Add Nitrogen To Soil

Pork Consumers Want Lean Meat

Mr. and Mrs. Average American want and insist upon small lean cuts of pork, says Prof. Earl H. Hostetler, animal husbandman of N. C. State College. "They don't want lard, when they buy pork," he declared.

The desirable type of hog to produce now, as always, Prof. Hostetler said, is a fast-growing, easy-feeding, prolific type that will yield desirable cuts of pork at live weights from 200 to 240 pounds. To produce such a hog requires proper feeding, including adequate amounts of protein to build muscle and lean 1 eat, and to aid growth.

"Because swine are fed chiefly on grain, which tends to produce fat, particular care is needed to provide

Interesting Bits Of Business In the U.S.

The 10 per cent fare rise the I. C C. is allowing the railroads will be particularly helpful to the New York Central, Pennsylvania Lines and the New York, New Haven and Hartford-roads getting the highest proportion of their revenues from pas-senger fares, partly on account of huge suburban traffic . . . At least two roads—the Chicago and Northwestern and the Boston and Maine —are installing bicycle racks at suburban stations for the use of commuters . . . A power company in Marion, Ohio, is equipping its meterreaders with bicycles, and the Elk-hart (Indiana) Truth is doing the same for its reporters . . . Carrier Corporation (air-conditioning) is dedevoting practically all its energies now to war output, but expects lessons learned under war-time stress to lead to many yet-undeveloped peacetime applications "after."

Miss Dot Manning visited relatives in Raleigh over the week-end.

sufficient protein of the right quality in their ration," the State College leader advised. "Important as they are in hog rations, none of the cereal grains furnish protein of good quality. It is necessary to use efficient protein supplements."

Prof. Hostetler pointed out that North Carolina produced approxi-mately 90,000 tons of cottonseed meal from the 1941 cotton crop. "In this material," he said, "hog raisers have available a protein supplement of proved efficiency when used in com-bination with tankage or fish meal. "It is especially valuable to reduce

costs of protein supplement used with grains, to produce firm pork, and to aid in providing properly balanced, efficient and economical ra-tions for swine of all ages.

"Selection and use of a good pro-tein supplement is usually the most important factor in swine feeding. Results from the N. C. Agricultural Experiment Station show that a mixture of animal and plant proteins makes an excellent supplement to

YOU DON'T HAVE TO BE RICH to help American Defense. That's the theme of the above poster, one of the newest of the Defense Savings promotional pieces now going up in streetcars, on bulletin boards, and at other public places. This poster emphasizes the point advanced by the Treasury Department that every American can—and must—pitch in if the United States is to have the arms and the tools necessary to protect her freedom.

Commandos Return After Raid

Men of a British Commando, which staged a successful raid at Vaagso Islands off the Norwegian coast, return to their ships after the raid. They also raided Maaloy Islands. The operation resulted in the destruction of 15.650 tons of enemy shipping, fuel and war materials.

Interest In Forestry Is

THE INDIANS HAVE A LEGEND EXPLAINING HOW THE RED BIRD GOT ITS COLOR . . .

The original American, the red man, has contributed much. States, towns, and rivers, including the Mississippi, bear Indian names. Their legends enrich our literature.

The story of how the red bird got his color is fascinating. An Occoneechee maiden, daughter of the chief, was beautiful. Her name was Ulalee. She loved the birds, and they followed her.

Of her many suitors, Ulalee loved one; but her father promised her in marriage to an Occoneechee war

rior named Oneluska. One day, while at a spring located near the site of Hillsboro, a young Tuscapora warrior, Kanandagea, came by on his way to fight the Catawba. He was as noted among his people for strength and manliness as Ulalee was for her beauty. Kanandagea washed the war paint from Indian princess. He was successful; and also won the affection of her

many feathered friends.

When Oneluska learned that his betrothed loved the Tuscarora brave, Ulalee feared he would kill the vis-iting warrior. Kanandagea urged her to leave with him at once. She agreed to meet him at the spring the folowing day, after seeing her people

She arrived early. Oncluska followed her. He accused her of being false to him. According to Indian custom, he said that an engagement was the same as legal marriage, and thus she should die. He drove knife into her heart and left her by

he spring. The blood from the wound flowed into the spring and colored its waters. The birds were alarmed and made loud noises. One male bird jumped into the spring and was colored by the red waters. His mate stood on the bank and sprinkled drops of the bloody water on her breast and the tips of her wings. That is how the Indians explained the color of the red bird.

Kanandagea demanded justice, and there was a trial. The chiefs agreed with Oneluska, but informed the disappointed Tuscarora warrior that he could appeal to the Great Spirit through a duel. Such was ar-ranged and Kanandagea won; One-

luska was slain.

After Ulalee's death, Kanandagea had no heart for warfare nor any desire for returning to the Tuscarora tribe. His request that he be admitted to the Occoneechee tribe was granted. He made a wigwam in the forest and lived a hermit life, be-coming as close a friend of the birds as his sweetheart had been. When he died, he was buried by the side of his lover; and in the vicinity of the spring red birds can still be heard calling "Ulalee-e-e."

Color Plays No Part In Registered Jersey Cows

Fred M. Haig, professor of dairying, says while it is true that most registered Jerseys are of a solid col-or with no white, the presence of white on a registered animal of this breed does not indicate any impurity of breeding. In fact, many breeders prefer some white, as it gives their animals a "flashy" appearance. Nothing is said about color in the rules of registration for Jersey cat-

Mr. S. D. Jenkins, of Roberson ville, was in town Saturday. Be-fore leaving Mr. Jenkins called at this office and renewed his subscrip-

tion for another year.

Rev. R. R. Willis, Presiding Elder, of the Warrenton District, will preach in the M. E. Church Saturday mornmg at 11 o'clock, also Sunday morning and night. This is Mr. Willis first time in Williamston and a large crowd is expected to hear him.

Nearly all the fencing has been removed from around the "Hassell Field," recently purchased by the Williamston Land and Improvement Company. The Commissioners are xpected to begin work on the new treets pretty soon.

Eight lots have been sold to date. At the annual meeting of the stockholders of Williamston Telephone Co., held Tuesday afternoon, W. C. Manning and Jos. G. Godard were re-elected as president and secretary and treasurer respectively and Mr. N. T. Riddick was elected general manager. The directors declared a

court house. There was a very large attendance and everything passed off pleasantly. The financis are in good shape and the company is better prepared for work than before This is a good thing for the farmers and it is pleasing to know that so many are taking advantage of its opportunities. There are several hundred members in this company.

DOLLARS AND SENSE WILL BUILD OUR DEFENSE.

In the great national effort we are undertaking today, two factors of vital importance are materials for industry and conservatism on the part of the individual. It takes good old common sense to buy wisely so that your dollars will go where they will be of the most use. It takes judicious saving to put money at the disposal of our government. So, for national defense, make the most of your money by saving for and purchasing Defense Savings Bonds and Stamps.
