**MR. AND MRS. ANDERSON ENTERTAIN BETA CLUB**

Principal and Mrs. Anderson entertained the Williamston High School Beta Club at its last regular meeting, Tuesday, February 9. The club is planning to have a dance soon in order to raise money.

The Beta Club was organized during the current term with six char-

ter members, Mary Helen Boykin, Addie Lee Meador, Grace Chesson, Elva Grace Barnhill, Reg Manning, and Wilbur Culpepper. To become a member one has to make an average of 85 or above and possess the quality of loyalty, courage and leadership. Three new members have recently been added, Bernice Ward, Whit Purvis, and E. G. Wynne. Miss VanDyke is sponsor of the club.

The local club chose as its project to sponsor a playground activity period every day at lunch. This project has proved to be very successful, but due to bad weather, it has been discontinued. At the present the members are raising money so that they may be represented at the convention.—Mary Helen Boykin, reporter.

**HIGHFIELD - ROSS**  
Mr. and Mrs. John Congleton announce the marriage of their niece,

Miss Frances Ross, to Mr. Charlie Highfield, Saturday, February 6, 1937, in Tarboro.

Mrs. Highfield is the daughter of Mr. Charlie Ross, of near Greenville, and the late Mrs. Ross. She has made her home in Robersonville with Mr. and Mrs. Congleton for several years. She received her education in the Robersonville schools and is very popular among the younger set.

Mr. Highfield, of Newcastle, Ky., is a tobacco auctioneer. He was on the Robersonville market for two years before going to the Williamston market last season.

**THE 25-MILLIONTH FORD HAS JUST BEEN BUILT**

IT HAS never occurred before in automobile history that 25 million cars of one make, bearing one name, have been manufactured under one management. The 25,000,000th Ford car rolled off the Ford Rouge Plant production line on January 18, 1937.

25 million cars since 1903... more than one-third of all the cars ever built... enough cars to transport the entire population of the United States.

The figures represent a remarkable contribution to the social welfare, the industrial stability and the general progress of our country.

People respect Ford efficiency. They know Ford uses fine materials, the best workmanship at good wages, the most exact precision measurements. They know these things are passed along to purchasers in the form of extra value. Naturally, they like to do business with such a company. That is the only reason it has been required to produce 25 million cars. Naturally, too, they expect more of a Ford car, more this year than last year—more

each year than the year before. They have every right to. The experience gained in building 25,000,000 cars enables Ford to produce today a really superb motor car at a really low price—with the Beauty, Comfort, Safety and Performance of much more expensive cars.

The 1937 Ford V-8 combines advanced design, all-steel construction, extra body room, and brilliant brakes with a choice of two V-type 8-cylinder engines—the most modern type of power-plant on land, sea, or in the air.

The 85-horsepower engine provides top performance with unusually good economy for its high power.

The 60-horsepower engine gives good performance with the greatest gasoline mileage ever built into a Ford car—and wears the lowest Ford price tag in years.

People expect more of a Ford car because it's a Ford—and they get more, for the same reason. It is undeniably the quality car in the low-price field.
