

Bargains Galore in Williamston on March 7th, 8th and 9th

Sixteen Local Firms Feature Dollar Days

Hundreds of Trade Bargains Listed By Firm in Advertisement

The Belk-Tyler Company, figuring prominently in Williamston's dollar day event on Thursday, Friday and Saturday of this week, carries an interesting message for thrifty shoppers in this section. Manager Charlie Bowers explains that only a small portion of the super bargains could be listed, but adds that hundreds of other bargains, equally as attractive and valuable, would be found in the large Belk-Tyler store during the special three-day shopping day event on March 7, 8 and 9.

Sponsored by the Williamston Chamber of Commerce, the three-day event is part of a movement to acquaint more people with Williamston as a shopping center. Plans have been underway for quite a while to make the dollar days really mean something, to share with thousands in this section sizable savings, and to prove Williamston is a reliable, convenient and advantageous shopping center.

Anticipating the event weeks ago, the Belk-Tyler firm along with other merchants in the town has made many special buys just for the three-day trade event.

Special attention is directed to the Belk-Tyler list of bargains, and readers are asked to remember that hundreds of others, equally as attractive will be found in the large Williamston store, where the management and every employee are cooperating 100 per cent in the community dollar day event.

Make your plans now to visit Williamston and share in the numerous dollar day bargains on Thursday, Friday and Saturday, March 7, 8 and 9th.

MOTIVE

Forgetting profits and costs to them, Williamston merchants are making extensive preparations for the biggest dollar-day trade event in the history of the town. Prices have been slaughtered to bring the figures down to an even dollar, and the profit motive has been virtually lost. No greater bargains have ever been offered.

The motive behind the dollar day event is to prove to increasing numbers that Williamston is an ideal shopping center, one that offers dependable merchandise under convenient and advantageous circumstances.

Control Of Sweet Potato Diseases

There is little excuse for damage from the four major sweet potato diseases—stem rot or wilt, scurf, black rot and root knot or big root—says Dr. Luther Shaw, Extension plant pathologist of State College. Practical, economical and effective control measures have been developed for all four diseases, and not even the home gardener should suffer, Dr. Shaw declared.

The first and most important control measure is to select healthy potatoes for bedding. Then, all seed potatoes should be treated by soaking for 15 minutes in a mercuric chloride solution prepared in the proportion of one ounce of mercuric chloride to eight gallons of water. The water should be heated to around 100 degrees Fahrenheit, and the potatoes should be allowed to dry and should be bedded without washing.

If potato slips are to be transplanted on land known to harbor the wilt or stem rot fungus, the root ends of the slips should be immersed in a Bordeaux mixture, prepared by mixing 1 pound of copper sulphate (blue stone) and 1 pound of lime with 2 1-2 gallons of water.

Where the scurf disease is present in the soil, the roots of the slips should be dipped into a bag of sulphur and transplanted immediately. When both wilt and scurf are present, Dr. Shaw advises the use of Semesan Bel.

There are resistant varieties to control the black rot and root knot diseases.

The Extension specialist offered to supply complete information to any grower who writes him at State College, Raleigh.

Movement Is Underway To Increase Lespedeza

The Polk County Agricultural Conservation Association committee has started a movement to get every farmer possible to sow at least 100 pounds of lespedeza seed this spring. The association is endeavoring to take a reasonable supply of these birds.

Parrish also explained that as the egg supply becomes more plentiful at this season of the year, prices begin declining. In order to make profits during this period, careful management and close culling must be practiced. Too many growers, he said, lose interest when prices drop and tend to neglect their layers.

Hunting Season In County Reviewed By Warden Abbitt

Declares Game More Plentiful Now Than at Any Time In Number of Years

Declaring the recent hunting season was fairly successful, Game Warden Bill Abbitt stated today that game was more plentiful in Martin County now than ever before. The carry-over of birds and turkeys is believed to have set a new record, the warden explaining that unfavorable weather conditions during much of the hunting season kept hunters out of the fields and woods.

It is estimated that sixty turkeys were killed during the season, that hardly more than 100 deer were taken. The squirrel bore the brunt of the hunter's attack, the warden stating that thousands of the little nut crackers fell before the sportsman's gun. The rabbit had a fairly difficult time between the hunter and the fox, Warden Abbitt stating that the reynard was about to put the cotton tail out of business, "and he is doing much damage to game birds," the warden added.

Recognizing the damage done by the fox, game authorities have no closed season for taking the animal in this county, the warden explaining that the fox hunter is doing a good work when he runs the sly animals down.

Last March, the Department of Conservation and Development released sixty turkeys, one report stating that one old hen had raised twenty young ones and carried them through the season despite the gun. Forty more wild turkeys will be turned loose during the next few days between Dardens and Palmyra.

A splendid observance of the hunting laws was reported in the county during the recent season, the warden stating that few were caught and called to answer for hunting out of season. Twenty-two were carried into the courts for allegedly hunting without license. Fourteen other hunters were prosecuted for taking more than the legal bag limit and for hunting with automatic shot guns unplugged.

"If forest fires can be eliminated and if the fox hunters continue an effective work, next season should see an abundance of all types of game in this county," Warden Abbitt added.

Poultry Population Slated For Increase

North Carolina is standing on the threshold of another great poultry year, according to C. F. Parrish, extension poultryman at State College.

The output of baby chicks has been increasing steadily in the past few years, resulting in a plentiful supply of broilers and fryers. Last year, Tar Heel poultrymen started approximately thirty million baby chicks.

"We must depend on North Carolina and other nearby markets to handle the poultry supply produced in this State," Parrish said. "It is not practical, in most cases, to ship broilers and fryers to distant markets because of shrinkage and competition."

At the present time, the State College poultryman said, there are markets in this State that can use more live and dressed poultry, since they have encountered trouble in establishing steady year-round supplies.

From November until spring, the demand for broilers and fryers is usually weak due to competition from fresh pork, hens and turkeys. As a result, present low prices will not begin to pick up until the first part of the spring. However, the consumption of broilers and fryers is increasing each year in North Carolina, and the market will continue
