THE BEST HOT WEATHER TONIC, GROVE'S TASTELESS CHILL TONIC

The Old Standard, General Tonic. Drives out Malaria, Enriches the Blood and Builds up the Whole System.

FOR ADULTS AND CHILDREN.

It is a combination of QUININE and IRON in a tasteless form that wonderfully strengthens and fortifies the system to withstand the depressing effect of the hot summer. GROVE'S TASTELESS CHILL TONIC has no equal for Malaria, Chills and Fever. Weakness, general debility and loss of appetite. Gives life and vigor to Nursing Mothers and Pale, Sickly Children. Removes Biliousness without purging. Relieves nervous depression and low spirits. Arouses the liver to action and purifies the blood. A true tonic and sure appetizer. Guaranteed by your Druggist. We mean it. 50c

IMPORTANT CORN CROP

Elimination of Weeds is Absolutely Necessary.

Soil-Mulch Theory of Tillage Has Been Fundamental One in American Agriculture—Soil Moisture is Conserved.

(By T. C. CATES.)
Corn is one of the most important crops in the United States. Cultivation is one of the most expensive operations in the production of corn. It is also the operation which of all phases of corn growing, has probably received the least study or about which we have the least fundamental knowledge.

The soil-mulch theory of tillage has been a fundamental one in American agriculture. It was long ago found that by means of a mulch, crops could be grown in alternate years on land receiving such scant rainfall as to make it impossible to grow any satisfactory crop by other methods. In studying the effect of the mulch it has come to be generally recognized that in most soils moisture can be saved by maintaining the top portion of the soil in a finely divided condition. It has also been found that frequent stirring of the soil promotes rapid nitrification. It would seem to follow, naturally, that a system of cultivation which promotes nitrification and conserves moisture would be an extremely valuable system to apply to a tilled crop. In practice it has been found that in most cases frequent shallow cultivation gives better yields than other methods of corn tillage. Upon this experience tillage philosophy has been developed and tillage practice based.

To ascertain the ideal method of cultivation for corn in various sections of the country, experiments aggregating 125 and scattered over 28 states, were conducted. These experiments were simply removing the weeds without stirring the soil or producing a mulch, as against corn cultivation. The measure of the relative merits of the two systems was, not in the preservation of soil moisture or the effect on nitrification, or the making available of plant nutrients, but the relative yields of corn produced.

These tests seem to indicate that it is the weed factor which makes the cultivation of corn necessary, or, producing foods. During the entire time they should receive a few handfuls of sunflower seeds each day, as these are very good in helping to loosen up the feathers. Feed with care, however, as too many would have a bad effect, causing an unnatural molt.

Plenty of meat and green food are very essential to getting fowls through the molt successfully. Give them lots of green cut bone or ground beef scraps, and all they will eat of various kinds of green stuff, grass and vegetables. A little linseed meal, added to the mash two or three times a week, will be found to be very beneficial at this season.

See that the fowls have cool, fresh drinking water at all times. Keep down lice and mites, as many of the deaths during the molting period are caused by these pests and not on account of any hardship attending the molting process, as many people suppose. Provide dust baths in which the fowls may wallow whenever they want to, and these will help to exterminate vermin as well as furnish healthful exercise and pleasure to the birds.

Conclusion Taken From Bulletin by Experts of Indiana Agricultural Experiment Station.

The addition of corn silage, once daily to a ration of shelled corn, cottonseed meal, and clover hay, reduced the cost \$1.33 for each hundred pounds of gain and increased the total profit \$8.85 per steer.

The addition of corn silage twice daily to a ration of shelled corn, cottonseed meal, and clover hay, reduced the cost \$3.17 for each hundred pounds of gain and increased total profits \$11.19 per steer.

The substitution of corn silage for clover hay in a ration of shelled corn, cottonseed meal and clover hay reduced the cost \$4.35 for each hundred pounds of gain and increased the profits \$17.97 per steer.

The more nearly corn silage replaces the clover hay in the ration, the cheaper was the gain and the greater the profit.

The silage used in this trial contained an unusually high per cent. of dry matter and was, judging from previous experience, more efficient for fattening cattle than silage containing a higher per cent. of moisture.

