

Distilled

to keep your engine clean

You can't take chances with lubrication in the modern motor. Constantly narrowing clearances and ever increasing speeds make heavy demands for perfect lubrication to reduce wear.

Havoline is the motor oil that will do this. *It is 100% distilled.* The tarry impurities present in all crude oils are left behind.

When you buy Havoline you get an oil that cannot form the hard carbon so injurious to automobile motors. It does not tend

to form sludge. In other words, it keeps your motor clean.

Your Goodyear-Wende Texaco Dealer has a Havoline lubrication chart showing you how to get perfect lubrication. Have him change your oil, now . . . to Havoline.
