

Colored Girl Hurt In Auto Accident

Odell Wiggins, young colored girl of Goose Nest Township, suffered a broken ankle and bruises when the tobacco truck on which she was riding was struck by an automobile on the Hamilton-Palmyra road last Friday.

Wm. V. Brown, driving a 1941 Chevrolet, was traveling toward Hamilton when George Hill, colored boy, drove the truck out of a side road into the highway. Before Brown could stop he crashed into the truck, breaking it in two. Hill, riding in the front part, escaped unhurt.

Fifteen Bicycles Allotted County For Next Month

The tire and tube allotment for next month has not been announced, but it was learned this week that this county had been allotted fifteen bicycles and two automobiles for October.

Schedule Of Services In Vernon Church Announced

Effective next Sunday, the following schedule of services will be observed in the Vernon Methodist Church, near here on the old Everetts Road:

Sunday school will be held on the first, third and fifth Sunday mornings at 10 o'clock, and on the second and fourth Sundays the school will be held at 2 p. m., followed by church services at 3 p. m.

Revival Underway In Church At Everetts

Rev. W. O. Andrews, Robersonville minister and pastor, is conducting a series of religious services in the Everetts Baptist Church this week. He is assisted by Professor T. O. Hickman and arrangements are being made to have the Bear Grass quartet appear on some of the evening programs, it was announced.

The first of the services were held Sunday night at 8 o'clock, the meeting to close Sunday evening.

Getting Oil to Eastern Seaboard Is Hot Work

Because it is 99 in the shade not counting the heat from the arc, welders on the pipeline that is being rushed to feed the oil-starved eastern seaboard are given some relief by the sunshades. The men work in pairs, one at each end of a pipe section. This particular line is made up of partially used pipe-line systems which were dug up and relaid in directions that will accelerate the flow of oil to the Atlantic seaboard from the oil fields of the southwest. (Central Press)

Reinforced Germans Continue Their Push Against Stalingrad

(Continued from page one)

Battle dispatches said Stalingrad was literally "in convulsions" from incessant bombing and shelling. But the price that the German army was paying on the 35th day of the battle was underlined by the noon communique's report that 2,000 Germans had been killed in 48 hours by one Red unit northwest of the city.

In the battle cauldron in the streets, the German 71st Division was reported to have lost 3,300 men; the 24th (tank) division 56 tanks and armored cars.

The Russians, bringing up reinforcements, are fanning out over a 50-mile area northwest of Stalingrad with success today, but the Germans were gradually gaining in the bitter fighting within the city itself.

It was announced by the German controlled radio in Vichy today that von Bock, the German general, had been purged and that a successor even more ruthless than Bock had replaced him to continue the drive on Stalingrad. The new general is expected to continue the siege regardless of cost and losses in men and material.

The Allied air forces have scored successes against the Japs in the Solomon Islands area, one report stating that more than 40 Jap planes were shot down and two cruisers sunk or damaged in the course of four days.

The German claim that three American troop transports had been sunk in the Atlantic was branded as a lie by British and American authorities today.

Speaking to the French people today, a British officer declared that an allied offensive was in the making, that it would drive on to Berlin and ultimate victory. The day and place were not given, the spokesman explaining that no advance notice could be given, but that the French would recognize the drive when it started rolling.

Little news concerning the war front has been released from Washington today, but in the capital city a final show down on the anti-inflation bill is expected very shortly. Senate leaders said this morning that the body would not adjourn until a vote had been taken some time late tonight.

It was revealed today that 2,300

men of the United States Merchant Marine had been either killed or lost up to August 1st.

CARD OF THANKS

We wish to publicly express our appreciation to our many friends who administered unto us during our recent bereavement. Your acts of kindness, your expressions of sympathy and the floral offerings are all hereby acknowledged and we again say, thank you.

Mr. and Mrs. J. B. Whitfield, Oak City.

At Martin County Fair

Above is a scene from "America on Parade," a pageant which will be presented in front of the grandstand each night. This spectacle is acclaimed by many to be "tops" in grandstand presentation. The cast is made up of local talent.

How To Determine Which Hens To Cull From Flock

If the comb is blood-red and waxy, the hen is on the job; if the comb is pale and shriveled, she is loafing. If the bird belongs to one of the common yellow-skin varieties and if she is laying, the color will be faded or bleached out. Also the skin of the layer has a soft texture, while the non-layer has a hard, dry skin that is relatively tight. Then, too, the laying hen has a soft, pliable abdomen and well-spread bones.

needed for the national scrap pile. Worn or used silk hosiery is so valuable in making bags for smokeless powder that ceiling prices have been raised so as to stimulate carload lot sales. Price increases also have been allowed for New England cordwood and canned fruit and berries, while maximum prices were fixed over raw furs and skins, cement and knitted underwear last week.

FOR SALE — THREE BIRD DOGS, one well trained and all from registered stock. Arthur Peel, RFD 1, Robersonville.

HOGS FOR SALE: I HAVE A FINE sow and pigs for sale. See me at once. Henry Johnson, Gold Point, Martin County.

THE RECORD SPEAKS . . .

Following a tragic week on the highways, motorists in this county went through last week without serious mishap. Only one minor accident was reported, one person was hurt but the property damage was small. The establishment of a 35-mile speed limit should all but eliminate accidents on the highways, but as motorists reduce their speed, pedestrians must exercise more care if they are to escape being maimed, crippled or killed.

The following tabulations offer a comparison of the accident trend: first, by corresponding weeks in this year and last and for each year to the present time.

39th Week Comparison				
Year	Accidents	Inj'd	Killed	Dam'ge
1942	1	1	0	\$ 000
1941	0	0	0	000
Comparison To Date				
1942	52	31	3	\$6,358
1941	70	44	3	19,030

War As It Relates To Home Front Is Reviewed for Week

(Continued from page one)

we can spare is busy on war work has spread to the furniture industry. This industry probably will follow the same plan recently put into effect in the manufacture of bicycles—a few plants, known as "nucleus plants," will continue to operate, concentrating all civilian furniture manufacture in a limited number of factories. The War Production Board to save time and materials, has limited the number of types and sizes of saws, axes, hatchets, adzes, light hammers, and for all kinds of electric lights and electric lamps which may be manufactured.

In a country that has been producing around 25 billion board feet of lumber annually, wood has become a critical material. Great quantities of lumber have been used to build cantonments. Ship construction has drawn heavily on supply. Special kinds of wood are needed for aircraft, timbers for vessels, gunstocks and the like.

Part of the reason for the shortage of wood lies in another shortage—the shortage of manpower to cut and process lumber, and manpower shortages are everywhere, everywhere they grow more critical.

We not only are desperately short of "front line" war workers—those with special skills—but by the end of 1943 we shall need about 18 million workers of all kinds, partly to replace the millions of men who will be called into service, although chiefly for war production expansion. This means that more women will be employed—by the millions. It means that at least five million persons who are not now working at anything will have to go to work. It means that our manpower, in time, must—in one way or another—be "rationed," that is, applied where it is needed most. To some extent that already is being done.

Scrap Campaign Gets New Impetus Unless the scrap and salvage campaign goes into high gear this Autumn, the country's blast furnaces will be forced to cut down production. Housewives are getting a list of more than 100 household items

CLEVER CAREER GIRLS CHOOSE
