

### Best City Loses To Edenton Forces

Young Saunders Delivered a Wicked Ball for the Victors

Schedule of Games	
Norfolk at Elizabeth City,	Monday.
Norfolk at Elizabeth City,	Tuesday.
Cotton Oil Corporation, Ports-	mouth, Wednesday.

Edenton checked the long winning streak of the locals Friday afternoon, winning 4 to 1.

Saunders pitched a remarkable game for the visitors. Three men went up and out in five innings of the game and only three hits were made from his delivery. The young twirler whiffed five men in succession, fanning the last two men up in the second frame and striking out three in the third inning.

Evans, pitching for Elizabeth City, permitted nine hits, but at that the score might have been 2 to 1 if he had received the usual brand of support that the home team has been handing out for the last several games.

Barrett led his team in batting, taking three hits out of five chances. Asbell and Daniels made two hits each out of four opportunities. Lang played a brilliant game at short for the visitors, robbing Abbott of a hit to his credit in left field. Wood covered center field in his usual good style and got under a bad drive to deep center from Hood's bat.

Shipp made a sensational catch of Lang's fly to left and Abbott took in some ugly grounders between first and second.

Edenton made the first tally of the game in the third frame. Daniels hit to right field. Lang fanned and Daniels went to second when Saunders grounded out. Barrett hit between first and second and scored Daniels. Wood grounded out, Abbott to Trueblood.

Two more runs went to the visitors in the fourth inning. Asbell hit over short and went out at second when McWheaton grounded to Calvert and got safe on first. Burden hit to Abbott, who would have caught McWheaton at second if Shipp had been covering the bag. Woodhouse went out. Shipp to Trueblood while McWheaton and Burden advanced on bases. Daniels hit between first and second and McWheaton and Burden scored.

Edenton didn't score again until the ninth frame when the fourth tally was made. Daniels got on first when Abbott fumbled his grounder. Lang and Saunders fled out to center. Barrett hit to right field and the ball rolled by Weatherly and Daniels scored.

The one run was made by Elizabeth City in the fourth inning. Hood got to first when Asbell fumbled his grounder. Calvert punched out. Abbott fled to Barrett in right field, who dropped the pill after getting under it and Hood scored. Bundy fled out to Barrett.

The score by innings:

	R.	H.	E.
Edenton	001	200	001
E. City	000	100	000

The box score:

### FUNERAL MR. WALKER ON SUNDAY AFTERNOON

The body of Paul Walker arrived in Elizabeth City Saturday morning from Raleigh, where his death occurred Friday morning. The funeral will be conducted from the home of his brother, Caleb Walker, on Dyer street, Sunday afternoon at 3 o'clock by Rev. S. H. Templeman.

### WIRELESS MAKES MORE PROGRESS

#### Marconi Evolves System for Transmitting Message With a Minimum Electrical Power and at a Very Low Cost.

London, July 21.—Another great step in the development of wireless telegraphic transmission has been realized, says Senator Marconi, who has returned to London after a two months' experimental cruise in his yacht "Electra." A system has been evolved by the Italian inventor whereby wireless messages are transmitted with a minimum of electrical power, and at very low cost.

"We have transmitted messages up to a distance of 2,250 miles, not only with a very much smaller amount of power and energy but faster and more cheaply than with the ordinary system of long-distance wireless," said Senator Marconi. "When the new system is adopted it will mean that a power station for long-distance work can be erected at much less cost than at present. I have telegraphed on this system from Cape Verde Islands, off the African coast, to London. To send messages clearly and more rapidly over those 2,500 miles took less power than a message from London to Paris by the ordinary methods."

Senator Marconi explained that these advantages were gained by the utilization of waves that have not before been used. Given the necessary mechanical element, he said, messages could be sent clearly seven times faster than the present rate, and that the public and the newspapers would ultimately have the benefit of much cheaper commercial charges. His opinion is that wireless is only in its infancy, and that the future has in store greater marvels than have been revealed in the past.

Commenting on recent experiments conducted by American telephone conversation, Senator Marconi said he was afraid such an achievement was still far off. "I do not say that wireless telegraphy will ever be an absolutely private means of transmission, but I will say that in future it will be possible to make it much more difficult for anyone to get messages not intended for them."

Senator Marconi proposes to go on another experimental trip in a few weeks' time, and later to try the new system of long-distance wireless from the coast of the United States to Europe.

### WILL STANDARDIZE NAMES OF FLOWERS

Chicago, July 21.—The chaotic state of affairs in the miscalling of names of flowers, plants and other perennials, has made necessary the standardization of their names, and a report on the subject has been adopted by the American Association

of Nurserymen. The compilation of names of these perennials, the result of more than five years of actual work on the part of the sub-committee of the American Joint Committee of Horticulturalists, is heralded as a great stride forward in the horticultural world.

As an example, the committee pointed out that there are more than 2,000 names for roses. Many names are used for the same rose, and this has resulted in complication. With the completion of the new nomenclature, it is hoped that use of the standard names will become general.

Standardized perennial names, both common and scientific, will benefit the public and the grower, according to the committee, and will tend to eliminate unfair practices. Heretofore growing, buying and selling have been largely guess work, the committee said and based on personal equation rather than on fair, square, open and accepted business standards.

It is expected that the Government will accept this nomenclature as an official standard.

### HOPI VILLAGES BUILT IN 1620

#### Scientists Trace Villages to Revolt of the Hopi Against the Spaniards Where Missions Were Torn Down.

Flagstaff, Ariz., July 21.—Scientists have determined that the Hopi Indian buildings of many of the villages of the tribe northeast of Flagstaff date back to about 1620 when the Hopis revolted against the Spanish priests and tore down missions built by the Spaniards, using many timbers from the missions in constructing their own houses.

A party including Dr. A. E. Douglas of the University of Arizona and Dr. J. A. Jeancon of the Colorado state museum returned recently from the Hopi pueblo villages, where they made a study of the wooden beams in the ancient structures.

Professor Douglas has specialized in the study of rings in Arizona trees with the result that he has been able to determine the age of the timbers.

The scientists' principal difficulty lay in securing the permission of the Indians to make borings in the beams which are held sacred by the Hopis.

When this permission was finally obtained a number of one-inch borings were made and the examination indicated that the beams had been cut about the year 1620 when tradition says the Spanish built their missions in northeastern Arizona. Some 40 years later came the Hopi revolt and the missions were torn down.

Many of the beams in the Indian dwellings are decorated with rich carvings which Dr. Douglas says are the work of the Spaniards.

### Scout Spirits High No Hunger Strikes

#### Visitors, Treats, Escapades and Wash Day Keep Life Any thing But Monotonous

Camp Robert E. Lee, July 20.—Everybody here feels much better today. Old Sol poked his head from under the blanket of clouds and the wind changed around to the south and in so doing raised the spirits of the boys considerably.

Visitors today were Mrs. Oscar Symons, J. R. Wright, Mrs. Will Morgan, Fred Houtz, Mr. and Mrs. Cam Melick, Mrs. E. J. Price, Mrs. F. H. Scattergood, Miss Margaret Symons, Miss Willie Lou Morgan and Mr. and Mrs. R. C. Job.

Treats in the way of marshmallows for roasting, ice, lemons and sugar for making lemonade, and cake to go with the lemonade, were brought out by the Job and Symons parties.

The health and the morale of the camp are the best ever. No hunger strikes are pulled off. The boys are becoming real pioneers. Trips of exploration continue. W. M. Perry, Burgess Perry and Morrisette Pendleton were also among today's guests, coming in Mr. Pendleton's boat.

Prince Charming Jesse Hughes has made of his pup tent a palace fit for a king. Kennedy Houtz discovered today that he was thoroughly alive when he sat down—of course he had his bathing suit on—on a log that contributed to the heating plant of the camp grounds. Happy Johnson was very happy today, having in his possession what seemed to the other Scouts a ton of candy.

A new game is being played, called "Where Did I Put My Clothes?" In the second verse substitute the word "shoes" for "clothes," and so on through all the verses and the articles of wearing apparel. The only clothes not lost are those furnished by nature.

Wash day comes Saturday morning, with a very interesting program. The public is invited to come and help do the work.

Religious services will be held at the camp Sunday afternoon at 3 o'clock. All are welcome.

### NORTH CAROLINA STATE COLLEGE OF AGRICULTURE AND ENGINEERING

STATE COLLEGE STATION RALEIGH, N. C.

Technical Education at State College prepares its graduates for personal success and for leadership in industrial progress. The college offers

FOUR YEAR COURSES IN:

- Agriculture—Including General Agriculture and Specialized Courses in Farm Crops, Agricultural Engineering, Animal Husbandry and Dairying, Biology, Horticulture, Poultry Science, Soils, Veterinary Medicine, Vocational Education.
- Chemistry, Agricultural Chemistry, Textile Chemistry and Dyeing.
- Civil Engineering, Architecture and Highway Engineering.
- Electrical Engineering.
- Mechanical Engineering.
- Textile—Textile Engineering, Textile Manufacturing, Textile Chemistry and Dyeing.
- Agricultural Economics, Business Administration, Rural Life.
- General Science, Physics, Biology.

TWO YEAR COURSES IN:

- Agriculture, Mechanic Arts, Textile Manufacturing.
- One Year Course in Auto Mechanics.
- Winter Course in Agriculture for Farmers.

Summer Session for Teachers, for College Entrance and for College Credit. Excellent equipment in all departments. Session, 1923-1924 begins September 4. Entrance requirements for Freshman Class, 15 units—English, 3; History, 2; Mathematics, 2; Science, 1; Elective, 6.

For catalog, illustrated circulars, and entrance blanks, write E. B. OWL, Registrar.

### FOR REAL SERVICE

Send Us Your Palm Beach, Cool-Cloth and Hopsack Suits.

Also don't make the mistake of putting your winter garments away without having them cleaned. We call and deliver to all parts of the city.

### DO YOU WONDER?

Asks This Lady, "That I'm a Believer in Cardui?"—Had Been So Weak She Had to Go to Bed.

Osawatimie, Kans.—Mrs. E. E. Keast, formerly of Illinois, residing here, says: "We moved to this state eleven years ago, and I had good health for a long while; and then some year or so ago I had a bad sick spell. . . .

"I got so weak I couldn't go. I couldn't stand on my feet at all. I had to go to bed. I suffered a great deal. I was so nervous I felt I couldn't live. I tried medicines, and everything; had the best of attention, yet I wasn't able to get up. I lay for three months, not able to do anything.

"My husband is a bill poster and this circulars distributed. One day they chanced to be a Ladies Birthday Almanac among his circulars. I read it, and told some of the family to get me a bottle of Cardui. . . .

"I quit all other medicines and took it (Cardui) faithfully, and two weeks from the time I began to take Cardui I was out of bed—better than for months.

"I kept it up and continued to improve until I was a well woman.

"Do you wonder that I am a believer in Cardui? I certainly am. And I am sure there is no better tonic made for women than Cardui." NC-151
