

Ship More Than Four Million Pounds Of Scrap From County

Continued Collection Of Scrap Iron Urged

Complete Reports From The Schools Not Yet Available

Possible That Marginal Iron And Other Materials Will Be Junked For War

Complete reports from the campaign conducted by the county schools are not yet available, but official reports coming from salvage dealers clearly indicate that Martin County has, since Pearl Harbor, gone over the top and set the pace in the collection of scrap iron, steel and metals. It is reliably estimated that dealers have handled since last December 7th more than four million pounds of scrap materials, or about 154 pounds per person. The salvage dealers point out that these figures include collections handled by the various schools.

Asked about the school collections yesterday, W. K. Parker, owner-operator for the Williamson Parts and Metal Company, explained that he had the figures for sales made by several of the schools, but they were not inclusive since individual deliveries were made direct to his yard with credit going to designated schools.

Collections have been moved from the schools at Oak City, Williamson, Hamilton, Gold Point, Bear Grass and most of the scrap at Robertsonville has been hauled, sorted and shipped to the blast furnaces. It was also stated that the material gathered by several colored schools had already been moved and shipped. The collections in all the schools will be cleared within the next week or ten days.

Approximately 162,000 pounds of scrap iron, steel and metal were shipped from the county last week, Mr. Parker stating that most of that poundage came from the several schools in the county. Equally that much will be shipped this week and the early part of next, he added.

"The war is still going on, and the collection of scrap iron and metals must go on, too," War Production Board officials pointed out. When every available piece of scrap is gathered up and used and there is still

CHAIRMAN

In commending the school children of the county for their cooperation in the collection of scrap iron for the war effort, V. J. Spivey, chairman of the county salvage committee, points out that there is still a great need for more scrap, and urged the children and others to keep up the good work.

Frozen
Overalls, overall jackets, dungarees, work shirts, pants, breeches, and one-piece work suits made of cotton fabrics can be sold at no higher prices now than those prevailing last March.

By marginal machines is meant those machines that are still serviceable but are not in operation. It is also possible that some machines now in operation in those industries far removed from the war effort might be junked before this war is brought to an end.

Just as soon as all the scrap can be moved, the weights will be checked along with the individual receipts issued and the campaign will be reviewed by schools and by individual leaders.

Before that is done, Salvage Chairman V. J. Spivey states without reservation that the canvass was a marked success, that much credit is due to the little school folks and to those who cooperated in the task. Mr. Spivey, conscious of the continued need for more scrap, is urging everyone to keep the collection moving.

HANDLE BIG JOB SINCE PEARL HARBOR

The efforts of W. K. Parker and his workers in collecting salvage materials for the war were recently recognized when ranking War Production Board representatives presented the Williamson Parts and Metal Company the special merit award, the first of its kind to be

awarded in the county. During last month, the company shipped 232 tons of scrap from the yard or enough to make 465 tons of new steel which, in turn, will make 430 75 mm cannon, or 75 3-inch anti-aircraft guns, of 6,400 3-inch shells, or 8,600 50mm airplane machine guns, or 1,750 500-

pound bombs for Tokyo. More than four million pounds of scrap iron have been shipped from the county since Pearl Harbor. Included in the picture are War Production Board representatives Taylor and Zimmerman, Mr. Parker and several of his workers.

Large Force Needed To Keep Metals Moving To Factories

Ever try breaking automobiles and machines to pieces and sorting out the various parts? Well, it is one big job, but one that must be done to keep the blast furnaces of the country burning and the war effort in high gear.

Unable to get a complete set of machines for handling the job, W. K. Parker, manager of the Williamson Parts and Metal Company looks to hand labor to handle most of the work at his yard here. While most of the metal is cut down to proper sizes with torches, a great deal of manual labor is used up swinging axes and sledge hammers. Most of the wood fastened to the scrap iron is burned away. Cast iron is placed into a car by itself, steel goes into another pile, tin into another, and other types of metal into still other piles.

Meat Distributors Have Big Business

Roberson's Slaughter House, local packers and distributors of meats, enjoyed the largest business over a period of one week, October 19-24, in the history of the organization according to a statement issued yesterday by the proprietor, Mr. D. M. Roberson.

