

Junior Martins Win Over Powellville

The Williamston Junior Martins won another game by a 5 to 1 score over a strong Powellville team, which has been undefeated for two seasons.

Garland Wynne, hurling for the Martins, held the visitors to eight well scattered hits, while the Martins gathered nine long safeties off Ted Miller, former Williamston Martin hurler.

The leading hitters for Williamston were Fenner Wallace, with a triple and a double, and Sonny Boy Wynne, with two for two.

The batteries: Junior Martin: G. Wynne and H. Wynne; Powellville: Miller and Johnson.

The Junior Martins and Bear Grass All-Stars will meet on the local diamond Sunday afternoon. The exhibition is slated to get underway promptly at 3:30 o'clock, and a large crowd is expected to turn out for the affair.

Navy Sub-Chasers In Mass Production

Far from the ocean-prowling U-boats whose extinction soon will be their assignment, Navy sub-chasers are to be turned out, ultimately at the rate of one a week, by the Pullman-Standard Car Manufacturing Company's new shipyard now rising on the shore of Lake Michigan near Chicago. These will be the first all-steel anti-sub patrol craft built in the mid-west. Other Great Lakes yards are turning out the regular wooden ones, 110-footers, but the Navy needed a company with long experience in working heavy steel, and these 50 sleek, diesel-powered avengers will be built by workers who in peacetime pioneered modern streamlined trains. Although almost all present employees of the car works will work on the ships, several thousand men will have to be engaged from outside and trained in shipbuilding crafts. It was pointed out that many skilled workers, including welders, riveters, electricians, pipe and frame fitters, sheet metal workers, joiners, painters, plumbers and cabinet makers are readily adaptable to shipbuilding.

Retail Trade Shows A Steady Decrease

Apparently we've reached the stage where still-expanding industrial production—almost all of it war work—can no longer produce similar gains in retail business. While heavy production hums, re-

En Route to Blitzed Britain

Comm. Ying Tsung Chow (left), Chinese naval attaché to London, and Maj. John P. Y. Hwang, air attaché to the London Embassy, are shown with Hwang's baby, Howard, in their New York hotel. They recently arrived from China, en route to their posts in England. Maj. Hwang has been fighting with the Chinese Air Force since the start of the war with Japan. He is credited with knocking down nine Jap planes.

Food Supply Will Be Largest On Record

Barring unpredictable developments, the total food supply this year will be the largest on record, according to a statement made by the U. S. Department of Agriculture. Farmers indicate their will plant record acreages of many crops. Production of milk and eggs is rising in seasonal volume. Marketing of livestock is also expected to increase in coming months.

A summary of the situation by the Bureau of Agricultural Economics shows that both the production and consumption of food will set new high records this year, provided all production and marketing goals to meet the war needs are reached. Consumer and Government demand for farm products continues to rise, yielding farmers higher prices and income. Costs of agricultural production also are rising—notably farm wages—but net returns to farmers have been larger to date this year than last.

Biggest acreage increases this year will be in oil crops—peanuts, soybeans, and flaxseed. While goals for peanuts and flaxseed may not be met, the soybean goal may be exceeded. Larger acreages of feed crops also are being planted to maintain feed supplies in abundance for conversion into increased quantities of milk, meat, eggs and other livestock products. Bigger acreages of food crops indicated include rice, potatoes, sweet potatoes, dry beans, sugar beets and truck crops.

The 1942 wheat crop may total 795 million bushels, to be added to a carry-over of 630 million bushels on July 1st next. The total supply would be enough to take care of domestic needs for two years. Wheat transportation and storage facilities will be taxed in handling the new crop. The carryover of cotton is likely to total 10 million bales, and to this will be added a crop from a larger acreage than in 1941.

Some 600 million bushels of corn

will be in the carryover supply of feed grains this year, and to this will be added the crop from more than 91 million acres of corn farmers report they intend to plant this year. Good yields of corn and other feed grains would result in a supply of feed next fall and winter more than ample for increased numbers of livestock on farms at that time.

The large pig crop produced last fall is coming to market in increasing volume now, and a big spring crop is in prospect. Slaughter supplies of hogs during the next six months will be 15 to 20 per cent larger than during the like period in 1941. But the market supplies of fed cattle will be smaller this spring and summer than last, and fewer early lambs and grass-fat yearlings will be marketed prior to July 1 this year than in the same period of 1941.

Production of milk continues to set new high records. An increasing proportion of the production is being manufactured into concentrated products. Production of evaporated milk and cheese has been up to current requirements, but a considerable additional expansion is sought in the production of dry skim milk. Foremost is that prices received by farmers for whole milk at wholesale are likely to be considerably higher than a year earlier during most of 1942.

Production of eggs was much larger this winter than last, and is rising now in seasonal volume. The total output this year may exceed production goals calling for an increase of 13 per cent in 1942 over 1941. Supplies of poultry meat this year will be the largest on record. Six to 10 per cent more chickens and turkeys will be raised on farms this year than last, and the output of commercial broilers is expected to set a new high record.

Potatoes and other fresh vegetables should be in larger supply this year than last, and a high record pack of canned vegetables is being planned by processors.

Pvt. Seth Davis, of the F.A.R.C. Dental Clinic, at Fort Bragg, visited his parents over the week-end.

