**Gives Suggestions for the Control of Cabbage Worm**

Answering the question: "Is it too late to dust cabbages and collards with calcium arsenate for worm control," the State College Extension Division experts say:

"If the cabbages are well advanced it would be better to apply the Pyrethrum dust rather than the arsenate, but, if the arsenate is applied, there would be no danger from the poison. Either dust can also be applied to collards but, as the collard, is not headed as much as the cabbage, the calcium arsenate should be used.

**Stop Chills and Fever!**

**Rid Your System of Malaria!**

Shivering with chills one moment and burning with fever the next—that's one of the effects of Malaria. Unless checked, the disease will do serious harm to your health. Malaria, a blood infection, calls for two things. First, destroying the infection in the blood. Second, building up the blood to overcome the effects of the disease and to fortify against further attack.

Grove's Tasteless Chill Tonic supplies both these effects. It contains tasteless quinine, which kills the infection in the blood, and iron, which enriches and builds up the blood. Chills and fever soon stop and you are restored to health and comfort. For half a century, Grove's Tasteless Chill Tonic has been sure relief for Malaria. It is just as useful, too, as a general tonic for old and young. Pleasant to take and absolutely harmless. Safe to give children. Get a bottle at any store.

**TOBACCO FROM CANADA GOES TO ENGLAND**

**Rapid Progress Being Made By Canadians in British Market Development**

Canadian tobacco, grown in direct competition with tobacco produced in North Carolina, South Carolina, Georgia, Virginia, Kentucky, and Tennessee is rapidly making progress in the British market.

The commerce department's tobacco division reported that during the first half of 1933 deliveries of the Canadian product in the United Kingdom for home consumption amounted to 4,487,000. This is an increase of nearly 50 per cent over the same period for 1932.

Southern tobacco growers are indirectly responsible for this increase in favor of Canadian tobacco. All tobacco produced in Canada, the department said, is grown from seeds or plants produced in the south. Carolina tobacco farmers sell much seed stock to Canadian farmers.

For the most part, the department said, Canadian tobacco is planted, harvested, and cured by or under the direction of farmers from the states mentioned. These farmers journey to Canada each season under contract with Canadian land owners or manufacturers and take charge of the crop.

This development began in early nineteen hundreds and has gone on from year to year with increased momentum. Canada's production of tobacco in recent years has been more than ample to satisfy demands of the home market. Consequently, a growing export trade has developed, virtually all of which is with the United Kingdom.

**STATE DEBT NOW UNDER \$180,000,000**

**Cash Balance of Over Five Millions Is Shown on August 31**

Raleigh.—North Carolina's state debt has dropped under \$180,000,000, and there is a cash balance of \$5,806,836.96, as shown in the combined statement of the state auditor and the state treasurer.

The general fund, as usual, is up against it, but the state's great banking institution, comes to the rescue with its surplus. There was a cash overdraft of \$2,677,601.71 on July 1.

The receipts for the month were \$2,380,717.98, and disbursements \$883,113.51. That made August 31 a cash overdraft of \$1,129,909.24. But the highway fund had a cash balance of \$5,666,902.12 August 1 and gathered in \$2,688,411.58. It disbursed \$2,095,962.12. That left a balance of \$6,191,351.52 in actual cash. When the general fund debit balance of \$1,129,909.24 is subtracted, there is a net balance of \$5,806,836.96.
