

### Compost Will Enrich 1943 Victory Garden

Every farm family, and as many urban families as possible, will need to grow a Victory Garden in 1943 to supply home food needs and free commercial vegetables for the armed forces and industrial war workers. H. R. Niswonger, extension horticulturist of N. C. State College, says now is the time to begin to prepare for next year's Victory Garden.

"Compost is an excellent garden fertilizer," the extension worker declared. "The compost pile should be prepared now because it will require from four to six months for the material to decompose and be ready for use."

Niswonger's suggestions for making compost are: Use straw, old hay, grass clippings, weeds and leaves from hardwood trees. Pile out in the open. Spread out a layer one foot thick of convenient size. Sprinkle one quart of commercial fertilizer to every five feet of diameter of the layer. Also add a sprinkle of lime and a small amount of animal manure to each layer.

Repeat this procedure, putting the next layers and fertilizers on top of the first until the pile is as large as desired. Leave the center lower than the edge of each layer so the rain

#### SHARE-THE-MEAT PROGRAM CALLS FOR MORE POULTRY

Pork, beef, veal, lamb and mutton will be rationed because there will not be enough of these meats for the armed forces if civilians eat all they want. But C. F. Parrish, extension poultry specialist of N. C. State College, points out that poultry is not included in the Share-The-Meat program.

"Meats supply protein in the daily diet," says Parrish, "and for all practical purpose poultry and meat are identical in food value. Eggs are rich in protein. In addition, eggs are high in minerals and two of the B vitamins."

"The yolks of eggs are especially rich in iron—the mineral that helps to form the red blood cells. They are a rich source of phosphorous—a good source of thiamin and riboflavin, two of the B vitamins."

The extension specialist says that poultry meat and eggs are like other protein foods—they must be cooked.

water will not run off, but will saturate the material to be decomposed. During dry weather the compost pile should be watered occasionally. The horticulturist recommends the use of a 4-8-4 or 4-10-6 commercial fertilizer. The compost should be thoroughly mixed with the soil before planting time.

Niswonger also suggests that soil for the 1943 Victory Garden be plowed or spaded between now and February 1 in order that winter freezes will aid in pulverizing the soil.

### Remnants of Rommel's Fleeing Afrika Korps

Bodies of dead Nazis, left behind by Rommel's fleeing forces, are shown strewn on the Libyan desert sands. Note the abandoned supplies scattered over the battleground. American heavy bombers ranging ahead of the British Eighth Army made an attack on Tripoli, main Axis base in Africa, and also raided Homs, one hundred miles to the east. The planes scored hits on two big merchant ships.

### Farm Work Not To Affect Benefits

Mr. Marshall H. Barney, manager of the Rocky Mount office of the Social Security board, said today that persons who are receiving Old-Age and Survivors Insurance benefits may continue to receive such benefits and at the same time earn maximum wages in agricultural work.

Mr. Barney said that although the Social Security Act prohibits the payment of benefits to anyone who receives wages of \$15 or more per month, in a job that is covered by the act, this ruling does not apply to farm labor, because agricultural work is not covered by the act.

Beneficiaries under the Old-Age and Survivors Insurance system, who receive checks from the Govern-

ment slowly and at a moderate temperature. High temperatures for long periods of time shrink and toughen the proteins. The secret of cooking eggs or any of the meats is to use moderate, even heat.

Parrish also emphasized that the color of the egg shell has nothing to do with egg quality. "A good egg may be brown or white," he declared. The State College worker says that both broiler and egg production in 1943 will be above that of 1942. This year poultrymen are producing a total of 4,414 million dozens of eggs. The 1941 production was 3,829 million dozens. U. S. production of chickens in 1942 is estimated at 3,118 million pounds, compared to 2,722 million pounds in 1941.

### Down Deep in Honorable Dumps

These three dejected sons of Rising Sun are officers of the Imperial Military College, sworn to death before capture, are shown shortly after they had been taken prisoner by the Chinese. They were well treated, had their wounds dressed and were fed as well as Chinese soldiers. (Central Press)

### Tractor Needs Extra Care During Winter

November frosts should remind farmers to take the steps necessary to protect their tractors or engine-equipped machines from damage due to freezing, says J. D. Blicke, agricultural engineering specialist of the N. C. State College Extension Service.

A little preventive maintenance will guard against cracked cylinder heads and blocks, burst radiators, burned-out bearings, and other damage likely to occur in cold weather. During the winter months, the whole cooling system of the tractor or engine should be drained if not in actual use, or a good anti-freeze solution placed in the radiator.

One of the surest ways to prevent excessive wear and damage is to use the engine and transmission oil recommended by the manufacturer of the equipment for the lowest temperatures expected.

Then, too, Blicke explained, the oil should be changed oftener in the winter than in the summer because the condensation of moisture, oil dilution, and the collection of sludge in the engine crankcase are increased greatly during cold weather operations. The oil should be drained while the engine is still hot.

The State College specialist also reminded farmers that it is a good practice to warm the engine up to operating temperature before putting it to work.

