 OFFICE OF D. H. HAMDY, Secretary of State, AUGUST, 1892, Nov. 21, 1900.  
 I have found Dr. Moffett's TEETHINA a splendid remedy and aid for my teething children. When my eldest boy was a teething child, every succeeding day warned us that we would inevitably lose him. I happened upon TEETHINA, and began at once administering it to him, and his improvement was marked in 24 hours, and from that day on he recuperated. I have constantly kept it and used it since with my children, and have taken great pleasure in sounding its praises to all mothers of young children. I found it invaluable even after the teething period was passed.
