

4-H Club Members Wear Distinctive Uniforms In State

Wider use of the distinctive 4-H Club uniforms is being urged by L. R. Harrill, 4-H Club leader of State College. All members attending the annual 4-H short course at State College 22-27 will be required to wear uniforms.

Miss Willie N. Hunter, extension clothing specialist, and her assistant, Miss Julia McIver, have designed the North Carolina 4-H uniforms, which are of the same general style as used in all other states.

The girls' uniform consists of green broadcloth, with white collar and facing, green thread, white simulated patent leather belt, slide fasteners, and white pearl buttons for cufflinks. A white hat and a pair of comfortable white walking shoes complete the outfit.

The boys' uniform is a white shirt, white duck trousers, black shoes, black tie and black belt.

Many girls make their uniforms as a part of a clothing project, although this is not a requirement.

Harrill insisted that 4-H members wear their uniforms at outstanding events. The calendar of club events for 1940 starts with leaders' training schools at the Millstone 4-H camp May 7-11, at a place in Eastern North Carolina yet to be designated May 14-18, and at the Swannanoa 4-H camp May 21-24.

The State Older Youth Conference will be held at State College June 4-8 and the National 4-H camp is scheduled in Washington, D. C., June 12-19. Following the short course, the Wildlife Conservation Conference will be held August 27-31, and the State Dress Review at State College on October 4. The State Fair, in which 4-H members participate, will be held this year October 8-12.

Eggs Are Cheap Now And Always Healthy

Next to milk, eggs are the most perfect single food. "Eat eggs for health halways, and eat eggs for an economical dish at this season of the year," advises Miss Sallie Brooks, assistant extension nutritionist of N. C. State College.

The home economist endorsed the "Springtime Egg Festival" which is being conducted this week by producers and consumers, with the support of thousands of merchants, including the Southeastern Chain Store Council. Another period of the festival will be the week of April 11-18.

Miss Brooks pointed out that more than half of the total egg crop of the year is produced in March, April, May and June. "When production is at the peak, prices quite naturally are at their lowest, so that the family can now revel in eggs—have them in some form at every meal," she said.

Citing the nutritive value of eggs for persons of all ages, Miss Brooks said: "Of all the natural foods, eggs are the best source of vitamin D with the exception of fish oils. For this reason, children who are given eggs from infancy are better fortified against rickets than those who do not have them.

"Eggs also provide vitamins A, B and G, and they are an excellent source of iron, and a fairly good source of calcium and phosphorus. The protein and fat in eggs are easily assimilated by the body."

As a suggestion on egg cookery, the nutritionist pointed out that high temperatures make the white of the egg tough. When the egg is boiled, the part where the white and yolk come together often develops a dark green color. This may be decreased, if not eliminated, by cooking the egg in as short a time as possible, and by cooling at once under water.

His Children Safe

With a smile of unrestrained joy, John Niemela, of Bark Point, Wisc., awaits the arrival of his two children, Ruth, 11, and Paul, 8, who were stranded in Finland. Niemela was forced to leave them behind when depreciated currency left him only enough for his own return. The state department is paying for their passage.

Peace Situation Is In Uncertain State

The peace (if it can be called peace) that nominally ended the "northern branch" of the European war last week has not only left the general peace situation as unpredictable as ever, but also seems to give no definite clue to how business on this side of the water is to be affected. For one thing, the U. S. will continue its "moral embargo" against the Soviet, to discourage future aggression. No U. S. airplanes, aviation gas, or copper for the Reds. Business generally is clinging to the strategy of keeping commitments on a short term basis because of the complete uncertainty of both domestic (political) and foreign (military) developments.

Nevertheless, the earth keeps turning, and spring keeps getting closer. That means spring selling campaigns are being launched. Advertising budgets generally are 5 to 10 per cent larger than for the 1939 drive, although they, too, are mostly short-term. Automobiles, foods, electric appliances and drugs and toilet goods are leaders in the spring business push-over here.

Interesting Bits Of Business In U. S.

Steel production leveled off, even went up a tenth of a point, after two months of sinking, but the experts say it isn't really significant—the export market is the only outlet that looks very lively, and you know how that ma wobble as the war wavers around. . . . Full suit prices of manufacturers may not see any additional rise beyond the 75 cents to \$1.25 boost given on spring suits, although prices on fall worsteds are expected to be 25 to 30 cents a yard higher than a year ago. . . . Oranges, lemons and grapefruit yields for this year all will be lower, the Department of Agriculture forecasts, the midwinter freeze damage to Florida Valencias now wappering more severe than at first thought. . . . The swim suit industry is looking for a good year, with production so far 65 per cent ahead of 1939 at the same stage—by units, that is, whether the total yardage of goods will expand similarly is doubtful, considering the trend in swim suit fashions for several years.