A ration of shelled corn, cottonseed meal, oat straw and corn silage (twice daily) proved to be as efficient for fattening cattle as a ration of shelled corn, cottonseed meal, clover hay and corn silage (twice daily).

PROPER CARE DURING MOLT

Hens That Have Completed Process and Regained Normal Condition Before Winter Most Desired.

The early-molting hens are the most desirable ones, because they will have completed the process and regained their normal physical condition again before winter sets in, and therefore will be in better shape for the arrival of cold weather and will lay more eggs. The hens that are not well clothed with a new coat of feathers by the time the weather turns cold will not prove very profitable as winter layers, because cold weather will still further retard the molt and the fowls will suffer quite a bit with the cold.

Molting may be hastened somewhat by withholding the greater part of the food supply ten days or two weeks and then give the fowls all they will eat of rich flesh-forming and feather-

KEEP HENS IN GOOD FLESH

Keep the Fowls Busy, Feed Them All They Will Eat and They Will Make the Best Records.

(By M. PURVIS.)
Hens that are kept thin in flesh will not make good egg records. Professor Rice of Cornell, had a lot of hens killed and their laying condition noted, during his absence. He then examined the carcasses and was able to pick out the best layers by simply choosing those which showed the most fat. Keep the hen busy, feed her all she will eat and she will make the best record possible.

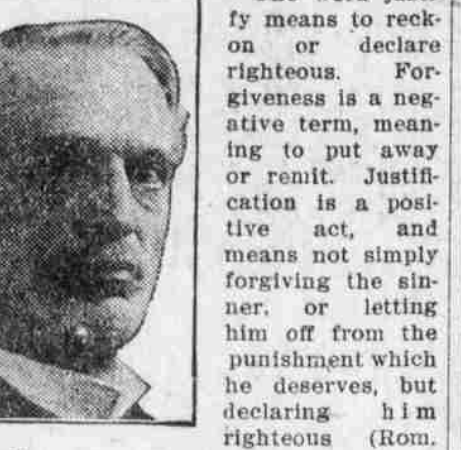

Dairy's Golden Era.
This is the golden era for those who know how to handle dairy products. Good prices are the rule. All such commodities have reached a high level, and the situation is such that farmers are assured liberal profits.

How Can God Declare One Righteous Who Is Not Righteous?

By REV. H. W. POPE
Superintendent of Men
Moody Bible Institute, Chicago

TEXT—Therefore being justified by faith, we have peace with God through our Lord Jesus Christ.—Romans 5:1.

The word justly means to reckon or declare righteous. Forgiveness is a negative term, meaning to put away or remit. Justification is a positive act, and means not simply forgiving the sinner, or letting him off from the punishment which he deserves, but declaring him righteous (Rom.

4:5).

How can God reckon one righteous who is not righteous? This is a fair question and we must face it. Suppose a merchant in a small town had fallen into debt. He is not a good buyer, he is not accurate in his accounts, and he is shiftless. Suppose a rich uncle who has made a fortune in the same business, and has retired, should pay him a visit. After a few days he says to his nephew: "John, I hear bad reports about you; people say that you are sadly in debt and that your credit is poor. I have had a good year, and I believe I will help you. If you will foot up all your debts I will give you a check for the whole amount."

John accepts his offer and pays off his creditors. As they go out of his store they say to one another: "We are fortunate in getting our money this time, but we will not trust him again. He is the same shiftless John, and he will soon be as badly in debt as ever." Now what has his uncle accomplished for John? He has paid his debts, but he has not restored his credit.

Suppose, on the other hand, that the uncle had said: "John, I have been out of business a few years and I find that I am getting rusty. I like this town and I have about decided to go into partnership with you." John is delighted, of course. The uncle says: "I will put in all my capital and experience, but I shall insist upon being manager of the business. You can be the silent partner and work under my direction. And John, I think you had better take down that sign over the door, for your name does not command the highest respect in this town. Suppose you put up my name instead, & Co. I think it will look better, and you can be the company."

John gladly complies with the conditions, and the business opens under new auspices. John goes out to buy goods, and what does he find? Instead of refusing to trust him, every merchant in town is glad to give him credit, because his rich uncle has become identified with the business. In the one case the uncle paid his debts, but did not restore his credit. In the other case he restored his credit by going into partnership with him.

