Ladies Spend Your Money With Home Merchants

This is yet a free country. Each individual has personal liberties and privileges that entitles him or her to trade where one pleases. However, before you spend all your money out of town shopping, take into consideration that your father or your husband is dependent upon local business for a livelihood. Many professional men and their wives buy scarcely anything in Williamston for they send their money out of town, much of which goes to the mail order houses. A rule or custom that does not apply to but one individual, does not seem just right. The merchant, as a rule, usually pays his bills and does not complain a great deal about it. In many instances, the very money he pays the professional man or laborer goes out of town or to mail order houses for merchandise. Your local merchants and business men need and deserve your business.
