UNDERNEATH the surface is where you get the cold truth about tire values. It's the inside of the tire—the method of construction and the quality and quantity of materials—that determines its Stamina, Performance, Safety, VALUE. You can no more tell the quality of a tire by its outside appearance than you can tell the character of a man by the kind of clothes he wears.

own comparisons, uninfluenced by any sales propaganda. We urge you to thoroughly check every vital point—rubber volume, weight, width, thickness, and plies under the tread. Then buy accordingly—ON FACTS AND FACTS ALONE. Against the various claims presented about different tires, isn't this the most logical suggestion ever made to you? Could there be any more positive way to definitely determine which tires offer you the most for your money? There can be no question or controversy when you get the FACTS yourself.

*A "Special Brand" tire is made by a manufacturer for distributors such as Mail Order Houses, oil companies and others, under a name that does not identify the tire manufacturer to the public, usually because he builds his "first line" tires under his own name.