God's law says that the soul which sinneth shall die. When Jesus took our place on the cross and died for our sins, that paid our debt, but it did not restore our credit, it did not make us righteous. Had there been no resurrection of Jesus we could not have been justified, though it is conceivable that we might have been forgiven. But when Jesus rose from the dead and identified himself with us by faith, coming into our heart and taking possession of our life, then he not only paid our debts, but he restored our credit. He made it possible for God to declare us righteous, since we have gone into partnership with a righteous Saviour, who has not only kept the law perfectly himself, but who is able to help us to keep it. He is the managing partner, and we simply obey his orders. We have even taken down the old sign, and now we bear his name—Christian.

Martin Luther said: "If any one knocks at the door of my heart and inquires if Martin Luther lives here, I should reply, 'Martin Luther is dead, and Jesus Christ lives here.'" Paul had the same idea, for he said: "I live, yet not I, but Christ liveth in me." "For ye are dead and your life is hid with Christ in God."

If Jesus lived a holy life in one body he is surely able to do it in another, if that body is yielded to his control. God then can properly and justly reckon the believer righteous because of his union with the righteous Saviour who has atoned for his past sins by his death on the cross, and who guarantees his present and future conduct because that life has been committed to his keeping.

If, as he says, he is "able to save unto the uttermost," "able to keep us from falling" (Jude 24), and if he guarantees to present us before the presence of God's glory absolutely faultless, surely God can safely reckon us as righteous. The ground of our justification then is not what we are, but whose we are, not our own good works, or our desire to be righteous, but our union with the Lord Jesus, who was "delivered for our offences, and was raised for our justification" (Rom. 4:25).

One Man Made \$1,358 Profit in 3 Months

Why Scratch?

"Hunt's Cure" is guaranteed to stop and permanently cure that terrible itching. It is compounded for that purpose and your money will be promptly refunded WITHOUT QUESTION if Hunt's Cure fails to cure Eczema, Tetter, Ring Worm or any other Skin Disease. 50c at your druggist's, or by mail direct if the hasn't it. Manufactured only by A. B. RICHARDS MEDICINE CO., Sherman, Texas

Misplaced.
First Cider—Why so angry?
Second Cider—I've been wasting time in a glass eye.

Cures Old Sores, Other Remedies Won't Cure
The worst cases of that matter of how long standing, are cured by the wonderful, old reliable Dr. Porter's Antiseptic Healing Oil. Relieves pain and heals at the same time. 25c, 50c, \$1.00.

The woman of fashion considers it a great feat to be able to wear small shoes.

Gone Forever.
Mother (to little Ethel sobbing as if her heart was broken)—Well, well, what is the matter, dear?
Ethel—Tabby got lost.
Mother—Never mind, darling, we'll advertise in the papers for tabby.
Ethel (still sobbing)—She'll never, never come home 'cause she can't read.

Negligence Called Manslaughter.
The case of Stehr vs. State before the supreme court of Nebraska involved the sentence of a father for from one to ten years in the penitentiary for criminal negligence, because during a blizzard in Nebraska, when the weather was bitter cold, he permitted the fire to go out, snow drifted through a crack in the door and a broken windowpane, and the bedding of all the members of the family was frozen stiff. The feet of one of the children were frozen, and although such fact was apparent to the father no physician was called in for sixteen days, when amputation was found to be necessary and the child died of blood poisoning. The defendant was convicted of manslaughter for criminal negligence in failing to provide medical care after he discovered the frozen condition of the child's feet. In affirming the conviction the court held that for a parent having special charge of an infant child culpably to neglect it so that death ensues as a consequence is manslaughter, although death or grievous bodily harm was not intended, and if the parent has not the means for the child's nurture it is his duty to apply to the public authorities for relief.

A Triumph Of Cookery—

Post Toasties

Many delicious dishes have been made from Indian Corn by the skill and ingenuity of the expert cook.

But none of these creations excels Post Toasties in tempting the palate.

"Toasties" are a luxury that make a delightful hot-weather economy.

The first package tells its own story.
