

War As It Relates To Home Front Is Reviewed for Week

(Continued from page one)

To most of us this unity was to be taken for granted but there were those, both before and after Pearl Harbor, who thought and spoke differently. These people said we were not alert to the danger, they said we could not convert our industries to war in time to help our allies, they said we could not give our sons freely to the fight for freedom, that we were too soft to accept rationing, price fixing, and those other measures which meant for all of us an end to "living as usual." But almost every day that goes by disproves these lies, affords additional proof of our unity in endeavor, a unity to strike terror to the heart of our foe. Probably the most striking proof of unity on the home front has been the signal success of the War Production Drive, a drive which could not have succeeded without the whole-hearted collaboration of management and the worker. Many thought, when the War Production Drive was first announced, that management and labor could not work together even to get more tanks and guns and planes and ships and get them faster, but today joint committees of management and labor are working together in more than 900 plants of war production and neither side—neither the side of management nor the side of labor has tried to use the plan to chisel something out of the other fellow.

Seek Honest Answers
The committees tried honestly to find answers to these questions—How can we get more production from our machines? How can we improve quality of workmanship? How can we prevent waste of man-hours and material? The President's goals in ships and planes and tanks and guns hung upon the ability of those groups to find answers to these questions. And they have succeeded. That is why War Production Board Chairman Donald M. Nelson said last week that "there is a new spirit abroad in this land—or perhaps it is just a spirit that was always there." And Mr. Nelson added—"America today is really beginning to work at full speed for the first time. We are just beginning to realize what our strength really is. We are just starting to use it."

Change Brings Improvements
The face of change—or war time change—is not always unpleasant. Out of the needs and scarcities of war come, sometimes, new ways of doing things which are better than the old ways, new shapes and textures and materials for common things which are better than the old shapes and forms and textures. WPB's Division of Civilian Supply recently called attention to the fact that house furnishings which formerly were made of strategically important aluminum and copper and stainless steel now are appearing in pottery and glass and wood and plastics. The stream of American design, the drive of American technology, has not vanished merely because of war.

To the campaigns for saving metals and rubber and rags and paper, the campaign for getting these metals and materials back to the plants which will fabricate them, add another campaign which will begin shortly. This will be a drive to replace the loss of fats and oils from

the Far East. There is a ready way of replacing this loss and that is to recover and save the estimated 2,000,000,000 pounds of cooking fats wasted every year. Fats make glycerine, glycerine helps make the military explosives used by our British Allies and glycerine is important to the recoil mechanism of our own weapons and to the instruments which guide planes and ships on their war-time courses. The household fats salvage program will not begin until some time in July, according to WPB's Bureau of Industrial Conservation. But when it does, BIC hopes to collect more than half a billion pounds of wasted cooking fats a year from kitchens of American homes, with neighborhood chain stores, meat markets, and frozen food locker plants, serving as centers for collection.

It seems that for a whole after the WPB order, forbidding cuffs on trousers in order to save wool for the Armed Services, a number of people bought ready-to-wear suits and trousers, took them out with the trouser legs unfinished and then had a merchant tailor finish the trousers off with cuffs. The nation might never have known how much trouble a few will go for so little, had not the WPB Apparel Section called attention to a change in men's and boys' clothing simplifications order, which prohibits merchant tailors from finishing trousers with cuffs. The "old Oaken Bucket" may be on its way back. A WPB order encourages the manufacture of wooden pails and tubs to save metal. We will have plenty of electric light bulbs but they'll be made with substitutes for scarce war materials. The Office of Defense Transportation has brought long-distance bus operations under war-time restrictions, forbidding more than one round-trip a day over routes where the average load is less than 40 per cent of capacity. The Office of Price Administration has suspended deliveries of gasoline to 14 service station operators in New York and Philadelphia who admitted violating gasoline rationing regulations. After July 15, the new rationing system will make such "black market" practices impossible. A 24-inch pipe line from Long View, Texas, to Salem, Ill., a distance of 550 miles, is being built to carry petroleum products, including scarce fuel oil, to the East Coast. Cast iron will be used instead of steel wherever possible. WPB is permitting continued production of baby carriages, but they must contain none of the scarcest metals and only a bare minimum of iron and steel. The answer, probably, is wood. The can opener will be less important in the kitchen from now on. The fewer tins which will be made will come in larger sizes to save tin. WPB has ordered tin-can makers to substitute a process using less tin wherever possible and to use chemically-treated steel "blackplate" instead of tin plate for some types of cans. Men's and women's suits and overcoats made of blended wool and substitute fibers will be cheaper this fall than last year's all-wool varieties. War construction proceeds at the rate of \$12,500,000,000 a year or almost 20 per cent above the previous record. A Buffalo concern is making a new kind of sponge sweat band to keep the sweat out of war workers' eyes. It saves materials needed for war. Brass and copper no longer may be used in making chalices and other religious articles. Gold-plated iron chalices already are being used by Chaplains in the Armed Forces. The President's Committee on Fair Employment Practice charged Chicago Labor Unions with discrim-

