one of the essential elements of plant food, and there is evidence that in many soils additions of magnesium are needed for this purpose.'

Mr. C. J. Chapman, assistant professor of soils at the University of Wisconsin, says:

believe that this dolomitic limestone would be superior to the ordinary pure calcium carbonates and marls.'

No one thing will do so much to We must remember that good lime- assure the success of the garden as lime. Nearly all vegetables require a nesium, and that both are necessary sweet soil, and periodical application plant foods. Also that 84 pounds of of lime is the most practical means of

Lime for

Vegetables

"A good garden is worth five times as much per acre as any other cultivated spot on the farm"

Nearly all vegetables require a sweet soil and periodical applications of finely pulverized limestone is the practical way to bring about and maintain this condition.

It takes a good supply of lime to make full yields of most garden crops, especially spinach, lettuce, beets, beans, carrots, asparagus, cabbage, cauliflower, cantaloupes, celery, cucumbers, kale, peas, and onions.

Poor germination is frequently attributed to the seed, when it is really due to sour soil.

are likely to produce slightly higher den soil is of the utmost importance, just right.

Lime should be applied after the ground has been plowed and should be harrowed well into the top some time before seeding.

"Of course, magnesium is required as a plant food by all crops. The legumes are especially heavy feeders in of Martin County, all persons holding both calcium and magnesium. There has been quite a little work done in the east on the use of magnesium salts as a fertilizer. It seems that some of the eastern soils are quite deficient in magnesium. This would lead me to

New York Bulletin No. 400 says: be properly decomposed or become same to me for payment on or before the 2nd day of March, 1929, or this notice will be pleaded in bar of their.

The physical condition of the gar-tice will be pleaded in bar of their. This 2nd day of March, 1928. This 2nd day of March, 1928.

CROP RESULTS prove the difference

LMOST without exception," says a local merchant, "the farmers in this section who use 'AA QUALITY' Fertilizers get successful crops and bank substantial profits." Why? Because, year in year out, even under adverse growing conditions, "AA QUALITY" Fertilizers grow bigger, better, more profitable crops.

Read the letters at the right. Scores of other farmers in this and neighboring counties say the same thing. Larger yields, better quality, earlier maturity, extra profits-obtained with "AA QUALITY" Fertilizers.

Actual crop results prove that there is a decided difference in fertilizers of the same chemical analysis. Chemical analysis does not fully disclose the sources from which the plant-food elements were derived, neither does it indicate the physical condition of the fertilizer-two very important factors affecting the crop-producing power.

"AA OUALITY" Fertilizers produce more profit for every dollar invested in fertilizer because of the infinite care used in selecting the materials from which the plant-food elements are derived, and because these famous formulas are based upon a thorough knowledge of crop and soil conditions. Backed by over 60 years of successful crop production. Any farmer will tell you that "AA QUALITY" goods are famous for their splendid mechanical condition.

Read these letters from successful growers. Then plan to increase your own profits in 1928; insist on getting "AA QUALITY" Fertilizers from your dealer for use on your farm this season.

BEST RESULTS WITH "AA QUALITY". Mr. J. B. Cullipher, of Merry Hill, Bertie Co., N. C., 1895: "For the past six years I have been using your "AA QUALITY" Fertilizers under cotton, corn, peanuts and tobacco. During this time I have tried other brands, but have lound out that I get the best results with "AA QUALITY" Fertilizers, This year I used nothing cle."—Sept. 26, 1927.
