FROM THE NATION'S CAPITAL.

[Special Correspondence to THE BEACON]
WASHINGTON, D. C., June 27, '05.
In the opinion not only of Democrats, but of many prominent Republicans as well, President Roosevelt has made the blunder of his administration by his refusal to permit his Secretary of the Navy, Paul Morton, to be prosecuted for his share in the responsibility for the granting of rebates by the Santa Fe road, (of which Morton was vice President in charge of freight traffic) in violation not only of the law but also of an express injunction of the court. As a result of the President's refusal Judson Harmon, who sat in Mr. Cleveland's cabinet at the same table as Paul Morton's father, and Frederick Judson, who together were retained as special counsel to prosecute the case of the government against the Santa Fe, have resigned, and the President has been compelled to make public the correspondence connected with the case, which he does with great gusto and with the apparent conviction that he is entirely in the right, but with what competent judges declare to be an aggregation of the most specious arguments which were ever presented by a high official of the government.
In the estimation of prominent Democrats, and too of many leading Republicans, the President has seriously weakened, if not destroyed his power for good. He has established the dangerous precedent that where corporations are caught in flagrant violations of the law the officers responsible for such violations are not to be prosecuted but merely the corporations themselves. Of course this is absolutely farcical as it means merely the infliction of a fine on the corporations, when they are found out, and a fine of such small proportions as to act in no way as a deterrent from a repetition of the crime. With no disgrace following the perpetration of such illegal practices the officials will naturally regard it as their duty to their stockholders to disregard the law whenever they believe they are safe from detention.
Although Mr. Morton virtually confesses that he knew that his road was guilty of illegal practices and declared that his subordinates, who granted the rebates, did "perfectly right" and that in no other way could the road continue in business, Mr. Roosevelt grants him entire absolution and assures him he need pay no further attention to the accusations which have been made against him. The President also assures Mr. Morton that he will make a splendid head of the Equitable and then proceeds to give him some expert advice as to how to conduct the affairs of that institution.
Speaking of the Equitable, the President expresses the view that all insurance ought to be conducted un-

der federal supervision, despite the fact that the Supreme Court of the United States has repeatedly ruled that the federal government cannot, under the constitution, exercise such supervision.
Insurance Superintendent Hendrick's report on the affairs of the Equitable insurance company, just made public, reveals the fact that Senator Depew of New York, has been drawing a "retaining fee" of \$20,000 a year as special counsel for the Equitable and has been accepting this amount of the policy holder's money for twelve years, making a total of \$240,000. Moreover, as a director and member of the executive committee, Mr. Depew has also been accepting additional fees of \$4,000 a year. It has been sarcastically remarked that in so far as can be ascertained, the only service which Mr. Depew returned, in consideration of his \$16,000 a year fee, was to see that the high officers were not underpaid and in substantiation of this assertion it is pointed out that Mr. Alexander drew a salary of \$75,000 a year and that Mr. Hyde, four years graduated from college, drew a salary of equal amount. As no one has suggested that the Depew salary was meant to insure no undue interference with the affairs of the Equitable by the State Insurance Commissioner, it would be highly improper for your correspondent to do so, but there seems to be good reason for believing that the honorable junior Senator from New York will be subjected to a certain amount of innocent chaffing when he returns to Congress next winter.
The President is still striving to prevent, or at least diminish, loss of life in Manchuria and while his efforts to lead Russia and Japan to agree on an armistice seem unlikely to meet with success, he is urging as early a date as possible for the coming peace conference.

A REUBENS EXPERIENCE.

New York, June 16.—Filled with woe and pondering on the wickedness of New York, Charles M. Bowers, 50 years old, and a typical farmer from Hickory, N. C., is impatiently awaiting a response to a telegram telling of his misfortunes and requesting money to enable him to pay hotel bill and quit the place that has been his complete undoing.
Attracted by the alluring offers of some alleged real estate men, to whom he had previously sent \$50, as a deposit to guarantee a purchase he was about to make, Mr. Bowers arrived here only to discover that the land he was to buy did not exist, and that he was out the \$50. He told his troubles to Assistant District Attorney Chadwick to-day.
Sitting on the steps of the criminal courts building, he took out his pocketbook and counted over his money. There was exactly \$150. Returning it to the purse he laid it beside him on the steps and began figuring on the back of an envelope.
So engrossed was he upon the wanton extravagance of the metropolis that he forgot all about his pocketbook and concluding his reckoning went back to Smith & McNeill's hotel. There he discovered his loss. At once he hurried back to the criminal courts building and was sorely disappointed to find it gone.
"It's a terrible city," he said to the sergeant of police at the Elizabeth street station later, "full of thieves, and I want to get out and never see it again."
Huge Task.
It was a huge task to undertake the cure of such a bad case of kidney disease as that of C. F. Collier, of Cherokee, Ia., but Electric Bitters did it. He writes: "My kidneys were so far gone, I could not sit on a chair without a cushion; and suffered from dreadful backache, headache, and depression. In Electric Bitters however, I found a cure and by them was restored to perfect health. I recommend this great tonic medicine to all with weak kidneys, liver or stomach. Guaranteed by Sprull and Brothers; price 50c."

How Consumption Begins.
Consumption always begins with a cough that lingers. A cough that hangs on and will not yield to the usual treatment, may not mean consumption—but too often it does mean this dead destroyer has gained a footing—Kydale's Cough Elixir is very successful in checking the progress of throat and lung diseases. Even consumption yields to its powerful influence if its use is begun before the disease is too deep seated. This modern scientific remedy kills the germs that cause consumption. It removes the cause and helps nature rebuild the broken-down tissue. If you have stubborn cough, try Kydale's Cough Elixir, it will not disappoint you.
