REPUBLICANS who know better. have the face to tell intelligent white men at the South, that the Force bill is all bosh, that it was gotten up ! as a scare and would not be made a law if Harrison is elected, and with him a Republican House and Senate. Of course some men will believe this tale, in fact some mon will try to believe anything. But let us say to the Southern white man who is trying to believe this, that he is being fooled, he is being led against his race, against his freedom and against

his country-the South. Has Harrison and his followers in

the Ropublican ranks shown by their actions in the past two years that they did not want the force bill ? No, and just as certain as he is re-elected just so certain will be use every effort to pass that bill. He has left nothing undone that could be done to make it a law, and but for the patriotic efforts of the Democrats and a few Republicans whose sense of justice held them back, the force bill would to-day be a law and when you went to the polls on next election day you would vote at the point of a bayonet.

Democrats are not overdrawing this question, they do not appeal to the white man to stand by the Democratic party, for party victory, but they are doing it in behalf of the South and freedom.

No matter for what purpose it was introduced or what argument may be brought for or against it, the Force bill stands to-day as the greatest issue in Winston. in American politics. Compare it with the Silver, Tariff or Pension questions and it stands far above all of them. Silver, tariff and pension bills will affect the purse the force bill will affect the liberty of Southern white men. We of the South can afford to accept any bill that has ever meet in Greensboro July 20th. been introduced in the United State Senate or all of them better than we can the Force bill. IT is unbecoming in men to get mad when arguing politics. Every man has a right to his own political opinion, and will always have (unless the force bill becomes a law) and we see no reason why men should get in politics.

THE conflict which occurred July 6th between locked-out workmen and Pinkerton detentives at Carnegie's steel mills, hear Pittsburg, Pa., has attracted the public attention ever since. It seems that the workmen refused

to work when their wages were cut flown from 12 to 20 per cent., by, it is said, the act of the McKinley bill, had they held the works. Thus it was that Pinkerton's men were armed and sent to the scene to quell the mob, but when they appeared on the river in barges they were given a hot welcome and were not allowed to land until they surrendered to the workmen. In the conflict eleven workmen and nine detectives lost their lives.

Gov. Pattison was applied to for troops, which he refused to give until the civil authorities had exhausted their force.

The people are in sympathy with the workmen, who from the first was to keep non-Union men from taking their places in the mills, and to the sequence as to the expediency of patting the marty on the extreme "McKinley arithmeselves.

The information which comes from Connecticut that many lifelong Republicans in that State are going over openly to the side of Cleveland and tariff reform will surprise uo one who is familiar with the sentiment in New England towards the tariff question. Ever since the passage of the McKinley law, there mad because others differ with them has been in all the New England States a steadily increasing body of Republican voters who have reached the conclusion that the only way by

which New England industries can secure the free raw materials necessary for their continued existence is by leaving the Republican party and voting with the Democrats. They demanded free raw materials of the McKinley Congress, and were not Concord.
