mountain rising proudly in the midst of the Black Hills man laid his hand today to begin a gigantic memorial to four American presidents who chartered the course for their country's progress.

The mountain from which the figures of Washington, Jefferson, Lincoln and Roosevelt are to be carved, was so deep in the forests that President Coolidge with the leading role in the dedication had a saddle horse reserved here for him for the four mile journey to Rushmore, the name by which the memorial rock is known.

A narrow winding trail which some day is to succumb to a modorn graveled automobile highway, goes up to Rushmore from Keysione but occasional rains have made it tortuous for automobile travel and the President's party had the saddle horse on hand for use in an emergency.

At Rushmore there was no radio hook-up as is customary when Mr. Coolidge speaks, nor telegraph wires for newspaper correspondents. There was only a five party line telephone to the outside world and that four miles away.

outside world and that four miles away.

The Rushmore Memorial is to be carved by Gutzon Borglum, Beginning the head of Washington today, he hopes to follow as guickly as funds are provided with the figures of the other three presidents.

The completed memorial, the largest of its kind in the world, is intended to typify the growth of the United States through four presidents who took dominant parts in the country's progress.

Washington was selected because he was the first Jefferson because through his efforts the domington was extended westward; Lincoln because he saved the union and Roosevelt because through the Pan-American Canal which he brought to reality, East was linked with West.
