HINTS FOR HOMEMAKERS

By Irene James, Home Service Director, Virginia Electric And Power Company

"SEASON TO TASTE"
Individual flavor preferences are more important in seasoning than exact amounts and level measurements. But remember this refers to seasoning only and the rest of the recipe must still be followed accurately for the best and duplicated results.

If "Variety is the Spice of Life" we must put more spices in foods and not be afraid to venture into unusual and intriguing flavors.

Nutmeg on rubarb and raw bananas gives these fruits an alluring flavor.

Ginger sprinkled on pears is quite sensational.

Sage rubbed over any kind of pork is delicious and so, on and on we can sprinkle spices into foods which not only give an added interest, but also stimulate the secretion of the gastric juices and so help digestion.
