## If You Aren't Fighting – Plant PEANUTS

### A MESSAGE TO THE PEANUT FARMERS—

The Government needs more vegetable oil to fight the war. We cannot import coconut and palm oil as in the past. Our Allies are looking to us for food . . . especially oils and fats. Farmers are being asked to grow peanuts and soybeans to supply this oil.

The farmers of Martin County were assigned a minimum goal of 11,000 acres of peanuts and 3,000 acres of soybeans for oil. They have more than met the soybean goal. They lack 5,000 acres of meeting their peanut goal. Can we afford to say the farmers of Martin County failed in their first big assignment to help win the war?

The Government has made seed available at very reasonable prices . . . Either for cash or credit, with the notes payable December 1st in cash or peanuts. Anyone who will plant them can get the seed . . . Just see or write the County Agent.

*Don't Let Your Land Lay Idle!*

#### PLANT PEANUTS FOR VICTORY!

1,000 Pounds of Peanut Hay

— Plus —

1,000 Pounds of Peanut Meal

— Equals —

In food value—25 bushels of corn. You can grow the above amount of peanut hay and meal . . . and probably more, on one acre of land. You could not possibly grow on the sandy type of soil you would use for peanuts that large an amount of corn . . . Therefore, it's more profitable to grow peanuts.

One hundred bags of peanuts have arrived and more will be ordered if needed. Place your order today so Martin County can fill its quota.

Your government has made provision for putting pickers in every community where there is need to pick these peanuts. Your government has guaranteed a minimum price for your peanut crop to insure you against loss.

Your government wants you to plant peanuts for oil . . . It is up to the farmers of Martin County to do their part.

Make your plans today to plant your share of these peanuts. It is your patriotic duty.