The battery has an extra load during cold weather, so it should be kept fully charged at all times and the solution in each cell maintained at the proper level. A battery in which the charge is weak will freeze. "Stepping up" the generator may be necessary to keep the battery fully charged.

ment every month, found a leaflet with their November checks which points out these facts:

"Farm labor is urgently needed. You can help your Government with the war if you will accept farm work. The extra money you earn will not stop your monthly Old-Age and Survivors Insurance payments, because agricultural work is not covered by the Social Security Act."

"Boys and girls who are 16 or 17 years old who wish to extend their summer vacations in order to work on a farm may continue to receive their monthly insurance benefits while so working. However, they must notify the Social Security board office of the date they expect to return to school."

"Your local United States Employment Service offices will give you full information about available jobs. If you can give a helping hand, visit your local employment office now."

**NOTICE OF SALE OF PERSONAL PROPERTY**  
Under and by virtue of the power and authority conferred by Section 2435 of the 1939 North Carolina Code, the undersigned will, on Wednesday, the 16th day of December, 1942, at twelve o'clock Noon, in front of the Roanoke Chevrolet Company, sell for cash to the highest bidder, one 1936 Black Chevrolet Sedan, Motor No. M5523657, belonging to one

### Controlling Infestation By Skippers Of Stored Meat

The best method for keeping skippers out of meat, says Prof. D. E. Brady, meat research specialist of the State College Experiment Station, is to keep flies from coming in contact with the meat while the meat is being handled. A dark, cool, well-ventilated fly-proof smoke house is a great help in this respect. Occasional smoking of the meat during summer storage will also be helpful. Another method is to wrap the meat in paper and muslin and hang in the smoke house.

**Hogs**  
Hog slaughter in the 12 months beginning October 1 is expected to total about 95,000,000 head, according to the Bureau of Agricultural Economics of the U. S. Department of Agriculture.

Arthur Sheriff, for the purpose of satisfying a lien held by the Roanoke Chevrolet Company, by virtue of having done certain work and furnishing certain materials to said property above described.

**NOTICE: SALE OF REAL ESTATE FOR TAXES**  
I, James A. Rawls, tax collector for the Town of Oak City, N. C., have this day levied on the following real estate and will sell same at public auction, for cash, in front of the post-office in the Town of Oak City, N. C., on Monday, December 23, 1942, at 12 o'clock, M., for taxes due and unpaid for the year 1941, unless taxes, penalty and costs are paid on or before that date. The amounts listed below represent actual taxes due, the penalty and cost to be added to each account.

This the 30th day of Nov., 1942.

**NOTICE**  
North Carolina, Martin County. In The Superior Court.  
**Estella Stancil vs. Bennett Stancil.**  
The defendant above named will take notice that an action entitled as above has been commenced in the Superior Court of Martin County, North Carolina, for the purpose of obtaining from the defendant an absolute divorce on the grounds of separation; that the said defendant will further take notice that he is required to appear before L. B. Wynne, Clerk of the Superior Court of Martin County, within 30 days after this notice by publication is finished, and answer or demur to the complaint of the plaintiff in this action, or the plaintiff will apply to the Court for the relief demanded in said com-

plaint.  
This the 30th day of Nov., 1942.  
MARY E. KEEL,  
Deputy Clerk Superior Court.

**PRELIMINARY CERTIFICATE OF DISSOLUTION**  
State of North Carolina  
Department of State  
To all to whom these presents may come—Greeting:  
Whereas, it appears to my satisfaction, by duly authenticated record of the proceedings for the voluntary dissolution thereof by the unanimous consent of all the stockholders, deposited in my office, that the Woolard Furniture Company, Incorporated, a corporation of this State, whose principal office is situated on Main Street, in the Town of Williamston, County of Martin, State of North Carolina (G. G. Woolard being the agent therein and in charge thereof, upon whom process may be served), has complied with the requirements of Chapter 22, Consolidated Statutes, entitled "Corporations," preliminary to the issuing of this Certificate of Dissolution;  
Now, therefore, I, Thad Eure, Secretary of the State of North Carolina, do hereby certify that the said corporation did, on the 24th day of November, 1942, file in my office a duly executed and attested consent in writing to the dissolution of said

corporation, executed by all the stockholders thereof, which said consent and the record of the proceedings aforesaid are now on file in my said office as provided by law.  
In testimony whereof, I have hereto set my hand and affixed my official seal at Raleigh, this 24th day of November, A. D. 1942.  
THAD EURE,  
Secretary of State.  
d1-4t

### Be Quick To Treat Bronchitis

Chronic bronchitis may develop if your cough, chest cold, or acute bronchitis is not treated and you cannot afford to take a chance with any medicine less potent than Creomulsion which goes right to the seat of the trouble to help loosen and expel germ-laden phlegm and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Creomulsion blends beechwood creosote by special process with other time tested medicines for coughs. It contains no narcotics. No matter how many medicines you have tried, tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough, permitting rest and sleep, or you are to have your money back. (Adv.)
