

SAYS COMMON LESPEDEZA IS BEST FOR HAY

No Great Deal of Difference Shown in Tests Held in Eastern County

The common variety of lespedeza made the best yield of hay per acre in a demonstration conducted on the farm of D. W. Bagley, of Moyock, Currituck County, by Farm Agent T. B. Elliott.

"All of the varieties used in the demonstration produced with in a few hundred pounds of each other, but the common was in the lead," says Enos C. Blair, extension agronomist at the State College, who had charge of the demonstration. "We planted the lespedeza in March on black land and cut it on October 3. However, the hay was not weighed until October 24, by which time it was thoroughly cured and dried. The weights show that the common variety produced 3,900 pounds of dry hay to the acre with the Tennessee 76 next with 3,580 pounds. Kobe was third with 3,490 pounds, and Korean fourth with 3,340 pounds.

This demonstration again proves that the so-called improved varieties can not always be depended upon to outyield the common. This latter variety makes less of a show than the others because of its low habit of growth. However, it often compensates for this by the greater number of stalks on the ground, Blair says.

The stems of the common variety are smaller than the others, and therefore all of it may be consumed in the hay.

Mr. Blair has conducted a number of field demonstrations with lespedeza all over eastern North Carolina this past season in an effort to popularize the crop among the crop farmers of that section and also to determine the most adaptable variety for hay, seed, and pasture. Some of these tests have been very valuable and indications are now that a considerable acreage will be planted on small grain next spring.

Wake Up Your Liver Bile —Without Calomel

And You'll Jump Out of Bed in the Morning Karin' to Go

If you feel sour and sunk and the world looks punk, don't swallow a lot of salts, mineral water, oil, laxative candy or chewing gum and expect them to make you suddenly sweet and buoyant and full of sunshine. For they can't do it. They only move the bowels and a mere movement doesn't get at the cause. The reason for your down-and-out feeling is your liver. It should pour out two pounds of liquid bile into your bowels daily.

If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You have a thick, bad taste and your breath is foul, skin often breaks out in blemishes. Your head aches and you feel down and out. Your whole system is poisoned.

It takes those good old CARTER'S LITTLE LIVER PILLS to get these two pounds of bile flowing freely and make you feel "up and up." They contain wonderful, harmless, gentle vegetable extracts, amazing when it comes to making the bile flow freely.

But don't ask for liver pills. Ask for Carter's Little Liver Pills. Look for the name Carter's Little Liver Pills on the red label. Request a substitute, 25¢ at all stores. ©1931, C. M. Co.

Did You Ever Stop To Think?

That Advertising Speeds Up Success?

Truthful advertising is nourishment that the people can easily digest, and will pay any business concern that uses it persistently.

Competition is keener today than it has been in years, and this makes it necessary for business concerns to pay more attention to the work that advertising does.

Truthful, persistent, advertising compels attention and always creates favorable impressions. It aids sales with its convenience, economy, and effectiveness.

Advertising is vital to the success of every business. Persistent advertising indicates quality and value and creates confidence in the minds of the buying public.

Quality goods well advertised sell and keep on selling.

Advertising builds business and, by increasing volume, cuts down overhead—nothing strange about that. It is being done everywhere.

For high quality at sane prices, advertised goods are best.
