

ROPER NEWS.

Mrs. Ida Blount is spending the week with friends here.

Mess. E. S. and J. W. Blount of Wenona spent the weekend at their respective homes near Roper.

A squad of engineers

Mrs. J. L. Hassell is expected to return this week from Baltimore where she has been to purchase her spring millinery goods. Miss Hines, her former trimmer, will return with her.

Rev. Mr. Abernethy of La-Grande preached in the M. P. Church at Roper.

J. W. Wiley

occupy g

temporarily

ing is ready for occupancy and Mr. H. M. Jacobs has moved into the cottage on the S. side of the street by Mr. Williams.

The educational play, "The Fair of Mt. Vernon" is at the Town Hall last Friday evening under the auspices of the betterment Assn. of Roper Graded schools was quite a success and reflects great credit upon those who participated in the play.

quite a success and reflects great credit upon those who participated in the play.

for the benefit of the Association. Among those from out of town who attended were Misses Johnston and Chesson of Market; Mr. Geo Swain with Misses Norman, Misses Eva and Mary Swain, Prof. Carson and C. T. White, of Sknersville, and Miss Carson of Bethel, and Mr. Stark Holton with Miss Mary Wiley.

Attention of the public is again called to the institutes being held here every Thursday for the free examination and treatment of hookworm. Dr. Pridden says that a large percentage of our people are infected and he is a-greatly surprised to find so much interest manifested and so many taking advantage of the opportunity for free examination and expert treatment. Every person, regardless of creed, color or sex should be examined and if infected should take the treatment which is absolutely free, and if not infected, it is worth something to you to know it and you will be happier hereby. Farmers should not only have themselves and families examined but their tenants and their families as well in order to avoid re-infection. If you are skeptical, go to the institute and take a look through the microscope and be convinced. Full information including illustrated pamphlets and specimen boxes may be had at any time by application to B. S. Clark, Local Registrar of Vital Statistics, for the N. C. State Board of Health.

CRESWELL NEWS.

Capt. Spruill's new automobile arrived Monday.

They report a very instructive meeting.

The teachers of the school here attended the teachers meeting at Mackey's Saturday.

Rev. Mr. Johnston held services at St. Davids Sunday morning and at night, in Christ Church.

Dr. Hardison returned Saturday from Norfolk where he attended the Tri-State Medical Convention.

The M. P. Church gave a Valentine Party last Friday night. It was postponed one week on account of rainy weather.

Miss Sallie Burket, a teacher at Cherry, visited Miss Eva Spruill last Friday night and Saturday.

Dr. J. L. Hassell has returned from Norfolk where he accompanied a patient who was suffering with chronic appendicitis.

Mr. Walter Peal took Mrs. Peal, Miss Myra Hardison, Miss Carrie Smith and Prof. H. C. Griffin on his car out to the home of Miss Hattie Snell Sunday.

Mr. and Mrs. H. A. Litchfield Jr., returned Monday from Hertford where they have been visiting Mr. Litchfield's sister Mrs. Myrtle Reid.

After a few days visit in the home of her uncle, Mr. Alfred Alexander, Miss Earnestine Alexander returned Monday to her home in Plymouth.

Master Joe Basnight and Ethel Davenport, ages 13 and 14 respectively, according to a written consent of their parents, were married here Sunday morning by Dr. J. L. Hassell.

...the 28th day of Feb'y, 1913.

Yours for up-to-date goods at right prices

CLYDE CAHOON.

Labor-Saving Cole Planters and Distributors THAT EVERY FARMER NEEDS

Every farmer in this section should own one of these Cole Planters and Distributors. They positively pay for themselves after a few days in the field. The planter plants better and cheaper than any other planter ever built. The distributor makes one trip do for two—doubles the good from guano. Cole Planters and Distributors are the "Farmer's Friend." They were "born and raised" on a North Carolina farm.

You'll find them so downright useful and reliable that you'll wonder how you ever got along without them—why you were ever content to put up with out-of-date machines, when you could own a Cole!

The Cole Planter

SAVES Labor of 1 Man and Mule

Plants Cotton, Corn, Peas, Beans, Peanuts and other Seed

At one trip the Cole Planter smooths the bed, opens a furrow, mixes guano with the soil, covers it, opens again, plants the seed, and covers them in the most accurate manner. The guano being mixed with the soil directly under the seed, feeds the plants as soon as the seed sprout. You get a quick start, get two chances at a big crop.

The Cole Planter plants the seed in a straight line at the same depth. The depth is easily regulated. Cotton comes up in a straight line—without bunches. It can be chopped to a stand cheaper, cost of cultivation is less.

The seed fall in plain sight. The wind can't blow them away—none are wasted at the end of the rows. Doesn't skip or bunch the seed—as far ahead of the old style planters—as the old style way is ahead of hand planting. Works perfectly on any kind of land, where other planters are unsatisfactory.

The Cole Spreader and Cultivator

Lister and Side Dresser

Sows Guano and Throws a Good List at one Trip

With this machine you can feed guano to growing crops—get more good out of it—spread guano at the right time to make fruit, right where a network of roots need it.

By feeding the guano during the growth instead of all at one time but little is washed away. The plant receives all the benefits of the plant food.

With cultivator attached (as shown in the cut) you can sow guano and effectively cultivate at the same time—save the work of one man and one mule.

Two strong universal plow feet are furnished free. By removing cultivator and attaching plow feet, you have the best machine for sowing guano and throwing two good furrows upon it.

The hopper holds 1/2 sack, and spreads uniformly any quantity from 100 lbs. to 2000 lbs. to the acre.

Pays for itself in labor saved—doubles the good from guano.

The Cole SINGLE FOOT Distributor

Opens a Furrow and Sows Guano at One Trip

Here's a Cole Distributor with opening plow in front, which many farmers prefer.

With one, you can run off rows, open a furrow, and sow guano at the same time. It'll save the work of one man and mule every day. Especially good for side-dressing—can be run up alongside plow.

Strongly made throat, large hopper, strong plow wheel with steel spokes. Convenient lever, cuts off row of guano. Has the reliable Cole force feed, noiseless as a bicycle. Swivel rod holds distributor rigid while you fill the hopper.

The Cole DOUBLE FOOT Distributor

Sows Guano in Open Furrow. Throws 2 Good Furrows Upon It.

Saves Labor

The form of spout used on this machine spreads the guano, instead of putting it in a small stream. The fertilizer feeds more plant roots—gets more good from guano.

Positive force feed sows from 100 to 1,500 lbs. of guano to the acre. Instantly regulated.

The plow feet throw two good furrows upon guano at the same time. Plow feet are strongly attached to side beams, so that good plowing can be done.

You can leave it without danger of its falling. Graduated hitch post adjusts the weight on the plows.

Other Styles of Planters and Distributors to Meet Every Need

Besides these machines we have the Universal Single Foot (either force feed or Knocker), Universal Double Foot Knocker, and other styles suited to different uses. Discard your old out-of-date trouble making planter or distributor, hitch up to one of these labor saving Coles! Come and see them now.

Guaranteed By Us and By The Cole Mfg. Co.

The Cole is doubly guaranteed. The maker guarantees it. We guarantee it. Every machine must prove a practical daily working success in your field, no matter if the soil is rough or smooth, level or hilly, with crooked rows or straight.

They are made as good as money and brains can make them—sold at a fair price to everybody. Come and see these machines. Get ready for planting time.
