SAVE YOUR TIRES!

Reporting to the President on America's rubber crisis, the special Baruch Rubber Committee recommends in part: "That compulsory periodic tire inspection be instituted."

Thousands are already guarding future mileage with Esso "16 to 1" tire service!

Five weeks ago... long before the President's special rubber committee recommended "compulsory periodic tire inspection" as a means to keep the nation's motor cars rolling... Esso Dealers launched a remarkable new program to do that very thing!
Based on two new scientific instruments, this service lets your Esso Dealer measure accurately the mileage remaining in your set of tires as they stand right now. In 16 cases out of 17, we have found that motorists have more miles left than they think they have!
That extra mileage is vital. It must be saved.
It can be saved for you by your Esso Dealer. As fast as possible we are supplying Esso Dealers with the new tread depth gauges and tire mileage calculators. You, Esso Dealer has his or soon will have. See him now. Let him measure your miles to come. Then let him help you see that you get every last one of them!

State College Hints For Farm Homes

By RUTH CURRENT

Nowadays everyone is interested in thrifty meat dishes. Good stew is an old standby and here is how to make it. Allow about two pounds of lean raw meat without bone for a good all-meal stew for 6 persons. For a stew with vegetables, you can use less meat, of course, but the more meat you have the more nourishing and tasty will be the stew.

To make a good stew first flour and then brown the meat in fat before you add water. Brown the vegetables a few minutes in well-flavored fat. Vegetables are at their best when you cook them quickly, so don't add them until the meat is almost, if not quite, tender.

It doesn't matter whether the water is cold or hot. Add enough water to cover the meat and simmer slowly until the meat is tender. Don't boil. Many cooks like to add a sliced onion for savory flavor. If the stew is not thick enough by the time the meat is tender, mix 1 or 2 tablespoons of flour to a smooth paste with a little cold water. To the paste add several spoonfuls of the hot stew and then stir the mixture into the rest of the stew, and cook until smooth and thick. Season to taste with salt and pepper and a little chopped parsley if you have it.

Predictions right now are that the plentiful foods during the coming months will be: cereal or grain foods, lamb and mutton, poultry, dairy products, and most fresh vegetables. Foods that will not be plentiful are:
