Cultivation of Grape Fruit.

Grape fruit has always been grown in southern California, but only lately has there been any demand for it. It is practically a new luxury. But prices are high, the consumption is large and many people are therefore going into the business. A man named McGinnis, near Pasadena, has twelve trees from which he shipped last year fiftynine boxes of grape fruit that brought him an average of \$5 a box. Thus far the shipments of grape fruit from this part of the country have been furnished from a tew scattering trees. There has been no cultivation until the last few years, but now the people are setting out extensive orchards and are grafting the trees up in a skillful manner to improve the fruit and increase the juice and reduce the percentage of

A Literary Coincidence.

General McArthur sent them, under the escort of Major Mallory-the conjunction of the names of "the son of Arthur" and Mallory, the Homer of the Arthurian legend, is a pretty Literary coincidence-to Manila, where General Otis, the American command er-in-chief, received them .- London

A Happy Mother's Gratitude

[LETTER TO MAS. PINKHAM NO. 26,785] DEAR MRS. PINEHAM-I have many, many thanks to give you for what your Vegetable Compound has done for me. After first confinement I was sick for nine years with prolapsus of the womb, had pain in left side, in small of back, a great deal of headache, palpitation of heart and leucorrhoea. I felt so weak and tired that I could not do my work. I became pregnant again and took your Compound all through, and now have a sweet baby girl. I never before had such an easy time during labor, and I feel it was due to Lydia E. Pinkham's Vegetable Compound. I am now able to do my work and feel better than I have for years. I cannot thank you enough."- Mss. ED. En-LINGER, DEVINE, TEX.

Wonderfully Strengthened.

"I have been taking Lydia E. Pinkham's Vegetable Compound, Blood Purifier and Liver Pills and feel wonderfully strengthened. Before using your remedies I was in a terrible state; felt like fainting every little while. I thought I must surely die. But now, thanks to your remedies, those feelings are all gone."-MRS. EMILIE SCHNEIDER, 1244 HELEN AVE., DETROIT

DR. TALMAGES SERMON.

SUNDAY'S DISCOURSE BY THE NOTED DIVINE.

Subject: "Moral Expansion"-Our Duty to the Heathens in the Philippine Islands -Suggestions as to What We Should Do For Their Religious Welfare.

[Copyright, Louis Hlopsch, 1899.] Washington, D. C.—In this discourse Dr. Talmage steers clear of the political entanglements of our time and recommends that which will meet the approval of all who hope for the perpetuity of our republic and the welfare of other lands; text, Genesis xxviii., 14, "Thou shalt spread abroad to the west and to the east."

Since the Americano-Hispanic war is con-eluded and the United States Embassador is on the way to Madrid and the Spanish Embassador is on the way to Washington the people of our country are divided into expansionists and anti-expansionists. From a different standpoint than that usually taken I discuss this all-absorbing theme. I leave the political aspect of this subject to statesmen and warriors and pray Al-mighty God that they may be enabled rightly to settle the question whether the islands in controversy shall be finally an-nexed or held under protectorate or resigned to themselves, while I call attention to the fact that a campaign of moral and religious expansion ought to be immedia-tely opened on widest and grandest scale. At the close of this war God has put into the hands of this country the key to the world's redemption. Heretofore the re-ligious movement in pagan lands had to

precede the educational. After in China and India and the islands of the sea the missionaries have labored over fifty or seventy-five years the printing press and the secular school came in. Now to better advantage than ever before religious and secular enlightenment may go side by side, and so the work be accomplished in short time and more thoroughly. Starting with the fact that in Cuba and Porto Rico and the Philippine Islands at least three-fourths of the people can neither read nor write, what an opportunity for school and print-ing press! Within five years every man in those islands may be taught to read not only the Bible, but the Declaration of Independence and the Constitution of the United States and the biography of George Washington and of Abraham Lincoln.
It seems to me that the Government of

the United States ought by vote of Con-gress afford common schools and printing presses to those benighted regions. Our National Legislature by one vote appropriated \$50,000,000 to give bread and medicine to Cuba. Why not by a similar generosity give \$50,000,000 for feeding and healing the minds and souls of those ignorant and health of the second secon and besotted archipelagoes. In the name of God I nominate a school for every neighborhood of Cuba, Porto Rico and the Philippines. As soon as the gavel falls at 12 o'clock of next December 4 on the table of Senate and House of Representatives and the roll has been called and the prelimin-aries observed let some member of our National Legislature, with mind and soul and voice strong enough to be heard not only through those halls, but through Christen-dom, propose a measure for the mental and moral disenthraliment of the islands in ontroversy.