Rationing Board Is Literally Swamped With Applications

(Continued from page one)

H. G. Harrison, RFD 2, Williamston, one tire for farm use.
R. C. Griffin, RFD, Williamston, two tires for farm use.
A. C. Roberson and Bro., Williamston, three tires for farm use.
Mason Council, RFD 1, Bethel, three tires for farm use.
Geo. E. Roberson, RFD 1, Jamesville, two tires for farm use.
Jos. LeRoy Griffin, Williamston, two tires for farm use.
D. L. Howell, RFD 1, Hobgood, one tire.
Obsolete tires were allotted as follows:
H. L. Manning, RFD 1, Williamston, one tire for farm use.
W. B. Everett, Robersonville, one tire and tube for farm use.
Coy Griffin, Williamston, two tires and two tubes for farm use.

Harry H. Roberson, RFD 1, Robersonville, one tire and tube for farm use.
Chas. R. Gray, Robersonville, two tubes for farm use.
Redden Tyre, RFD 3, Williamston, one tire and tube for farm use.
A request for two car tires and two tubes by R. B. Nelson, Robersonville, was rejected.
The following applications were carried over for consideration at a later date:
Miss Mildred Purvis, RFD 1, Robersonville, two recapped car tires and one tube.
B. C. Chesson, Robersonville, one tube for car.
Farmville-Woodward Lumber Co., Williamston, six truck tires and six tubes.

Harry B. Thompson, Williamston, two truck tires and two tubes.
J. S. Whitman, Robersonville, two truck tires and two tubes.
Love Williams, Oak City, two car tires.
T. H. Lynch, Oak City, one recapped car tire.
Julius Dawson, RFD 1, Hobgood, two recapped car tires.
Harold Bryan Hargett, Williamston, two recapped car tires.
Larry Bunting, Robersonville, four car tires and two tubes.
A. R. Smith, Williamston, two car tires.
B. E. Andrews, Robersonville, four recapped car tires.
Mrs. Watt Daniel Burton, Williamston, two car tires and two tubes.
J. H. Terry, Williamston, two recapped car tires and two tubes.
John Hyman Roberson, Williamston, one recapped car tire.
Mrs. Carrie Dell Pippen, Hamilton, two car tires and two tubes.

Complete Training Class At Oak City

The First Aid class, conducted by Miss Ludell Belflower and Mr. Bill Spivey, has been completed the members taking the final examination last Friday night. The class was taught in the Oak City school building.
The following is a list of the members who took the course for credit and are expecting a certificate for First Aid work:
Misses Martha Johnson, Selma Johnson, Madeline Davenport, Mrs. Harry Daniels, Mrs. Blonzie Harrell, and Mrs. N. W. Johnson; Messrs. H. M. Ainsley, J. H. Hopkins, Hilton Rawls, H. J. McCracken, N. W. Johnson, Wiley Craft, James A. Rawls, R. R. Rawls, Bobby Rawls, W. E. Early, H. H. Worsley, John L. Hassell and N. L. Hyman.
Others were in the class and attended part of the time but due to crowded farm work were not able to complete the course. Some have expressed themselves that if another class is organized at a later date they will continue the course.

