

Spain Is Preparing To Enter Olympiad

Interested in Athletic Standing of the Country at Paris in 1924

Madrid, Oct. 3.—Spaniards interested in the athletic standing of their country are turning their eyes toward Paris and the Olympiad of 1924, and considering what should be done to secure the best possible representation.

A member of the Spanish Olympic games committee said recently he thought Spain's chances were good in nine of the 16 principal branches of sport; for the others he had little hope.

The sports in which Spain believes she has chances of success are lawn tennis, horse riding, polo, football, golf, hockey, yachting, fencing and rowing. Those in which she admits she is poor are boxing, wrestling, swimming, cycling, running, and other field sports, winter sports and Rugby football.

Gabriel Maria de Lafitte, president of the Royal Athletic Federation of Spain, spoke recently with King Alfonso about the games. The king was much interested and said: "The government must be asked for support, but we must not rely solely on this aid. We must do what is being done in England and the United States and open a national subscription in which sporting clubs, lovers of athletics and the wealthy class should join freely. I shall be one of the first to subscribe and will also encourage others to do so. Spain should be represented properly in these games. The Spanish competitors must be trained thoroughly, and for this purpose funds are necessary. We must take practical means to find the money, and I think we shall be able to do so."

ROMAN SWIMMER CLAIMS LONG DISTANCE RECORD

Rome, Oct. 3.—The record for long distance swimming is claimed by the Roman swimmer Armando Sannibale, one of the water fans of the Tiber. Sannibale swam a distance of 100 kilometers recently, and contends that such a feat constitutes a record. The distance is roughly 60 miles, and ran on the Tiber from Rome to the sea. The time was 15 hours.

His accomplishment seems phenomenal, but it should be remembered that the Tiber is a very swiftly flowing river, the current moving at the rate of two or three miles an hour.

MEXICO TAKES STEPS TO ENFORCE DRY LAW

San Luis Potosi, Mexico, Oct. 3.—First steps to comply with Article 119 of the constitution of 1917, which provides that all states take measures against alcoholism, have been taken by the state of San Luis Potosi. Under a law just promulgated by the retiring governor, Rafael Nieto, the establishment of new breweries and distilleries is prohibited and existing plants are enjoined from increasing their capacity.

Ten per cent of the liquor licenses granted by the municipality of San Luis Potosi will be cancelled yearly by lot, and the manufacture of liquor of high alcoholic content will be prohibited entirely after July 1, 1928. The law is being violently opposed.

AIR TRAVELERS ARE SUBJECT TO THE PASSPORT RULES

Vienna, Oct. 3.—An air traveler in Europe has to get his passport vised for every country over which he may fly, even if he does not intend to land in that country. This measure was found necessary in order to prevent a passenger, through accident or forced landing, finding himself in a strange state without the proper documentation.

BUILD ALASKA R. R. TERMINAL

Fairbanks, Alaska, Oct. 3.—Construction of terminal facilities for the Alaska Railroad here is progressing rapidly with a large force of men at work. The improvements include passenger and freight depots, engine and oil houses, water tanks and other buildings, to cost in all between \$250,000 and \$300,000.

GERMANY NEEDS SEAMEN

Bremen, Oct. 3.—The need for officers to man Germany's navy and merchant fleet is so great that three sailing ships soon will be in operation to train young men to follow the sea.

Germany always has insisted upon training under sail for the men who officer her steamships.