What has made American civilization the highest civilization the world has ever seen? Next to the Bible and the church, schools, common schools, schools reaching from the Atlantic to the Pacific and from British America to Gulf of Mexico, Five years under such educational advantage, and this whole subject that keeps our public men agitated, some of them to frothing at the mouth, will settle itself. Give those islands readers, spellers, arithmetics, his-tories, blackboards, maps, geographies, globes. Let the State Legislatures at their next meeting, some of them assembling in early autumn, take parts of those islands under their especial educational patron-age. What is needed is State and National ection in this matter of schools.

Then let the editorial associations of the United States, as many of such organizations as there are Stutes, resolve at the next convocation to establish in every region of those islands a printing press, sup-ported by people of this country until it can become self-supporting. Each of these State Editorial Associations sending out to those islands at least one editor and two eporters and enough typesetters, will go the ignorance and superstition of those islands as certainly as the Spanish fleet under Cervera sank under the pounding of our American battleships, and into their every port will go intelligence and love of free institutions as certainly as into the barbor of Manila went Admired Darwey he harbor of Manila went Admiral Dewey on that famous night when he was not expected. Hoe's printing press! Nothing can stand before its bombardment. Editors of American newspapers and publishes. lishers of American books! Take the or-dination for such a magnificent service. Eloquence on yonder Capitol hill cannot meet the exigency. Epigrams of political platforms or in State Legislatures will not basten the desired consummation one

week or one hour or one moment. When Cubans and Porto Rican and Fillpinos see the morning and evening news-papers thrown into the doorways and hawked along the streets of Havana and Santiago and Manila, those who cannot read by the force of curiosity will learn to read, so that they may know what infor-mation is being scattered, and that which may be missionary effort at the start and carried on by Americans sent forth to do the work will soon be done by educated natives. Porto Ricans editors! Porto Rican reporters! Porto Rican typesetters! Porto Rican publishers! It was a great mercy to take these islands from under the heels of despotism, but it will be a mightier mercy emancipate them from ignorance and degradation. The expansion of the knowledge and intellectual qualification of all those islandy regions is the desire of all intelligent Americans. Awake, all you schools and colleges and universities and printing

presses, to your opportunity!
Still further, here is a wide open door for Christianity. First of all, we have the attention of those people. The heathen nations are for the most part soporific.
The American missionaries heretofore had great difficulty in getting heathendom to listen. They excited some comment by their attire, so different was the parting of the hair and the shape of the hat and the cut of the coat and the formation of the shoe of the evangelizers, but the questions constantly arose in regard to the mission-ary: "Who is he?" "What is he here for?" ary: "Who is he?" "What is no nere for And then the interrogator would relax into the previous stupid indifference. But that condition of things hes passed. The guns of our American navy have awakened those populations. They do not ask who we are. They have found out. They are now listening to what American civilization and our Christian religion have to say on any subject. Now is the time, while their ears and eyes are wide open, to tell them of the rescuing and salvable and inspiriting power of the Gospel of Jesus Christ, the Saviour of the world. The steam printing press which secular educa-tion plants there may be used and will be used to print religious newspapers and tracts and sermons and mighty discussions of questions temporal and eternal.

The comfortable homes of those popula-tions, when Christianized, standing side by side with the degraded huts of those who remain pagans will be revolutionary for good. The Porto Bicun and the Filipino will come out from this uncleaned and low roofed and uninviting kennel and say to his neighbor of beautiful household, "Why cannot I have things as you have them?" And when he finds that it is the Bible, with And when he finds that it is the Bible, with its teachings on family life and personal purity and exalted principle, and the church of God that proposes the rectification of all svil and the implantation of all good, he will cry out, "Give me the Bible, and the church, and the earthly alleviations, and the eternal hope which have wrought for you such transfixuration."

