

Cold starts must be **SAFE STARTS!**

DRIVE WITH
"frost proof"
TEXACO

The decision is yours! You have the opportunity of safely protecting your car with Crack-proof Texaco. Or, as one alternative, you can drive with a poor oil—and hope to get by! One glance at the illustration at the right tells the story. Texaco flows—poor oil "freezes"!

Keep your car safe. Use Texaco Crack-proof Motor Oil! Texaco is free from paraffin wax and other impurities that harden with cold. And most important—Texaco is crack-proof as well as frost-proof. Hot or cold—it's safe!

There's one sure way to save engine and money this winter. Say "Yes" when the Texaco man suggests you drain. Refill with Texaco Crack-proof Motor Oil.

Do This Yourself

If you have any doubt about the oil you're using—test it! The simple "hour glass" test shown above can be performed in any home refrigerator. Texaco flows at temperatures cold enough to freeze water solid. Poor oils harden with cold.

Say yes. DRAIN

Let Us
Be
THANKFUL

No doubt all of us have received, during the past year, countless blessings for which we should be thankful.

We are thankful for our friends, many of whom we have never seen. We are thankful for loved ones that surround us, and the opportunity of enjoying their companionship.

We are thankful for the nice volume of business received during the year from our old friends, and equally thankful to our new friends who have joined us this year.

We are thankful for the better outlook for the coming winter and for the prospect of less suffering in the immediate future.

We are thankful for health that permits us to carry on and improve our service to you.

The part you have played in making our thankfulness full measure is most deeply appreciated.

Naturally---

If You Use the
**Texaco Crack - Proof
Motor Oil**

You Will Want the
New Fire-Chief Gasoline

Delay may cost you money

Drive into your neighborhood Texaco Station today. Have the attendant drain summer-worn oil. Let him refill your crankcase with the proper winter grade of Crack-proof Texaco! Protect your car this winter with a real heat-proof—frost-proof oil.

Texaco is free-flowing—even on the coldest day! It flows with the first turn of the starter. But in addition—Texaco is crack-proof. It is heat-resisting!

What greater protection could you ask than to have Crack-proof Texaco in the crankcase of your car? Hot or cold—Texaco is always safe. Today—drain—fill with Texaco Motor Oil—then listen to a quieter engine.
