NOTICE OF SALE
 Under and by virtue of the power of sale contained in a certain deed of trust executed on the 10th day of June, 1929, by W. M. Bowen and wife, to the undersigned trustee, and of record in the public registry of Martin County in Book C-3, at page 28, said deed of trust having been made and given for the purpose of securing a note of even date and tenor therewith, default having been made in the payment of same and at the request of the owner of same, the undersigned trustee will, on Thursday, the 1st day of March, 1934, at 12 o'clock m., in front of the courthouse door in Williamston, North Carolina, offer for sale to the highest bidder, for cash, the following described real estate, to wit:
 Bounded on the north by W. M. Bowen, on the west by E. S. Peel, southwest by John M. Bowen and G. W. Blount, and on the east by new road leading from Eason Biggs land to the land now owned by W. M. Bowen, containing 100 acres, more or less, being a part of the land deeded by R. S. Price to W. A. Everett, and being the same land deeded by W. L. Askew and wife to Farmers & Merchants Bank.
 This the 30th day of January, 1934.
 JOHN D. BIGGS,
 Trustee.

EASY PLEASANT WAY TO LOSE FAT

How would you like to lose 15 pounds of fat in a month and at the same time increase your energy and improve your health?
 How would you like to lose your double chin and your too prominent abdomen and at the same time make your skin so clean and clear that it will compel admiration?
 Get on the scales today and see how much you weigh—then get an 85-cent bottle of Kruschen Salts, which will last you four weeks. Take one-half teaspoonful in a glass of hot water every morning, and when you have finished the contents of this first bottle weigh yourself again.
 After that you'll want to walk around and say to your friends—"One 85-cent bottle of Kruschen Salts is worth one hundred dollars of any fat person's money."
 Leading druggists America over sell Kruschen Salts—You can always get it.

FORD POWER UP BY 12 PER CENT
 District Manager Reports Tests Also Show More Miles Per Gallon

"Those old standbys, power and economy, are still red-hot topics in automobile circles," claims Mr. J. H. Wood, jr., manager of the Norfolk branch of the Ford Motor Company. "Even those most concerned with new body design and gliding ride features are paying tribute this year to the amazing performance achieved by the Ford V-8 type, 8-cylinder engine."
 "The Ford V-8 for 1934 touches a new height in smart, stylish streamlining," Mr. Wood continued. "Its riding comfort marks a decided advance. But outstanding are its refinements in the power plant."
 "Actually the new Ford V-8 for 1934 delivers 12 percent more power at the same time offering greater operating economy. Tests have proved that it gives substantially more miles per gallon than previously."
 Mr. Wood mentioned the 132,000 total miles of test driving of 1933 Ford cars, carried on all over the country under all sorts of highway and climatic conditions, and which establish an average of 18.5 miles per gallon. "Tack on another two to three miles," he added, "and you have about tops for economical operation."

New dual down-shaft carburetion and the new dual intake manifold are given as the prime reasons for these Ford V-8 results.
 "The clamor for easier riding," Mr. Wood commented, "will be stronger than ever this year, because at last automobile manufacturers are telling their public how dissatisfied they should be with old-fashioned wheel action. Don't misunderstand me—independent wheel action, attained without sacrifice of sturdiness and safety is certainly desirable. But it is hardly new. Ford cars have had it for years through their basic principle of transverse cantilever spring suspension."

"And Ford cars," Mr. Wood continued, "have long had this independent action on all 4 wheels, not just on the front wheels. The resulting ease and comfort are observable the moment anyone takes a Ford V-8 out on the road."
 "The rougher the road the more remarkable is the observed result. Ford dealers report tremendous interest in a simple demonstration in which diagonal wheels of the Ford V-8 for 1934 are alternately pressed upward while its body remains in level position."
 Some other features of the Ford V-8 for 1934—which comprise as many as 29 important changes and refinements—are a new chromium-plated radiator grille, deeper and wider seats of long-wearing upholstery, new brilliant enamel finish and the clear vision ventilating system.

According to Mr. Wood the last named improvement captures the fancy of all who see it. "Ford ventilation is a one-motion system. There's just the regular window handle, only—here's the peculiar thing about it—after you turn the window to a closed position you can give the handle, an extra half turn. This moves the window glass slightly backward, permitting all the ventilation you need."
 "There's no draft. There's no division in the glass causing a blind spot, either—that's why this Ford development is called 'Clear Vision' ventilation."

ALREADY wages in rubber factories have been raised while rubber and cotton are costing more . . . If you're going to need new tires this Spring, our advice is: get them at once—a whole set!

Phillips' Veri-Best Fertilizers

If you have used this brand of fertilizers in the past, you know from experience why it grows better crops. If you have not used it, you naturally want to know why it will pay you to use it this year. It is formulated from high grade materials and in addition to nitrogen, available phosphoric acid, and potash, it contains the proper amount of lime and magnesium. Magnesium prevents sand-drown and your tobacco plant is a heavy feeder of lime; therefore, lime is a very important element in your fertilizer mixture. Phillips' Veri-Best Fertilizers give you extra value at no extra cost.