Now, church of God, now, all Christian philanthropists, is your opportunity. Nothing like it has occurred since Christ came. Perhaps there may be nothing like came. Perhaps there may be nothing like it till His second coming. Here is a defin-iteness of aim that is most helpful and inspiring. The millions of dollars given for the redemption of the world and the thousands of glorious missionaries who have gone forth among barbaric nations were given and enlisted under a great and immeasurable idea. But when they come to add to the great and immeasurable idea the idea of definiteness we will infinitely augment the work. More than three hundred million of heathen in India, more than three hundred million of people in China and more millions of heathers than can be guessed outside of those countries sometimes stagger and confound and defeat our faith. But here in these islands of present controversy we can farm out the work among the churches and in five years, under the blessing of God, not only fit the peo-ple for the right of suffrage, but pre-pare them for usefulness and heaven. The difference between the general of the world's evangeliza-and some particularized field of tion evangelization is the difference between the improvement of agriculture a mong all nations and the improvement of seventy-five acres put under one's especial care and industry. By all means let the gen-eral work go on. But here is the specific field for religious concentration and development. This is not chimerical or impractical. I read this morning that the American Missionary Association of the Congregational Church has already begun the work at San Juan, Utuado and Albonito, and all denominations of Christians in six months will be in those islandy fields, and we all need with our prayers and contributions to cheer them on to take for God and righteousness those regions which our American navy has captured from Spanish perfidy.
It has been estimated that this Americo-

Spanish war cost us \$300,000,000. It would not cost half of that to proclaim and carry on and consummate a holy war that will rescue those archipelagoes from satanic domination. Who will volunteer? I beat the drum of a recruiting station. Who will enlist under the one sparred, blood striped banner of Immanuel? Cuba and Porto Rico and the Philippines are stepping stones for our American Christianity to cross over and take the round world for God. We need a new evangelical alliance organized for this one purpose. In all de-nominations there are those with large enough hearts and who have been thoroughly enough converted to join in such an advanced movement-men who, putting aside all the minor differences of opinion, "believe in God the Father Almighty, Maker of heaven and earth, and in Jesus Christ His only begotten Son," and who would march shoulder to shoulder in such a Gospel campaign. The result would be that those islands, after such a scene of gospelization, would assort themselves into denominations to suit themselves, and some would be sprinkled in holy baptism and others would be immersed in those warm rivers and some would worship in religious assemblage silent as the Quaker meeting house, and others would have as many jubilant ejaculations as a backwoods camp meeting, and some of those who preached would be gowned and surpliced for the work, and others would stand in citizen's apparel or in their shirtsleeves preaching that Gospel which is to save the world.

Mark you well that statesmanship, however grand it is, and wise men of the world, however noble, cannot do this work. Mere secular education does not moralize. Some of the most thoroughly educated men in all the world have been the worst men. Quicken a man's intellect, while at the same time you do not make his morals good, and you only augment his nower for svil. Goo. graphy and mathematics and metaphysics and philosophy will never qualify a people to govern themselves. A corrupt printing press is worse than no printing press at all, but let loose an open Bible upon those islands and let the apocalyptic angel once fly over them, and you will prepare them to become either colonies of the United States Government, or, as I hope will be

the case, independent republies. God did not exhaust Himself when He built this nation. The islands will yet have their Thomes Jeffersons, qualified to write for them declarations of independence; and George Washingtons, capable of achieving their liberties; and Abraham Lincolns strong enough to emancipate their serfdoms, and Longfellows and Bryants, capable of putting their hills and their rivers and their landscapes into poems; and the Bancrofts and Prescotts, to make their histories; and their Irwings, to write their Sketch Books; and their Charles O'Conors and Rufus Choates, to plead in their court-rooms; and their Daniel Websters and John

