How Meerschaum is Mined. "Meerschaum is mined like coal," said a pipe dealer. "It is a soft, soap-like stone, and in Asia Minor its mining is an important industry. The crude meerschaum is called kamtaah. It is yellowish white in color and a red clay coat or skin envelops it. The blocks cost from \$25 to \$200 a cartload. They are soft enough to cut with a knife. Those blocks in summer are dried by exposure to the sun. In winter a heated room is necessary. Finally, the meerschaum blocks are sorted into twelve grades, wrapped in cotton and packed in cases with the greatest care. "The bulk of all this meerschaum goes to Vienna. There the best pipe-makers in the world live."—Philadelphia Bulletin.
