Man Lost 26 lbs. Looks 100 Per Cent Better FEELS STRONGER THAN EVER

Just to prove to any doubtful man or woman that Kruschen Salts is the SAFE way to reduce—let us take the letter of Mr. F. J. Fritz, of Cincinnati, Ohio, recently received.

He writes: "I've tried extreme dieting, setting up exercises with very little results—but the results from Kruschen are almost incredible. In 3 months I reduced from 205 to 179 pounds and feel stronger than ever—no more wheezing or gasping for breath—friends say I look 100 per cent better."

Bear in mind, you fat men, that there is danger in too much fat—try the safe way to reduce—one-half teaspoonful of Kruschen Salts in a glass of hot water every morning—cut down on fatty meats and sweets—one bottle that lasts 4 weeks costs but a trifle—get it at Clark's Drug Store, Inc., or any drugstore in the world.

Home Club Meeting

Last Wednesday afternoon 22 members of the Macedonia Home Demonstration Club met at the schoolhouse and spent the afternoon canning, with Miss Sleeper as our guide.

Three steam pressure cookers and one hot water bath canner were used in canning about 30 quarts of vegetables, consisting of string and lima beans, soup mixture, squash, peas, corn, and okra. Only a short business session was held, at which plans for "Field Day" were made, which is to be held the 25th of August at the home of Mrs. Will Taylor.

One new member was added, Mrs. Jasper Griffin.—Reporter.

ONLY BEST COWS PAY THEIR WAY

Man Making Money Now is the One Who Knows How To Feed

The North Carolina dairyman making money on his herd at this time is the person who knows how to feed, how to cull low-producing cows and how to raise the best calves from the highest-producing animals. The best way to find out about these things is to have a cow testing or herd improvement association in the community.

Fred M. Haig, in charge of the State College dairy herd, gives five sound reasons why dairy farmers should associate themselves into such an organization. First, he says, a cow testing association takes the guess out of dairying and puts the herd on a business basis. Nothing will point out the low producing cows more quickly or accurately than a pair of scales and a Babcock tester. Second, by knowing what each individual cow is producing, the dairyman may cull out his unprofitable or boarder cows. A few boarders can soon place a herd in the loss column. Third, yearly figures will show from which cows to save calves so as to build up a high-producing herd. Fourth, members of an association receive benefits from buying and selling collectively. Fifth, the aid of the official tester will help the dairyman to feed his cows more economically and to cut down overhead expenses.

For three years, Professor Haig was tester for a herd improvement association which was composed of 24 dairyman owning 600 cows. During

CANNING LOWERS CHARITY COSTS IN MANY CASES

Number of Counties Buying Cans to Promote Welfare of Unfortunates

The place of the home and farm agents in the economy programs of the various counties is an important one because while one helps to produce food economically, the other aids in conserving this food for future use.

"I have been highly gratified at the important place given home agents in the present campaign against hunger in North Carolina," said Mrs. Jane S. McKimmon, state home demonstration agent at State College, on her return from visiting several counties where she was at work with the home agents. "Recently at New Bern, 450 women from five counties met and passed only one resolution which was to the effect that they lauded the stand for economy taken by county commissioners in the counties and felt that nothing was more important in such a program than to retain the services of both the home and the farm agents."

County commissioners, public-spirited citizens and others are buying cans, pressure cookers and sealers to aid the home agent in promoting efficient canning in the various counties, Mrs. McKimmon said. The home agents are training experienced leaders who are in turn aiding others. The welfare officers say that this canning program is reducing the charity bill.

As an example of this, Mrs. McKimmon gives information secured from Curry Lopp, welfare officer in Davidson County, who told her that had it not been for the 90,000 cans of vegetables and fruits saved by the farm women of that county last summer, he hardly knows what would have happened in the county last winter. Mr. Lopp had to buy no canned food and the county was saved many dollars in consequence.

In Pamlico County not a dollar was spent for food by the county because of home demonstration work.

Boll Weevil Prevalent On Farms in Halifax

Halifax County farmers report an abundance of boll weevil in cotton and the harvest of 30,000 pounds of crimson clover seed.

At this time the cows gained 24 per cent in their production of milk and 32 per cent in production of butterfat. The profit above cost of feed was \$97.52 greater per cow in the third year than it was in the first year. This increase was secured despite an increase in feed prices at that time.

Mr. Haig says the small cost to each dairyman in such an association makes the investment well worth while from the standpoint of money returns alone.

Skinny Men WHO THINK THEY ARE FAILURES

ought to take a tip from a certain bank cashier in Oklahoma. (Name on request.)

He used to be discouraged, too-tired, rundown, underweight, a nervous wreck. But he did something about it! And as a result, he gained 19 pounds—and a raise in salary! Just by taking a tablespoonful of mentha pepsin with his meals.

Mentha Pepsin acts like nature's gastric juice to draw out the good of what you eat and turn it into soft flesh, rich red blood and plenty of nervous energy—PEP! No stuffing, no tonics, no forcing down of heavy foods or "builders." Simply eat what you like and let mentha pepsin do the rest. You won't recognize yourself in a month's time—or even less! Be sure to get genuine mentha pepsin by asking for Dare's, Clark's Drug Store and other first-class druggists always sell it with a guarantee of money back if even one bottle doesn't help.

Don't TEASE flies...

KILL THEM

YOU might just as well tease an elephant with a shotgun as go after flies with weak methods. If you want to see flies drop dead—spray the air full of fine, clean Black Flag mist. The wonderful substance in Black Flag that kills insects (but can't hurt people or house pets) comes from rare flowers. It is Nature's own secret—quick, sure, safe. Use it on mosquitoes, or any other bug.

For crawling insects, like ants and roaches, Black Flag Powder gives best results. You shoot it into the cracks where the insects hide. It works the same as the liquid—knocks the bugs dead as dead can be. Every good druggist, grocer, hardware or general store sells Black Flag. It kills quicker—and costs no more.
