"Something New Under The Sun."

All Doctors have tried to cure CATARRH by the use of powders, acid gases, inhalers and drugs in paste form. Their powders dry up the mycuous membranes causing them to crack open and bleed. The powerful acids used in the inhalers have entirely eaten away the same membranes that their makers have aimed to cure, while pastes and ointments cannot reach the disease. An old and experienced practitioner who has for many years made a close study and specialty of the treatment of CATARRH, has at last perfected a Treatment which when faithfully used, not only reseves at once, but permanently cures CATARRH, by removing the cause, stopping the discharges, and curing all inflammation. It is the only rem edy known to science that actually reaches the afflicted parts. #### A Wonderful Offer to Women.

We have received word of a most remarkable offer which is to be made to women by The Delineator, of New York,

Taking the fact that next year begins a new century, The Delineator offers to distribute \$17,500 among 1901 women. The plan is so eleverly arranged that a woman living in a small town or village, has just as good a chance to win one of these 1901 prizes as a woman living in a city-because the prizes are given for the number of subscriptions secured in a town in proportion to the population of that town, instead of being giver simply to those who send the largest list subscribers-which, of course, are most o obtained in big cities. Another clever for of the plan is, that all the cities and town the United States and Canada have been ranged in seven classes. The gittes of the greatest population are grouped in Class 1. and as these cities are not very many, the

prizes offered are twenty-eight; the highest prize being \$500, and the lowest \$5.00. The total amount of prizes given away in this class is \$1,000. The remaining smaller towns and villages fall into six other classes, and as the number of towns in a class increases, be cause, of course, there are more small towns than large ones, the amount of prizes given away to a class increases, so that in Class 7 there will be \$4,000 distributed among 603

Furthermore, to everyone who fails to win one of the 1901 prizes there will be paid an extra commission on subscriptions, provided they equal one out of every two hundred inhabitants of the town from which the con

testant sends them. This is altogether a very liberal offer, and one which the famous old Defineator is well able to make good. From our point of view, we do not see why such an offer needs to be made by the Publishers of The Delineator, for we believe it already has nearly half a million subscribers. Its strong hold upon the affect tions of American women has come in the past generation, from its practical advice about dress details and home matters.
