

### Farmers To Receive Loans On Soybeans

North Carolina farmers who grow soybeans this year as part of the "Food for Freedom" program will be eligible for federal loans on the soybeans stored in approved bins on farms, according to E. Y. Floyd, AAA executive assistant, at State College.

Soybeans of any class grading No. 3 or better with respect to factors other than moisture content, and having a moisture content not above 14 per cent and which were produced in 1942 will be eligible for loans, Floyd said. Soybeans grading weevil, or which are musty, sour, heating, or have any objectionable foreign odor, will not be eligible.

the basis of representative samples that beans produced in any county have an oil content of 17 1-2 per cent or more. In this case, he said, all soybeans grown in that county will be considered as having a high oil content. All determinations of oil content will be made on a 10 per cent moisture basis.

Soybeans of Class III (brown), Class IV (black), and Class V (mixed) will have a loan value of \$1.55 per bushel for high oil content, and \$1.45 for low oil content. Soybeans of any class grading No. 3 and having not more than 14 per cent moisture, will be discounted three cents per bushel below the basic loan rate for soybeans grading No. 1 and No. 2.

The loan rate, Floyd said, includes a storage allowance of five cents per bushel which may be earned by the producer. The loans will bear interest at three per cent, and will be available through March 31, 1943. All loans mature on demand, but not later than June 30, 1943.

#### Birth Announcement

Born to Mr. and Mrs. Joseph Robinson, a daughter in a Washington hospital on Saturday, June 27th.

### Army Patrol Plane Spots Atlantic Survivors

As dawn breaks over the Atlantic an army bomber patrolling the coastal waters spots a torpedoed ship and its survivors. Part of the plane's wing can be seen at the right. In a lifeboat (center) the survivors pull away from their sinking vessel. After summoning surface craft to rescue the survivors, the bomber went on a hunt for the sub that sank the ship.

### Negro Bible School Ends Its Sessions

The Vacation Bible School for the Negro boys and girls of Williamston had an enrollment of 260, with 45 making a perfect record.

Many thanks and grateful appreciation are extended to the faculty and helpers in all departments for their faithfulness and the untiring work done by all; to the children, parents and friends for the interest manifested and the loyal cooperation given in making the school a success after the second, and the fourth 14 days after the third. If weather conditions are abnormally wet, a total of four applications will be profitable. However, if dry three applications will give maximum results.

Either "325-mesh dusting sulphur" or a mixture containing 3 to 6 per cent metallic copper, by weight, derived from basic copper sulphate or cuprous oxide, and the balance 325-mesh sulphur dust may be used in controlling leafspot.

cess; to the many friends who gave willingly to help entertain the children, and to the white ministerial association of Williamston for the many good things given to help the boys and girls.

The perfect attendance roll is as follows:

Frederick Rodgers, Marie Ruffin, Walter Earl Dare, Bettye Jean Thomas, Charlotte Cooper, Pearl Goss, Annie M. Goss, Winnie O'Neal Goss, Mary Ann Johnson, Jean Alberta Jones, Lenell Jones, Marlene Latham, Rolland Latham, Vivian Ruffin, Christopher Ruffin, Silvia Rodgers, Jean-Wiggins, Nancy Woodard, Sarah Woodard, John Ballard, Herbert Lyord, Willie Rodgers, Ruth Mayo, Mary Alice Roscoe, Julia Faye Whitley, Eleanor Whitley, Josephine O'Day Brown, Marjorie Bennett, Nannie Ruffin, Mary Gladys Bunch, Viola Rodgers, Helen Mae Scott, Annie Scott, Christine Gurganus, Colleen Huff, Jaunita Williams, Helen Doris Lynch, Josephine Williams, Ruth Doris Hoggart, Willie Doris Joyner, Odessa Johnson, Mary E. Goss, James Carlton, Evelyn Howard, Henry Clark.

### VICTORY ON THE FARM FRONT

#### PROPER CARE OF MOWER ASSURES GOOD SERVICE

J. D. Blickle, extension farm machinery specialist of N. C. State College, is making these timely suggestions to farmers: "Take care of your mower, and it will take care of your hay by finishing the job without a breakdown."

Interruptions in the midst of harvesting hay, he points out, are wasteful of time and labor. To avoid such waste, especially at this critical period for farmers and to sidestep the chance of damage to the crop while the mower is being fixed, advance check-ups and repairs are recommended.

Before haying or other work, the mower wheels should be jacked up and tried out by hand. If everything seems to be operating properly, a small part of the crop should be cut as a test. If the mower does not run freely, an immediate examination should be made. The heating of any part is definite indication that lubrication or adjustment is necessary.

Blickle also offered the following advice: See that the knife cuts clean and even, without choking and that the grass stack is adjusted to leave a clean path.

By far the greater part of mower trouble is with the cutter-bar assembly which should be inspected frequently. Keep all parts securely fastened as a loose guard, for example, would bind the knife and probably cause serious breakage and delay.