Rules of the Road . . .

NO PASSING AT INTERSECTIONS

Sec. 109, Motor Vehicle Laws of North Carolina—"In crossing an intersection of highways or the intersection of a highway by a railroad right-of-way, the driver of a vehicle shall at all times cause such vehicle to travel on the right half of the highway unless such right side is obstructed or impassable."

In other words, it is unlawful to pass another vehicle at any highway intersection or railroad grade crossing.

Reports Big Savings In War Production

United Aircraft, which itself has passed back \$26,000,000 in savings on government war jobs after achieving mass-production economies, reports further savings in voluntary kick-backs from its subcontractors, one of which is cutting the price \$2,250,000 on one airplane engine part alone.

Tea
The Government has ordered tea supplies to wholesalers limited to 50 per cent of the amounts handled in the same period in 1941 because of difficulties of getting this product from tea-producing countries.

WANT A REP FOR BEING HEP?

You'll get a reputation for being a knowing fellow, indeed, if you stick to Carstairs White Seal whiskey. This Perfectly Balanced Blend has the gift of pampering educated palates. It was created expressly for "The Man Who Cares", by Carstairs—a name of character since 1788.

My country 'tis for me
'Tis me for my country.

Be I wise man, or be I fool, I hope I'm wise enough, not to be fool enough, to pit my sparsely gained wisdom against the expertly attained knowledge of Mr. Roosevelt and his corps of advantageously positioned fact-finders and advisers.

"Take time by the fore-lock," says the wise-man. Take time by the tail, says the fool. Time that is lost, is time that is tossed to the wasting of the winds and the walls.

Hitler, Tojo, Mussolini; Three of a kind. Roosevelt, Stalin, Churchill, Chiang, Four aces, mine. On with the game, boys, on with the game.

Into the fray goes the son of my father, that the freedom he won shall retain.

"This life is what you make it." No—It's how you take it.

World War I—"War to make the world safe for Democracy."

World War II—"War to make Democracy safe for the world."

"All signs fail in dry weather"—and likewise in wet.

"When is a door not a door?" Answer—"When it's a jar."

When is a chair not a chair? Answer—?

"To be or not to be—is the question." To do or not to do—is the answer.

Visit in Norfolk
Messrs. C. D. and G. L. Pittman and Ralph Taylor spent Wednesday in Norfolk.

Retail Trade Head

Here's the man whose decisions will affect practically every person in the U. S. It's Dr. Merle Fainsod, Harvard professor, at his desk in Washington, D. C., who has been named head of the new retail trade and services division of the Office of Price Administration. Before being named to his new position, Fainsod was price executive in the consumer durable goods section.

(Central Press)

tail trade for several weeks has fallen steadily behind the pace it had maintained ever since the days when the upswing was called a "defense boom." National department-store sales gains have run merely 15, 13 and 8 per cent ahead of corresponding 1941 weeks, lately—and this means less actual movement of goods across counters because prices are about 19 per cent higher, on the average. Some stores say the customer slow-up was especially noticeable right after the OPA price-freezing order, as though shoppers were waiting for the May 18 reductions. But those reductions will scarcely be worth waiting for, probably averaging out to less than one per cent.

HEALTH .. is Vital to America MILK is Vital to Health

A NATION in top-notch health is a nation fit to win! One of the things stressed at the national nutrition conference in Washington, D. C., was the fact that every man, woman and child should drink milk every day—a pint for adults and a quart for the children.

Milk was given first place in the basic minimum diets designed by health authorities to maintain optimum national health. Milk should not be an optional food.

Most people find milk a delicious, refreshing beverage. If you are one who does not, be sure that your diet includes milk in soups, sauces, gravies, and puddings cooked on an electric range. Electric cookery, now as always, is fast, clean, modern, safe and economical—just like electric light. You'll enjoy milk, too, in delicious ice cream.

It's good . . . and good for you! Be wise! Next time thirst calls—drink milk!

TRY TO SERVE THESE
BASIC FOODS EVERY DAY:

MILK—One quart for children and one pint for adults. Or cheese or evaporated or dried milk.

EGGS—At least 3 or 4 a week, cooked any way you choose; or in "made" dishes.

MEAT, POULTRY OR FISH—One or more servings daily. Dried beans, peas or nuts occasionally.

ORANGES, TOMATOES, GRAPEFRUIT—or raw cabbage, or salad greens—at least one of these.

VEGETABLES—Green, leafy and yellow; one big helping or more a day—some raw, some cooked.

OTHER VEGETABLES, FRUIT, potatoes, other vegetables or fruits in season every day.

BREAD OR CEREAL—Whole-grain products or enriched white bread and flour, macaroni, spaghetti.

BUTTER, FATS, SWEETS—Vitamin-rich fats, peanut butter and similar spreads.

VIRGINIA ELECTRIC AND POWER COMPANY

WE BUY AND GRADE Irish Potatoes

U. S. COBBLERS

New Grading Machinery

To the potato farmers of Martin and adjoining counties, we extend a most cordial welcome to sell their 1942 potatoes with us. Our grading machinery is the best made and we always have the top market price for our customers.

LARGE STOCK BAGS

We have all the fine quality bags necessary to take care of the farmers of this section. For prompt and efficient service, Sell your potato crop with us.