J. Crittendens, to move their Senates.

The day cometh—hear it all ye who have no hope for those islands of be-dwarfed and diseased filterates—the day cometh when those regions will have a Christian civilization equal to that which this country now enjoys, while I hope by that time this country will be as superior to what it now is as to-day Washington and New York are better than Manila and Santiago, Do you see in this process of gospelized intelligence those archipelagoes will as a nation be protected from the two woes prophecised in regard to this country—the one woe prophecised by the expansionists and the other woe prophecised by the anti-expansionists? It is said by those who would have us take all we can lay our hands on as a nation that, unless we enter the door now open for the enlargement of our national domain, we will decline the mission which God in His providence has assigned us. But surely no woo will come upon us or upon them if we Christianize them as we now have the opportunity of doing. The political tech-nicalities are nothing as compared with the importance of this movement. I implore all political expansionists to augment us in this work of moral and religious expansion, for unless those islands are moralized and elevated in intelligence and habits we do not want them, and their annexation would be political damnation. On the other hand, I implore all antiexpansionists to take a hand in the gos-pelization of Cuba, Porto Rico and the Philippine Islands. The only way to pre-pare them to take care of themselves is to give them the Ten Commandments that were published on Mount Sinai and let them hear the groan of sacrifice that was breathed out on the heights of Golgotha What they most want is the Gospel, the what they most want is the Gospei, the pure Gospei, the omnipotent Gospei, the Gospei that helps heal the wounds of the body and irradiates the darkness of the mind and achieves the ransom of the soul

But on this platform the so called exwill yet stand side by side. Though I am not a prophet or the son of a prophet not a prophet or the son of a prophet, within five years, if this religio-educations work is properly attended to, there will be a Cuban republic, a Porto Rican republic and a Philippine republic, one of them or a large scale, but they will all have their schools and printing presses and evangelical churches, their Presidents, their Senates and House of Representatives, their Mayor and their constitutions. and their constabularies, and as good or der will be observed in their cities as now reigns on Pennsylvania avenue, Washing

on, or Broadway, New York. Christ has started for the conquest of the nations, and nothing on earth or in hell car stop it. The continents are rapidly rolling into His dominion, and why not these isl ands, which for the most part are only fragments broken off from continents, the luakes, allowing the ocean to take mastery over them. Each mother continent has around it a whole family of little continents. If the continents are being so rapidly evangelized, why not the islands? If America, why not Cuba and the Baha-mas? If Asia, why not the Philippines and the Moluccas? If Europe, why not the Azores and the Orkneys? If Africa, why not Madagasear and St. Helena. The same power that broke them off the mainland can lift them into evangelization.

New Forests in England.

An English writer, in discussing the question of the unemployed, suggests that the waste lands of the United Kingdom be planted with trees to insure a good supply of wood in the near future. This visionary is wor ried by the wooden things imported into England from America. He says "A visit to the docks elicited a deal of curious information. The manufac ture of such useful little articles as clothes pegs, umbrella sticks, mouse traps and skewers has almost ceased in this country, yet the profit attach ing to these goods must be considerable, or it would not pay to cut down the timber, make the goods, pay the callway charges to the nearest port, then expenses of shipping them from America to England, cost of unload ing, middleman's charges, cost of car riage to the places where they are sold and cartage to the shops. The same applies to oars-of which, at the locks, there were a vast numbercollers for washing machines, lathes, looring boards and palings. The coopers' trade is also declining. America sends over enormous quanti ties of wood all cut to measurement, with staves, heads and wooden hoops complete. All that the coopers have to do is to put them together."-New York Press.

Dogs Fight a Wildest.

Sim Randall, a Gulf Summit lumberman, and his two dogs treed a big wildcat near the Cascade. The cat hid in the branches of the tree, and while Randall was circling around in the brush and fallen timber to catch sight of the beast it sprang with a scream ipon his back. The cat struck Ranlall with such force as to knock him lown. Immediately the two dogs flew it the animal to protect their master, and a terrific rough-and-tumble fight 'ollowed. The dogs made it so hot 'or the cat that it ran up another tree. Randall then shot it dead .- New York

Capturing Sturgeon in the Ural Mountains. To fish while mounted on the back

of a horse probably would be beyond the capacity of gentle Izaak Walton of delightful memory, yet that is the way sturgeon is captured in the frozen rivers of the Ural Mountains. Russian Cossacks fish in large bands. They gallop along until they reach the point in the river where the current has its swiftest flight. There they dismount and cut into the ice until they have creared a small pool of water which extends across the rapid current almost from one bank of the river to the other. A net is then sunk to the bottom of the stream and stretched across it at the open pool so that not a single fish can swim beyond its meshes. Then the horses are mounted and the Cossacks turn back and ride along the edge of the river for about four or five miles. Then the band wheels about and gallops rapidly along the ice-covered stream, making a picture that would delight a Schreyer or a Fromentin. The loud cannonade caused by the beating of the horses' hoofs on the surface of the ice terrifies the sturgeon and they swim quickly in advance of their pursuers, tumbling finally in swarms into the