Moving parts should be lubricated little and often, except when operating on sandy soil. In such a case, lubrication should be done with caution, if at all, because of the abrasive action of sand.

After running into hidden rocks and stumps, always stop immediately. Replace any broken knife sections, straighten out the bent guards, reset any knife clip that fails to hold the knife lightly in the guard, and restore the original lift to any bent guard lip to prevent clogging of the cutter-bar.

### Why Photography Is Lots of Fun

Looking at this photo it's easy to understand why photography has become so popular these days. These Los Angeles enthusiasts, grouped around starlet Marie McDonald, are having more than their share of fun as they click away. Marie is one of the film beauties who graciously posed for the camera fans at opening of Ambassador camera gardens.

### King and Archbishop

King George II of Greece sips a glass of wine while listening to Archbishop Athenagoras who is the Greek bishop of North, South and Central America. This picture was taken at a dinner given in honor of the King at a New York hotel.

### State College Hints For Farm Homes

By RUTH CURRENT, State Home Demonstration Agent

Nowadays Mother doesn't forget the brush when the painting job is done. She cleans the paint off while the paint is still fresh, instead of letting it get dry and hard. Then she wraps the clean brush in paper, ties a cord around to hold the paper on, and hangs the brush up by its handle to keep the bristles straight and ready for the next time she paints.

When you have finished painting, get as much paint off the brush as you can with a rag. Then dip the brush in the liquid solvent. If you have been painting with oil paint, the solvent will be linseed oil; if you've been using flat finish paint, clean with kerosene oil, or coal oil as some people call it. If you've been using shellac, the best cleaner is denatured alcohol. As for calcimine or whitewash, just plain water will take that off. Clean the bristles again with a clean cloth and last of all wash the brush in soap and water, rinse, and dry. Hang the brush up by the handle to keep the bristles straight.

A good job of cleaning always winds up with cleaning the cleaning tools. One reason for putting cleaning tools away clean is that you don't store dirt. Your brooms, brushes, mops and clothes don't develop sour or moldy odors and don't attract insects. With clean equipment you are always ready "to go" when cleaning day comes around. You don't have to waste a moment getting started and you can do an efficient job that gives you satisfaction. But when you open the closet and find the dustpan full of dust, the broom greasy or sticky, the mop

### Dusting Paves Way For More Peanuts

Dusting will assure North Carolina peanut growers more pounds per acre of this vitally important wartime oil crop, according to H. R. Garriss, extension plant pathologist of N. C. State College.

Tar Heel growers have been asked to produce this year more than 500,000 acres of peanuts, three-fifth of this production to go for oil purposes, now needed badly because war in the Pacific has shut off large supplies of vegetable oils formerly imported.

"Every peanut grower in the old peanut belt is urged to dust a goodly portion of his crop this year," Garriss said. "The results of demonstrations have shown that dusting with fungicidal dusts can be of great help in producing more peanuts on each acre of land."

He pointed out that it is probable the leafspot will not be so serious in "new production areas" during the first year. For this reason, it is recommended that dusting be maintained on a demonstrational basis in these new areas this year.

Three to four applications are recommended. The first should come between July 1 and 10, the second 14 days after the first, the third 14

dirty and mildewed, well you know what kind of a start that gives you. It just spoils your enthusiasm for cleaning, and you have to do a big job of cleaning up before you even start on the house.

### PRIMROSE THE BEST BUY IN RYE!

GOODERMAN & WORTS LTD., PEORIA, ILL.

## Special NOTICE To Our Customers

To save precious rubber for the war effort, the Director of Defense Transportation issued a general order to service industries which says:

1—We cannot make more than one stop at each customer's residence in any one day. This means . . . to pick up your laundry, your bundle must be ready and available when we call. To deliver your laundry, WE MUST MAKE COLLECTIONS AT THE TIME OF DELIVERY. If these rules are not complied with, we must postpone the delivery or pickup of your laundry until the following day.

2—Through a special governmental order we must reduce our truck mileage 25 per cent each month below what it was the same month last year.

3—Charge account regulations issued May 5, 1942, by the Federal Reserve Board require that charge accounts must be paid in full by the 10th day of the second month following purchase. Under this requirement, the balance of your account at the end of May, 1942, should be remitted in full not later than July 10, 1942, in order to permit further charges to your account after that date.

We've already asked your cooperation to help us save trucks and tires, in anticipation of the passage of this delivery curtailment ruling. NOW THAT IT HAS BECOME A GOVERNMENT ORDER, we must comply with it.

The inconvenience caused by this order will mean a sacrifice to both of us. But we feel that it is a SMALL SACRIFICE, because it will enable us to CONTINUE SERVING YOU, and at the same time HELP OUR NATION IN ITS EFFORT TO WIN THE WAR.

These Rules Will Go Into

## Effect July First

NO EXCEPTIONS TO THESE RULES WILL BE MADE.