A total of 99,393 pounds of beef and meats of all descriptions were sold by the local packing house and through its Raleigh branch. No salt or lard are included in these figures. In addition to the above business large shipments of hogs and cattle were shipped by cars to other markets.

Local consumers are fortunate in having this business located here for local retail meat distributors are almost totally dependent upon this organization for their supplies. The extensive buying of the government of all meat and beef supplies throughout the country makes it next to impossible for the large packers to supply the local trade.

Government Will Control Manpower

The lives of millions of Americans which have undergone change since before the war will be further altered, to some perhaps drastically, in the months to come. For control of manpower by the government appears inevitable. Already Minnesota has come to grips with the problem. There, Governor Stassen has ordered non-essential industries—and the state—to reduce by 20 per cent the number of male employees so as to make available more farm labor. What form nationwide manpower control should take is still a much disputed matter in Washington circles. President Roosevelt favors voluntary control, but if this method fails to produce results, he adds, "we

shall have to have new legislation." It is one of the questions that will bear watching for it may mean that John Smith, a clerk in your home town, will be turning out war weapons for Uncle Sam's fighting forces next year. Some idea of what manpower means in these days of global warfare is indicated in the estimates of military men who figure that it takes ten men behind the lines to supply fully each man in uniform.

NOTICE TO CREDITORS

In the District Court of the United States for the Eastern District of North Carolina, Washington Division.

In Bankruptcy No. 773
In the matter of: James Cannady Evans, Greenville, N. C. Voluntary Bankrupt.

Notice is hereby given that Monday, December 7, 1942, has been fixed by an order of the Court entered at the first meeting of creditors as the last day on which objections

to the discharge of this bankrupt may be filed. Such objections are required to be specified, to be verified, to be in duplicate, and to be filed with the undersigned.

WHEELER MARTIN,
U. S. Referee in Bankruptcy,
Williamston, N. C.

True Stories Mighty Men of Vision
By The Bakers Of **BAMBY BREAD**

CAUGHT!
A Thief that Lurks In Every American Kitchen
Is your home a hiding place for this robber who every day has been stealing vital necessities of life from countless homes throughout America? Illustrated here is the way to combat this menace.

SOON AS I DRAIN THE HOT WATER OFF THE VEGETABLES WE'LL EAT, DAD.

I WONDER IF WE LOSE ANY FOOD VALUE IN THAT WATER . . . OR AM I JUST "SCOTCH"?

... AND I THOUGHT MOTHER WAS A GOOD COOK!

WE FIND A HIGH CONTENT OF WATER-SOLUBLE VITAMINS AND MINERALS IN THIS DISCARDED COOKING WATER. THE COOKED VEGETABLES, HOWEVER, SHOW VERY LOW VITAMIN AND MINERAL CONTENT.

DON'T FRET. MILLIONS OF MOTHERS HAVE BEEN INNOCENTLY MAKING THE SAME MISTAKE.

I'LL SAVE SOME OF THIS WATER AND HAVE OUR SCHOOL'S NUTRITION EXPERT ANALYZE THEM!

NO MORE THROWING AWAY THE VITAMINS AND MINERALS IN THE HOUSE! WHAT LITTLE WATER I USE NOW I PUT IN DRESSING FOR THE DISH!

YOU'RE A GENIUS, MOM! AND BOYHOW GOOD THOSE VEGETABLES TASTE NOW!

WE'RE LEARNING MORE ABOUT VITAMINS IN SCHOOL, EVERY DAY!

I'M WASHED UP IN DIS JOINT! THEY'RE WISE TO MY SNITCHIN' THEM VITAMINS AN' MINERALS!

Using cooking water in dressings gives you VITAMIN B, water soluble minerals and vitamins that are lost in cooking. To supply you with them daily the U. S. Government set up standards for enriching white bread with these needed food essentials.

BAMBY ENRICHED BREAD
BAMBY BREAD is ENRICHED with Vitamin B1, Niacin (another B-Vitamin), and Iron, in accord with the government-sponsored program for better health and welfare. Buy it . . . It's good . . . and better for you!
