**The Children of Plymouth Tell Why The
GREAT MAJESTIC RANGE**

SHOULD BE IN EVERY KITCHEN

The Majestic Range should be in every home. First, because the cook stove is used more than anything about the home and I have always heard that the nearest way to a man's heart is through his stomach. So when you buy a Majestic Range it makes all the family better satisfied, because it cooks so much better than anything made on the market.

LIDA B. ANGE.

Everyone that uses the Majestic Ranges will tell you that it is far superior to other ranges which they have used. First: It heats water better, and doesn't interfere with the baking of the range. Second: It takes less fuel. Third: It lasts longer and is made by the oldest range concern now in business. They have built their reputation up on the merits of their goods. It is sold by A. L. OWENS, the most up-to-date merchant in our town.

RUBY HARRISON.

The Majestic Range is the only Range on the market that the railroad company will receive for shipment without crating, which shows its durability over other ranges. We have some in our town that have been in use for quite a few years and are still good, they don't rust like steel ranges.

MYRTLE SWAIN.

The economy in fuel is the point that my mother considers best about the Majestic Range; also it gives you 15 gallons of clean, hot water at any time of day or night. The Majestic salesman has been demonstrating with a paper stove pipe all week which shows you the safety of the stove. Then it bakes so much better than other Ranges.

The Great Majestic Range has proved for years to be the best range on earth. You won't find any other range on the market that has been in use for 27 years and is in good cooking condition. There are a great many Majestics that have been in use this length of time. You should come to Owens' store and see how much better than other Ranges. LAURENCE JONES

My mother considers the Majestic Range the best range on earth. First: it sold for a good reliable concern. Second: It lasts longer and is cheaper in the long run than other stoves. The man that has been demonstrating here all this week shows the superior baking and water heating and what a small amount of fuel it takes to operate it.

MARY SPRUE

My mother considers the Great Majestic Range the best in all. First: The qualities are far better; it heats an abundance of hot water and holds it better than any other range she has ever used. The summer it doesn't over-heat you like a cast stove. The Majestic has won the medals at the Jamestown, St. Louis, and San Francisco Expositions as being the best Range on earth. JAMES H. SMITH

The Great Majestic Range should be in every kitchen because it heats quickly a small amount of fuel. It bakes better if properly handled will last a life-time.