Number Of Drunks Rounded Up During The Past Week-end

(Continued from page one)
The commotion was nothing out of the ordinary, the traveler continued on his way a bit baffled, to be sure.
The main case going on the docket last week-end was the one charging Ernest Godard and John Gray Mayo, colored, with the theft of two tires from LeRoy Harrison in Bear Grass. Incidentally, Mayo is facing the superior court for the theft of Mr. Willie Hurst's car in Robersonville last Thursday night. He was placed under bond in the sum of \$500 at a hearing before Justice H. S. Everett last Saturday. He was placed under bond in the sum of \$200 for allegedly participating in the tire theft earlier in the week. Unable to raise the money, he was committed to the institution against Negro steamfitters and plumbers—and ordered this discrimination stopped. There are 150,668 new adult bicycles in the United States, according to OPA. They'll be rationed to war workers soon. East Coast motorists will register July 1, 2 and 3, for new gasoline ration books. On June 15 the value of ration units was increased from three to six gallons so that the emergency plan might operate until July 15th, when the new coupon plan goes into effect. OPA warned that motorists who use all the units up by the end of this month won't get any more until July 15, unless they can qualify for a supplementary ration. Retailers may sell stocks of gift toilet kits without required that used tin tubes be turned in—if the box is sent directly to a soldier, sailor, marine or Coast Guardsman.

Enter Claims For Supplemental Gas Cards On Monday

ston, A minus three units.
T. H. Lynch, RFD 1, Oak City, A minus two units.
Love Williams, RFD 1, Oak City, A minus three units.
Fred Taylor, Robersonville, A minus one unit.
Alonza Revels, RFD 2, Williamston, one B-1.
Clayton Lynch, RFD 1, Oak City, A minus four units.
C. B. Roebuck, one B-2 and one B-3.
W. B. Mizelle, Williamston, A minus five units.
Haywood Harrell, Palmyra, B-3 minus eleven units.
Henry Godard, RFD 2, Williamston, A minus two units.
Luke Knight, Oak City, A minus four units.
Robert Bryant, Oak City, A minus six units.
Oscar Harrell, RFD 3, Williamston, A minus one unit.
Mamie Jenkins, Robersonville, A minus five units.
James E. Leathers, RFD 1, Hobgood, A minus five units.
Mrs. Bessie G. Wynne, Hamilton, A minus two units.
Lawrence Sheppard, Hassell, A minus five units.
Mrs. Janie Freeman, Hassell, A minus one unit.
Two cards were issued to replace those that had been lost to the following:
A. L. Williams, RFD 1, Robersonville, B-3 minus 12 units.
Ernest L. Owens, Portsmouth, A.

Fifth Registration In County Tuesday

Uncle Sam will have registered just about all his potential power by late next Tuesday evening, June 30, when young men 18-20 years old excluding those who have already registered, sign up for possible military service. Registration place have been designated, Chairman R. H. Goodmon stating that only one change had been effected. The young men of the Farm Life district will register at Manning and Gurkin's filling station instead of at the school there.
Most of the men scheduled to register next Tuesday are not subject to draft under the present law, but they will be subject to prosecution if they do not register.

designated amounts, Mayo was placed in jail to await the convenience of the next term of Martin County Superior Court in September.
Given a preliminary hearing yesterday, Godard was released under bond in the sum of \$200. Sold to a filling station operator, the tires went into the regular trade in a hurry, it was reported. One of the tires has been recovered and it is likely that the other one will be found and returned to the rightful owner.

A Last Look Around

With toy pistol ready in his right hand and wearing his cock-a-whoop air force cap, three-year-old warrior Laurie Godfrey takes a last look around the railroad station at Sydney, Australia, before being evacuated to a country town.

Axis Having Their Inning On the War Fronts At Present

(Continued from page one)
important German submarine base at Emden had been bombed yesterday for the third time in four days, that six of their bombers failed to return.
American submarines, operating in the far Pacific, are credited with sinking four large Jap ships during recent days between Hong Kong and Shanghai.

