TOBACCO BEDS SHOULD HAVE UTMOST CARE
 Probabilities Are That All Insects Will Be More Numerous This Year

TO AWARD \$6,000 SCHOLARSHIPS
 Open to Boys From This County; Provide 3 Years At Culver Academy

and default having been made in the Street in said town—thence along Main Street a westerly course fifty (50) feet; thence along Julius S. Peel's line 325 feet in a southerly direction to a branch at the run there; thence along the run of the branch to Cuff Eborn's line; thence along Cuff Eborn's line and Mrs. Melson's line about 325 feet to the beginning. This the 18th day of January, 1932. ELBERT S. PEEL, Trustee.

By JOHN R. MORRIS, Editor, Tobacco News
 Georgia tobacco farmers are already making war on plant bed insects. The warm winter weather has been favorable to insects, and the probabilities are that they will be more numerous and will do more severe damage than usual unless preventive measures are used. Cutworms, moles, crickets and snails are the principal ones that menace tobacco plant beds. They often destroy entire beds, and sometimes the damage is not even suspected until it has already been done. Cutworms are already at work on plants, such as cabbage, onions, etc., and it will be well to take immediate steps to prevent damage to young tobacco plants when they start coming up.

Announcement of a valuable scholarship open to Martin County and other North Carolina boys who are in the ninth grade or the first half of the tenth grade has been received by Principal Watson, of the local school. It is one of four offered this year in Culver Military Academy in memory of the wife of its founder, Mrs. Emily Jane Culver.

Two-Deliveries Daily-Two AND YOU CAN Order by Telephone

FOR MORNING DELIVERIES ORDERS MUST BE GIVEN BY 9:30 A. M.
 FOR AFTERNOON DELIVERIES ORDERS MUST BE GIVEN BY 4:30 P. M.

We are better prepared to serve our friends than ever before, and we are going to give every service that legitimate merchandising affords. Our cash prices are as low as the lowest, we make no exceptions.

C. O. MOORE
 WILLIAMSTON, N. C.

The very small size of the tobacco plants, and the feeding habits of these insects make it necessary to poison them with something that they will eat. J. M. Purdom, an expert in this work, advise to make up a poison bait by thoroughly mixing one pound of arsenate of lead, or calcium arsenate, or one-half pound of paris green with 25 pounds of shorts, bran, cottonseed meal, or corn meal. Add sufficient water that has been sweetened with syrup to make a crumbly mass. Remove the cloth cover and apply by sowing the small crumbs of this mixture over the bed. If there are mole runs in the bed, drop small balls of the mixture in their runs. Two or three applications of this mixture should be made at intervals of two weeks. After the plants have put on five or six leaves the dry mixture can be dusted on the plants.

The scholarship will go to the winner of a state-wide competition, which will be conducted under the direction of a committee of North Carolina educators, of which Prof. Edgar Knight of the University of North Carolina is chairman. Prof. W. A. Brownell, of Duke University, and R. H. Latham, superintendent of schools of Winston-Salem, are the other members of the committee.

Scientific methods of selection will be employed. The successful candidate must achieve, in tests devised by leading educators and psychologists, above-average ratings in personality, emotional control, life purpose, social adjustment, originality and leadership as well as in the qualities of mentality expected of a scholarship aspirant.

Our farmers should use every precaution to make a crop of quality tobacco during 1932. Most of our farmers are in bankruptcy as the result of growing tobacco. They can make money if they will cut the acreage and take care of a smaller crop. The marketing conditions in foreign countries will lend us no hope to base any claims for better prices. Domestic types have sold at a profit this season. We must grow them or go out of the tobacco growing business.

Scientific methods of selection will be employed. The successful candidate must achieve, in tests devised by leading educators and psychologists, above-average ratings in personality, emotional control, life purpose, social adjustment, originality and leadership as well as in the qualities of mentality expected of a scholarship aspirant.

SELL PEANUTS AT LOW PRICES
 Hope of Receiving Living Price for Crop Given Up By Many Farmers

NOTICE OF SALE
 Notice is hereby given that under and by virtue of a power of sale contained in that certain deed of trust executed by Chris C. Keys, Jr., and wife, Elizabeth Keys, to the undersigned trustee, bearing date January 20th, 1919, and of record in book U-1, at page 186, of the public registry of Martin County, said trustee died having been given to secure the payment of a certain note of even date therewith, and the terms and stipulations therein contained not having been complied with, and at the request of the holder of said note, the undersigned will, on Monday, the 15th day of February, 1932, at twelve o'clock noon at the courthouse door of Martin County, at Williamston, North Carolina, offer at public sale, to the highest bidder, for cash, the following described tract of land, to wit:

YOU merely turn the switch for the correct amount of clean, instant heat, when you cook on an electric range.

This simple act illustrates the convenience of cooking electrically. Yet, it is but one of the many features which over 5000 of our customers now enjoy.

An electric range brings you cooking convenience because it simplifies your cooking... gives you freedom from your kitchen... cooking speed when you want it... and a mere wipe of a tea towel keeps it as clean as a china plate.

Your dealer will be glad to explain all these conveniences of cooking electrically... PLUS the many other features which increasing thousands of women are enjoying every day... thanks to electricity!

Growers of peanuts in this section have abandoned all hopes of receiving a living price for their 1931 crop, and are now selling heavily on a market that has for its top price 1-2 cents per pound for best bunch. The movement of peanuts within recent days has been heavier than at any time since the crop was harvested, and it is estimated that at least half or more of the crop has already been marketed.

Beginning at the Jones road in the Smithwick line, running thence along said line to Mulberry Branch, thence up said branch to the Hardison and Jones line, thence along said line to the road, thence along the road to the beginning, said to contain 50 acres, more or less, and being the same tract of land covered to George W. Powell by W. P. Powell and wife by deed dated February 1st, 1911, and recorded in the public registry of Martin County in book L-1, at page 29. This the 13th day of January, 1931. A. R. DUNNING, Trustee.

2,577,119 PIECES MAILED IN 1931
 Extension Service Mailings Reach New High Mark Last Year

NOTICE OF SALE
 By virtue of the power and authority contained in that certain deed of trust bearing date of June 19th, 1926, recorded in Book Q-2, at page 579, same having been given to secure payment of certain notes of even date,

During the year ending December 1, 1931, the mailings to farmers, teachers and field extension workers totaled 2,577,119 pieces from the division of publications of the Extension Service and Experiment Station at State College. This is a new high mark over the 1930 record, and shows an increase of 34,764 pieces, it was learned today through Farm Agent R. E. Dunning.
