The War Isn't Fought in Fox Holes Alone

We folks at home should be just as much in this fight as are the men at the front. Ours is the task of supplying the implements and materials of war—the ships, the planes, the tanks, the bombs, the bullets, the food and clothing, the million-and-one things needed to maintain troops in the field and give them an even break with an invading, aggressive, ruthless enemy that has had years of training and conditioning.

This requires money—fantastic sums of money—every single, solitary cent not absolutely necessary for our actual living expenses that we can rake and scrape. You may THINK you have brought all the War Bonds you possibly can, but you must now buy even more.

You think that is hard? Listen: Men have gone and are going away from this county every month to enter the armed services. We have our country's guarantee that we will get our War Bond money back—with liberal interest. The men who are going into the service are not even guaranteed that they will get back alive.

Martin County's Bond quota for the month of July is \$90,600.00. To date not even half of this amount has been realized. When the men dodging death in front-line fox holes reach for their next grenade, shell or bullet, will it be there because you bought another bond when you thought you couldn't, or will it be another case of "too little and too late"?

You Talk About A "Second Front"

Here's your second front. Get in there and buy your share of bonds to provide munitions and equipment and there'll be a second front, a third front, or as many fronts as necessary to utterly and completely defeat Hitler and Hirohito and Mussolini and all other would-be world conquerors for all time to come.

One Way of Doing Your Part:

BUY WAR BONDS
