

An Open Letter To

MARTIN COUNTY FARMERS

Know The Facts and You Will Find It to Your Advantage to Sell Tobacco In Williamston

Many false reports have been circulated against the Williamston Tobacco Market in a selfish effort to boost other markets. We earnestly ask every farmer to get the true facts before passing final judgment.

It is true that tobacco has been selling cheap on the Williamston market, but we are sure you'll agree that tobacco has been selling cheap throughout the belt. Quality for quality, and on a fair average, the Williamston Market has averaged just as much as any other market. Week in and week out, this market has sold tobacco just as high as the "biggest" market in the world.

While this market has abided by established codes, it is apparent that others have violated working agreements. Truckers have combed the country, BUT SOMEBODY MUST PAY THEM. Some few big farmers have been given favorable consideration on some other markets, but, Mr. Average Farmer, SOMEBODY HAS TO PAY THE BILL.

Williamston tries to treat every man as a man, offering special privileges to none, but fair treatment to all.

Williamston Sold Monday 163,111 Pounds at a Guaranteed Average of \$20.25

TOBACCO SOLD AS HIGH AS 67 CENTS A POUND, AND 50-CENT AVERAGES WERE REPORTED

We appeal to you to make Williamston your market, with the assurance that you will benefit greatly in the long run. You owe it to yourself to investigate the advantages and service we offer.