In this country it was announced that the Navy is conveying coastal shipping, but accompanying the announcements was a report stating that 88 persons had been lost in a sinking off the New England coast. Eighty-one were saved.
The new budget calls for eleven billion dollars for aviation and 12 billion for lease-lend.
Two hundred workers struck today in a St. Louis plant when negotiations for a new contract broke down, and it was announced that this country's synthetic rubber program is controlled by "inimical private interests," anxious to eliminate post-war competition. The advisory committee assisting Jesse Jones, the big banker, in directing the program is made up of officials from the big rubber companies and Standard Oil.

Revival In Local Church To Continue This Week

The revival in the local Pentecostal Holiness church, now in progress, will continue throughout the week. The scheduled services will be held each night. The public is urged and invited to attend.
It will take 20,000,000 tons of steel to make 10,000,000 army reconnaissance cars and trucks or medium tanks.

Carriers Selling Excise Car Stamps

To eliminate as far as possible a last-minute rush and as a service to the rural patrons, the local post office is placing a few of the federal excise motor vehicle stamps in the hands of the Rural Free Delivery carriers for sale on the several routes. The action will make a trip to the post office unnecessary.
It has been announced that the purchase and ownership of one of the motor vehicle stamps will be required before a gasoline rationing card can be or will be issued. The registration for rationing begins on July 1, one week from tomorrow.

Start Revival In Church At Everetts Tomorrow

Beginning tomorrow evening at 8:45 o'clock, Rev. J. M. Perry will conduct a series of services for a short period in the Everetts Christian Church.

Theft Of Several Tires Is Reported

A wave of car tire thefts has been reported in this section during recent days, local police stating that at least eight tires had been stolen from four persons or firms.
A short time ago, a spare tire, Firestone 600x16, was stolen from the Lindsley Ice Company; one, a Firestone 600x16, from the Harrison Oil Company, and a Ford 600x16 from Ward's Coal and Wood Yard. Last Saturday night, robbers broke into the New Carolina Warehouse where the Dixie Motor Company had a number of cars stored and stole four or five tires and wheels. Two of the tires were Atlases, one a Federal, and one a Royal, all 600x16.
Police are working on all of the cases but no arrests have been made.

FOR RENT: THREE-ROOM APARTMENT WITH BATH, HEAT, LIGHTS AND WATER FURNISHED.

Mrs. A. R. Dunning, jn19-2t

Little Damage By Fire Last Friday Afternoon

Started by a spark, fire did little damage to the home of Josie Howard, colored, on West Warren Street last Friday afternoon. A small hole was burned in the roof. No one was at home at the time, but neighbors discovered the fire soon after it started and workers in the laundry helped the fire department bring the blaze under control with an extinguisher.
The house, a very small one-story one, belonged to Mr. Sid Mobley.

Sugar - Saving Tips . . .

In home baking, delightful cakes, cookies and other good things can be made by using sweeteners other than sugar. Molasses, sorghum, honey, light and dark corn syrup and maple syrup are available and are excellent substitutes. All of these sweeteners contain some water since they are in liquid or "syrupy" form. Therefore a few changes must be made when these are used. Cut out these rules and paste them in your recipe book:

- 1—Never substitute other sweeteners for all sugar in baking recipes. Equal parts of sugar and other sweeteners give excellent results. One-fourth sugar and three-fourths other sweetener gives good results.
- 2—When using molasses or sorghum, reduce liquid one-fourth cup for each cup of molasses or sorghum used. Allow one-half teaspoon of baking soda for each cup of molasses or sorghum.
- 3—When using honey, reduce liquid one-fourth cup for each cup of honey used. Use slightly lower oven temperature to prevent over-browning.
- 4—When using corn syrup, reduce liquid one-fourth cup for each cup of corn syrup used. Light corn syrup is better for light cakes, breads and cookies. Dark corn syrup is good in spice and other dark cookies, cakes, breads.

AND FOR ALL BAKING ALWAYS USE . . .

HARRIS CREAM FLOUR
